

Hiepolder

Complete Solutions in Plastics Engineering since 1985

ISO / IATF 16949
certified

Family owned enterprise

The Richard HIEBLER GmbH, founded **1985** in Stainz, took over the company premises of a disused textile factory.

During the last three decades we evolved us from a small family business to a acknowledged **mould manufacturer**, **component producer** and **polymer injection moulder**.

Today, with our focus on efficiency and sustainability, we implement innovative projects in close cooperation with our customers.
