

canar endüstri

Considering the demands, suggestions and ideas of our customers, we produce many products for domestic and international markets. We ensure the satisfaction of our customers by controlling all of our activities and monitoring the effectiveness of activities.

Our company, which has been precision metal processing for more than 10 years and rubber injection and plastic injection production for 3 years;

It responds to the requests of our valued customers with precision metal processing, rubber injection and plastic injection, which are constantly updated on a project basis.

The secret of producing products in a short production time;

- A wide range of machinery

- We can define it as having a young, dynamic and experienced teammates.

An OVERVIEW Of The COMPANY

1. Scope

These are some specimen samples of our products that we have manufactured so far.

2. *Research and Design*

- ✓ Optical Scanner (Out Sourcing),
- ✓ Designing (with "Solid Works" Programming),
- ✓ Moulding Design (with "Cimatron" Programming),
- ✓ Mould Manufacturing with CNC Milling and turning (Aluminium Injection mould, plastic injection mould, rubber injection mould, forging mould).

3. Raw Materials

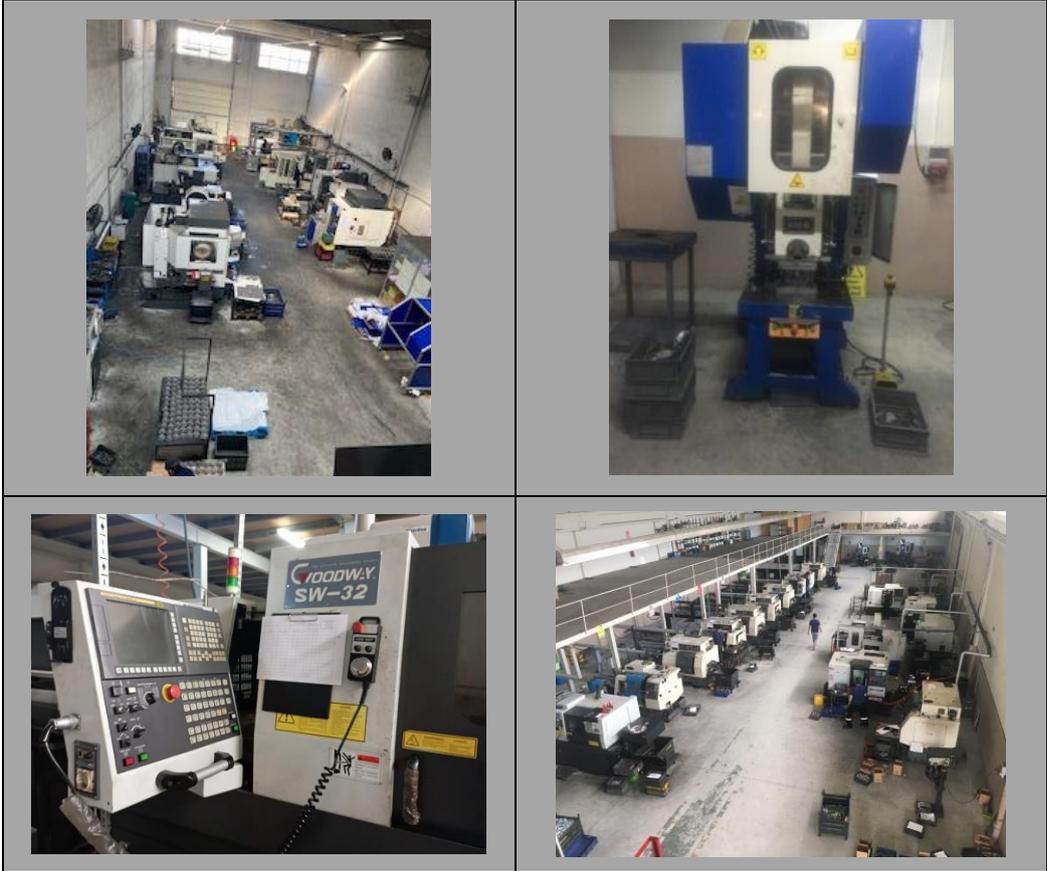

Cast Iron, Aluminium Injection casting, Forging brass or aluminium or steel, Rod Material and engineering plastics.

4. Machining, Turning, and Stamping

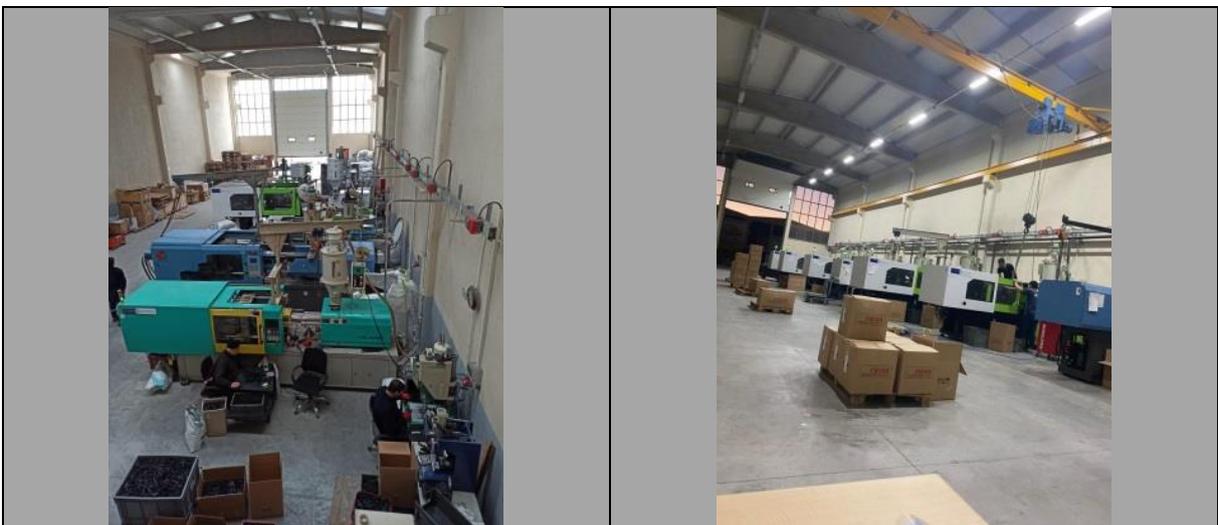

The List of Machines;

- 1 amount of CNC Mori Seiki MSG-803 Machining and milling horizontal,
- 5 amount of machine CNC Machining and milling with 5 axis,
- 3 amount of machine CNC Machining and milling with 4+1 axis,
- 3 amount of machine CNC Machining and milling,
- 2 amount of machine CNC Machining and milling horizontal,
- 1 amount of machine CNC Machining and sliding automat,
- 5 machines of CNC Turning 8",
- 3 amount of machine CNC Turning 6",
- 4 amount of machine SWISS type and Multi spindle turning with bar feeder,
- 6 amount of machine CNC Turning with bar feeder,
- 2 amount of machine Press for stamping and other universal machines.

5. Plastic Injection

- 12 amount of Plastic Injection Machine,
- 1 amount of Ultrasonic Plastic Welding Machine.

6. Quality Control

- Mitutoyo Coordinate Measuring Machines (CMM),
- Mitutoyo Quick Scope – Digital Microscope,
- Hardness machine (Rockwell-Brinell),
- Surface Roughness Tester,
- Mitutoyo Linear Height.

7. Laser Marking and Packing
