

FRANTZIS
MECHANICAL INDUSTRY

The company Frantzis K. Bros G.P. was founded in 1957, and since then, we have remained committed to our principles, always seeking to maintain the quality of our products and improve our capabilities.

Our facilities are located in the Industrial Area of Sindos in Thessaloniki, covering 3000m², fully equipped workshop.

Our team consists of experienced craftsmen and we manufacture products and spare parts according to the requirements of our customers, either for mass production or unique orders.

OUR SERVICES

SPUR GEARS

We manufacture gears in various types and dimensions, covering a wide range of diameters and tooth sizes according to the requirements of our customers.

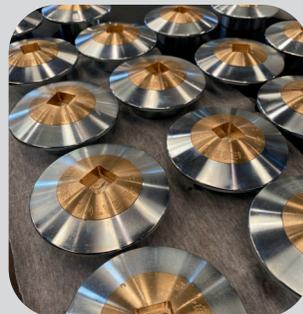

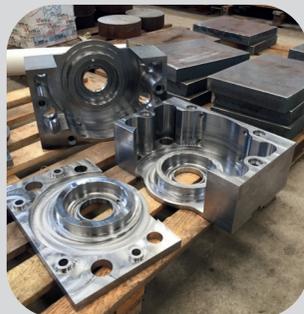

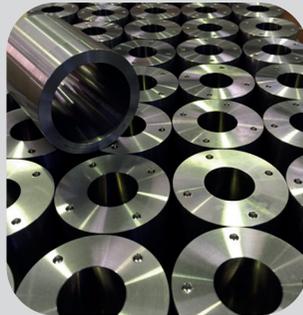

BEVEL GEARS

We specialize in manufacturing of bevel gears. Straight teeth, spiral or hypoid.

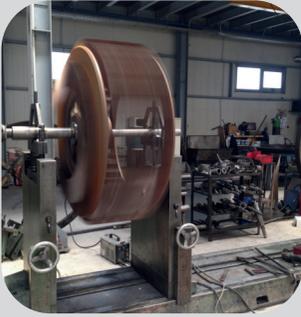

GEAR SHAFTS AND WORM GEARS

We can manufacture gear shafts with long toothing, splines, worm gears and various engravings in cylinders for use in the paper and food industry.

CNC PARTS

Our workshop is equipped with CNC milling machines and lathes. We are capable of producing high precision parts in small or large batches.

DYNAMIC BALANCING

We can do dynamic balancing in various mechanical parts such as fans, impellers, rotors and crushers.

GEARBOX REPAIR AND REBUILD

We undertake the complete repair in all kinds of industry gearboxes. Bevel, Helical, Worm or Planetary type.

VARIOUS MECHANICAL REPAIRS

We undertake the complete custom manufacturing of components based on designs or samples, and where feasible, with the ultimate goal of cost reduction, we also propose the repair of these components.

VARIOUS CONSTRUCTIONS

The 3000m² of covered space in our facilities allows us to undertake large and complex mechanical constructions for any type and size of industry.
