

CERJAK

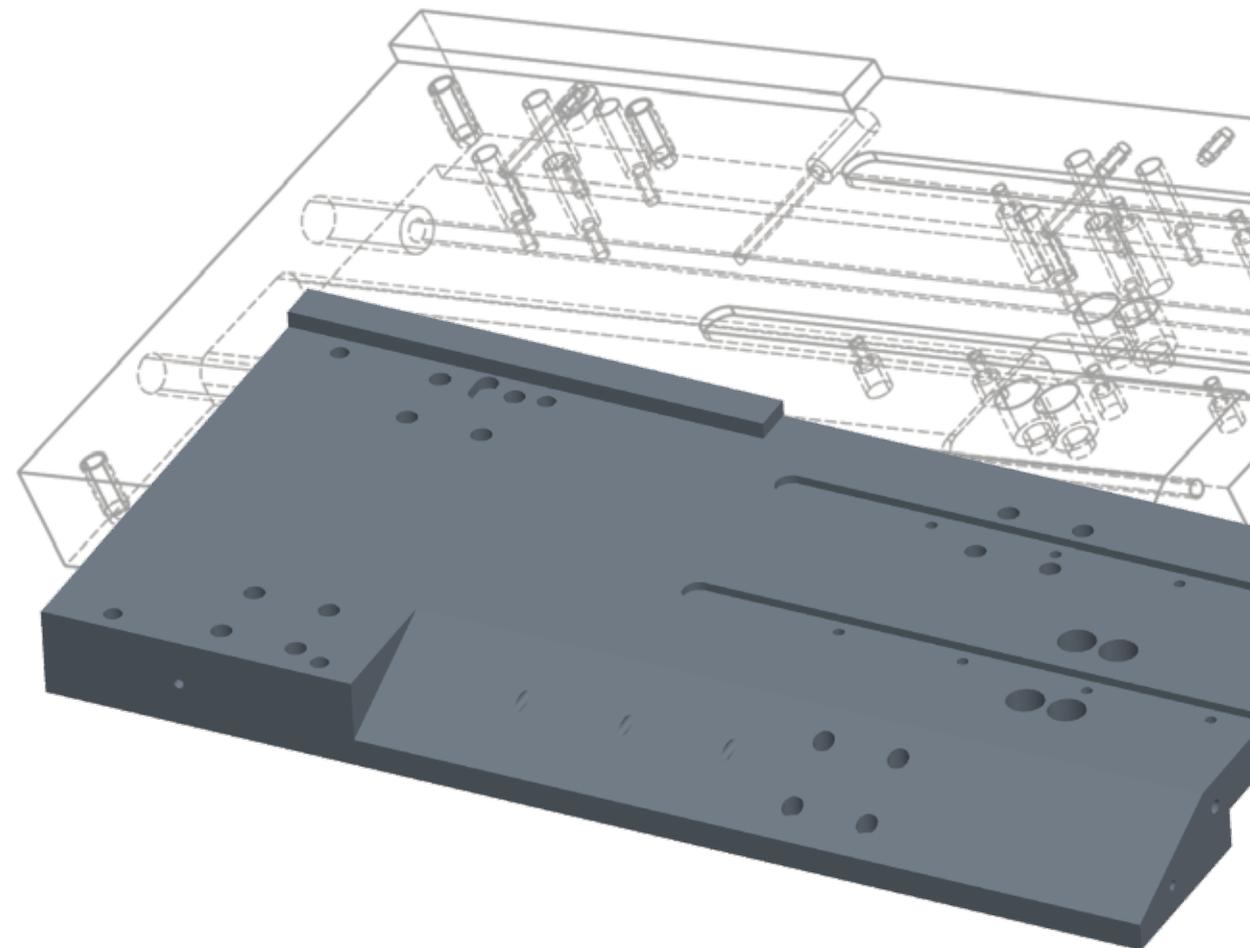

THE POWER OF KNOWLEDGE...

Our power lies behind our diversification.

Knowledge is our strength. The CERJAK Company ensures its' customers, according to their requirements, a **whole portfolio of technological solutions**. Each order, no matter how small or how technically exacting, receives equal treatment, that is to precisely identify its' main technological requirements resulting in overcoming the technological challenges and choosing appropriate development trends. Separate key technological phases incorporate components of surveillance.

You may be assured of the **quality** of our products, goods and our **timely solutions**. Our experts develop tailored solutions each time, **no matter how demanding our customers' requirements are**. We are proud of our own production which is distinguished by high accuracy and being 100 % adapted to the processes requirement.

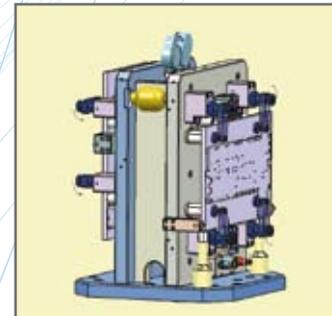

...and **ADVANCED TECHNOLOGIES.**

Experience + advanced technologies + current developments = the best solution options.

Technical know-how, based on wide experience, continuous research, testing new technologies and relying on the most modern information technology platform, are the key features making the best solutions possible.

The use of the world's best state-of-the-art information technology and modern NC processing centres are therefore essential in construction, programming and design.

We put a lot of time, energy and resources into the development and implementation of new technological solutions and processes.

Our innovations are certified by our customers.

NAŠE PREDNOSTI.

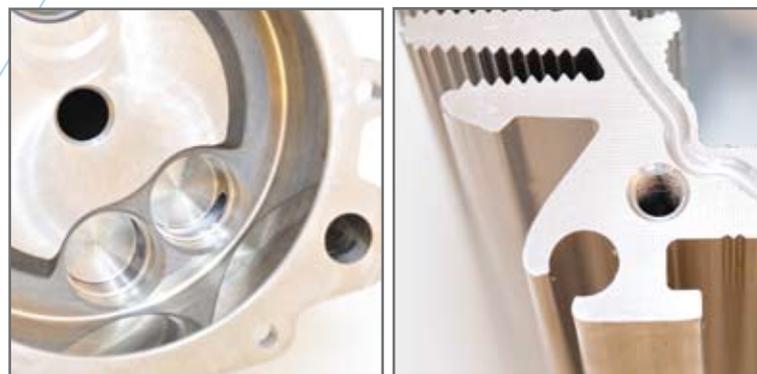

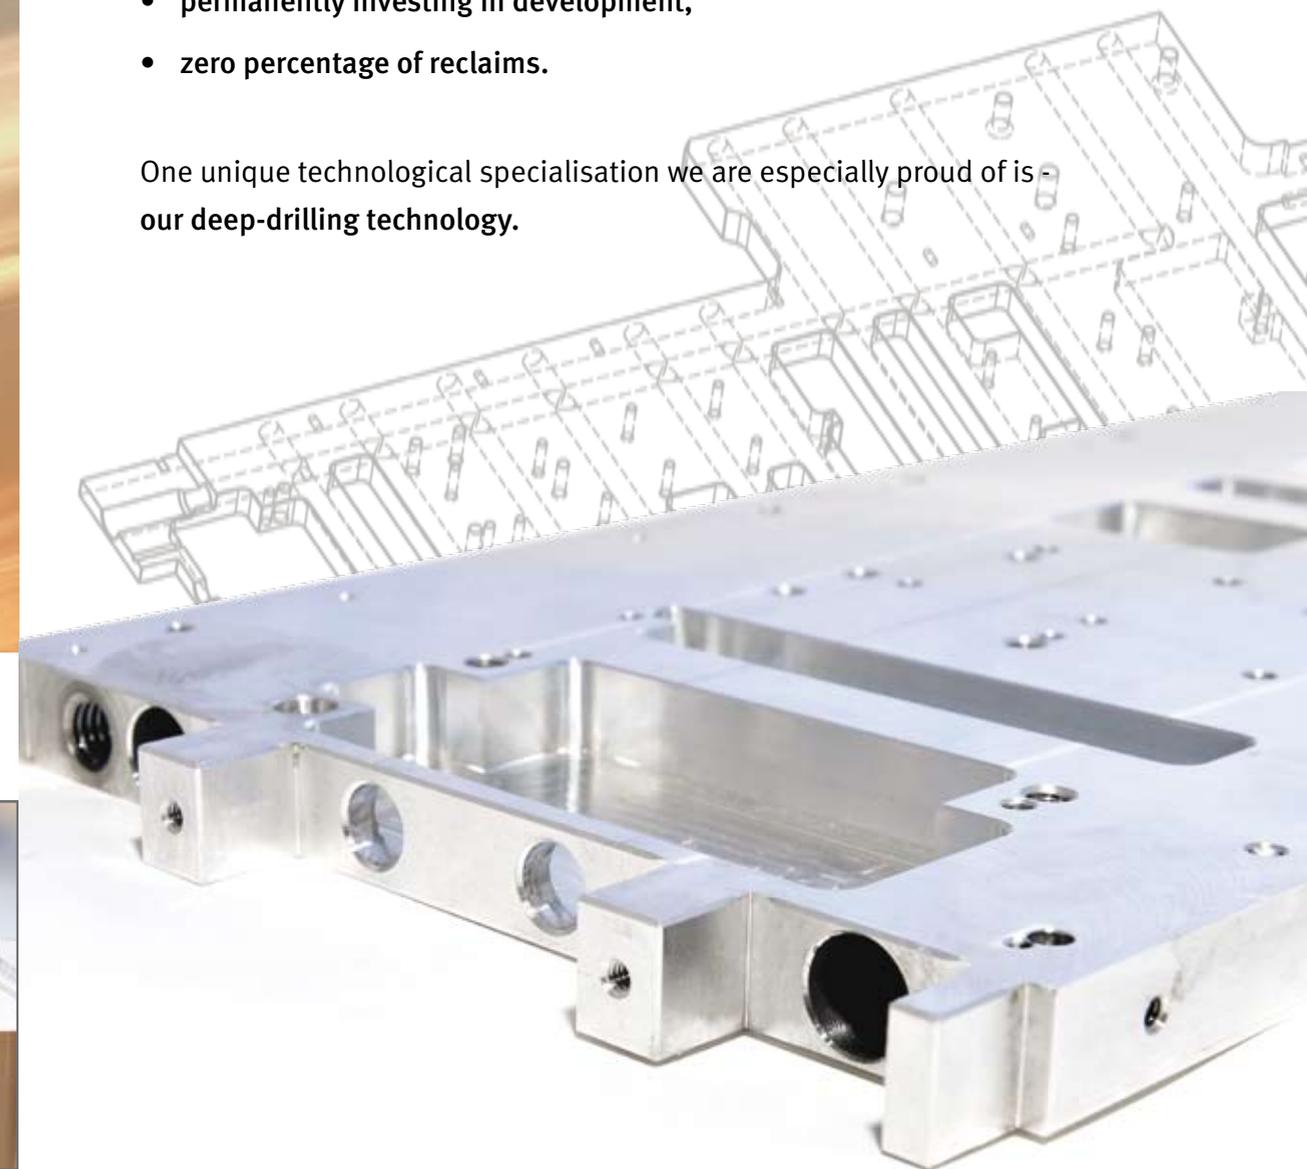

We add the wings and the dreams to your imagination.

Among our many attributes enabling us to accept these demanding challenges are:

- **flexibility** – we adapt to demands in order to fulfil expectations,
- **own development**, production and making highly accurate binder appliances,
- **excellent record in cooperation with educational institutions**,
- **innovation** – providing new solutions according to specific demands,
- **agility** – best solutions implemented as soon as possible,
- **partnership** – only customers matter,
- **use of state-of-the-art technology**, offering you state-of-the-art solution,
- reliable suppliers, adapting both our own and customers' demands to take an active part in searching for optimal solutions,
- **permanently investing in development**,
- **zero percentage of reclaims.**

One unique technological specialisation we are especially proud of is – **our deep-drilling technology.**

OUR EMPLOYEES ARE OUR STRENGTH.

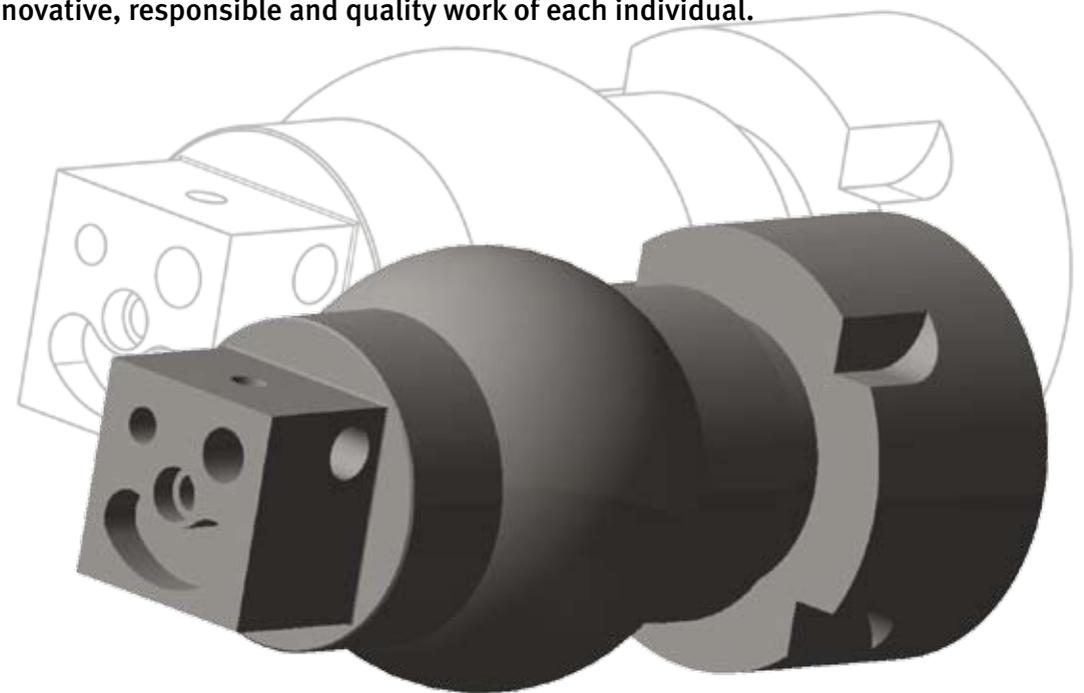

Good ideas are eternal, only they have a future.

Our employees are the core of the company. Therefore our formula for providing the best process solutions and their implementation is based on our expertise, our ability to recognise an individual's strengths and combining those strengths into groups. Above all, the satisfaction of the customer's requirements is something greatly appreciated among our employees.

We create for our employees a working environment that stimulates professional and individual growth. We must have a well skilled and highly motivated work force in order to cope with modern production demands and at the same time maintain our success on the market, whilst continuing our development and trade promotion. We put great efforts into workers' continued training and education, and gaining recognition through qualifications for new knowledge, cooperating with educational institutions and stimulating innovation on different working areas.

We have organized an internal sport club engaged in traditional sports, like the Cerjak cycle touring marathon for example. This club gives employees' the chance to develop their psycho-physical condition and teambuilding skills.

All employees are involved in a constant improvement process in order to ensure our competitive position, our innovation and our adapting to market demands. **State-of-the-art products and services can only be delivered by maintaining the innovative, responsible and quality work of each individual.**

VALUES

Quick tempo, process modifications and meeting customer needs require “continuous adaptation”.

The customer is the basis of our values; of key significance is maintaining a loyal and satisfied customer relationship. Therefore we offer what customer appreciates most, **efficiency, accuracy, agility, adaptability and flexibility.**

We also participate in **social schemes.** We support young people in the local environment, alongside other community interests and of course our employees.

INVESTMENTS

The world isn't being driven by locomotives, its being driven by ideas.

We are aware of the importance of investment in knowledge & research, and the development of new technology.

Investing in the company's critical business areas results in numerous innovations, employees and customer satisfaction. Customers represent our long-term investment; therefore we put all our efforts into long-term bilateral partnerships between ourselves and our customers.

QUALITY is the only way.

The best for the best.

Together with our employees, our company performs total quality management through all spheres of its activity. Our quality strategy is our main objective; therefore we share responsibility with our customers, partners and society.

We have been awarded **ISO 9001:2000 quality certificate** that proves our commitment to perfection. We enable our customers to include their demands and requests into our products and services. In order to achieve this, we encourage education for employees, cooperate with educational institutions and seek out market developments. The result is top-level quality with a minimum influence on the environment.

CUSTOMERS ARE HIGHLY SATISFIED.

NOTES FOR THE FUTURE.

All our efforts are directed to the same goal, to deliver as soon as possible.

Each customer matters, our basic principle is customer satisfaction.

Our innovations are highly appreciated by our customers. The quality of our products and services is proven by our record of zero percentage of reclaims. This stimulates us to perform even better.

We do our best to serve our customers; we listen to their needs and seek together the best possible solution. Partnership and communication play the main role.

The future belongs to those who believe their dreams!

Something that was done in the past may not be valid for the future. Therefore throughout the total process that management plays the main role is achieving success on the market. We are looking forward towards the future with great joy and optimism, anticipating the challenge.

We shall continue with new process developments, new technologies, upgrading the CAD-CAM systems, improvements in information technology and improvements in some small processes. Our guidance in the future will remain customer satisfaction, product quality and the potential of human resources.

WHO WE ARE AND HOW TO REACH US.

Even a journey of a thousand miles
begins with one small step. Together we can achieve more.

Any questions?

Need new expertise?

Please do not hesitate to call us and together we will find new solutions.
