INVESTMENT
AND GROWTH

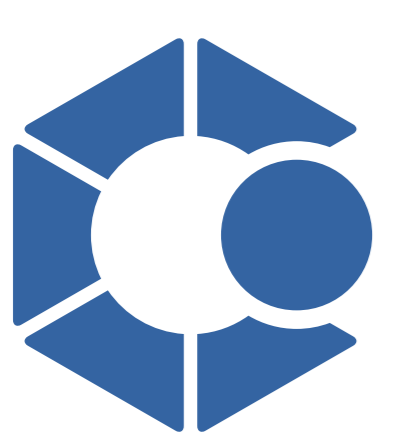

SINCE
1978

WE DO OUR JOB WITH PASSION

Established in the heart of the great tradition of Modena precision mechanical engineering since 1978, we specialize in the production of mechanical and hydraulic components to Customer projects, and have become a partner of leading world manufacturers of machines and apparatus based on fluid and hydraulic technology.

The mechanical grinding, the activity that gave us a name as a serious and reliable company, which allowed us to grow and strengthen our supply relationships with small and large, national and international customers.
