

**Laser cutting  
Water cutting**

**Welding constructions  
Machining**

**Painting  
Assembling**

## EXAMPLES OF PRODUCTS:

- Tanks, silos, chests;
- Bridge and building constructions;
- Fan housings, air transmission installations;
- Machine constructions;
- Foot-paces, ladders, stairs;
- Assembly.

## EXAMPLES OF OUR TECHNOLOGICAL ABILITIES

### Cutting

- laser cutting, the maximum size 6500 x 2500 mm;
- waterjet cutting, the maximum size 12.000 x 2500 mm;
- oxygen and plasma cutting, the maximum size 12000 x 4000 mm.

### Welding

- full range of welded constructions accomplished with EN and ASME technologies;
- welding of carbon steel, heat resisting steel and acid resistant steel;
- blast cleaning of metallurgical elements and construction making;
- vibration stress relieving and annealing of welded constructions.

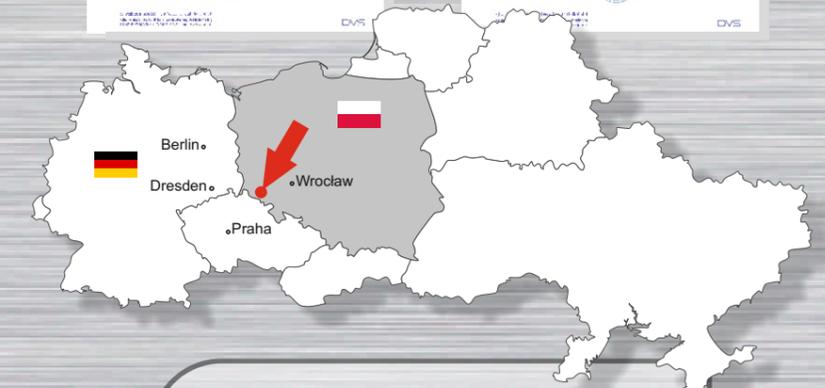

### Machining

- milling, drilling, boring, accuracy to 0,05mm;
- maximum dimensions of machined elements: 6,000mm x 2,000mm x 2,000mm;
- maximum weight: 24 tons.

*We produce single elements of dimensions  
15.000 x 5.000 x 3.200 mm, weight to 50 tons.*

We specialize in production of complex steel and machine constructions. In this field we supply the paper industry, power engineering, machine building, shipbuilding, building industry, mining, and railway engineering. We execute our orders basing on the customers technical documentation. We guarantee a complex service including all technological process. Our advantages are: quality, short terms and competitive delivery prices. We kindly invite to cooperation.

### Our Certificates
