

Linearis

The company LINEARIS is working since 1992 as a subcontractor for machinery contract manufacturing.

We are engaged in production and treatment of wide spectrum of components according to requirements of the customer.

Our factories placed in Slovakia in Trencin and Dubnica nad Vahom are modern equipped and have a very high assembly potential. We are also concerned with the individual part and small series production, with production of precise machine parts, devices and parts for the automotive industry and also with manufacturing of complete machines including assembly.

The production runs on modern CNC machines and processing centers.

Our factories are certified according to ISO 9001 and our main customers are from Switzerland, Germany, Austria, Belgium, Netherland and Italy.

Please visit also our web page www.linearis.sk to get more information.

Our production possibilities and processing dimensions:

Axis	X	Y	Z	reachable planarity in mm	reachable parallelity in mm
Turning in mm up to	ø 760	2.500		0,05	0,05
Milling in mm up to	6.000	1.300	2.000	0,05	0,05
Flat grinding in mm up to	4.000	1.000		0,01	0,01
Round grinding in mm up to	ø 600	1.000		0,01	0,01
Welding in mm up to	10.000	2.500	2.500		
Heat treatments	annealing, hardening, cementation				
Surface treatments	browning, nitrating, chromating, galvanizing, electro galvanizing, hot galvanizing, metalizing, coating, sand blasting, priming and lacquering

LONG TRADITION IN ENGINEERING

Linearis s.r.o. (Ltd) is an engineering company with a 23-year history. Its plants are located in Trencin and Dubnica nad Vahom, all with a rich tradition in production for the engineering industry.

Slovakia became industrialised mostly in the second half of the 20th century and nowadays, building on a long-standing tradition and a highly skilled labour force, the industries within the country that hold the most potential for growth are: Automotive, Electronics, Mechanical Engineering, Chemical Engineering and Information Technology. The automotive sector is the largest export-oriented sector in the country (including Volkswagen, Peugeot and Kia Motors).

Slovakia has been an EU member state since 2004 and adopted the euro currency at the beginning of 2009.

The main scope of Linearis's activities today are mechanical engineering production, construction, cutting operations, lock production and assembly. Its overriding focus is on the quality of the goods it produces, which has enabled it to build a strong reputation on both a European and global level. Exports today account for more than 95 per cent of production, with the biggest markets being Germany, Switzerland, the Netherlands, Belgium, Austria, the Czech Republic and France.

Each of the company's plants is dedicated to the continuous education of its employees, cooperation with universities and high schools, investments in high performance machines and measuring equipment, and complete project services.

Its references include:

- Railway industry – production of spare parts for locomotives
- Printing machines and accessories
- Pneumatic fastening technology
- Automatic rack systems and lifters
- Production of pressing, bending, cutting and clamping tools
- Production of mechanical parts for electro-motors and of gear boxes
- Packaging machine and wrapping line manufacturing and smaller assemblies production
- Rubber industry machine manufacturing
- Sanding industry (wood grinding machines)

At the same time, the company offers a complete turnkey service, within which it can provide heat treatment, surface treatment and so on.

Based on our experience, education and investments, we are able to offer competitive services and prices. We are looking for new customers in order to grow our production still further.
