

**inox-bramar**

The background features a complex geometric pattern. It consists of overlapping triangles in various shades of teal and blue, creating a sense of depth and movement. Overlaid on this pattern are numerous thin, white, curved lines that intersect to form a web-like structure, suggesting a network or a dynamic system.

## Who are we

The company Inox – Bramar Ltd. is one of the pioneers in the production of stainless steel constructions for architecture and marine in Croatia, with an experience of 28 years.

For years, the industry has valued us as a competent partner in the areas of manufacturing of components for marine industry and architecture applications.

These long-term partnerships do not only rely on absolute precision and perfection in technical implementation - the basis of trust, that our customers place in us is almost equally important to us.

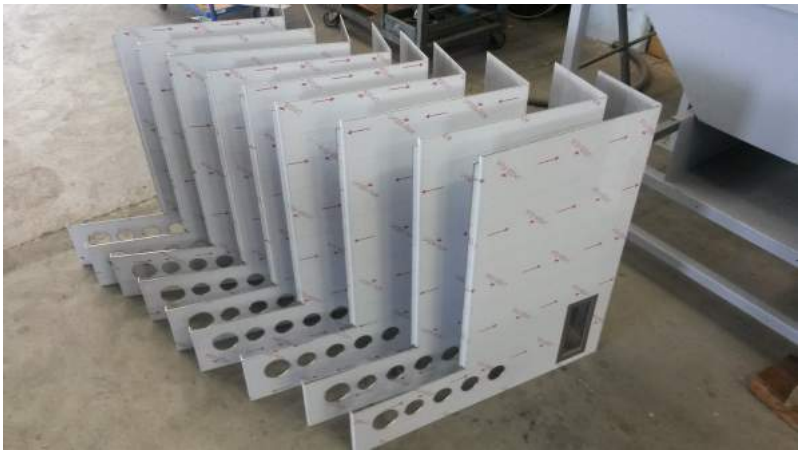

In order to ensure maximum throughput of a wide range of products with high flexibility and reliability in production, Inox Bramar invests permanently in the organisational capabilities and the professional and methodical skills of its employees as well in as future-oriented manufacturing equipment.

The result is an efficient factory with a floor area of approx. 1,500 square metres and a permanent staff of about 15 employees, who can meet even the highest requirements.

Our main branch is design and production of stainless steel constructions for buildings, interior design and maritime applications and laser cutting service with 4kW fiber laser.

In production processes, latest computer based CNC technologies are combined with the latest finishing technologies to reach the expected quality.

Composing laser cutted metal parts and other special welding and polishing technologies to assure desired quality for our clients.

## Single Project

Inox Bramar is flexible to every demand from our customers with very short response time for changes in details.

If it is big shops project like Uniqlo in Oxford street, London or small project like DIY store in Šibenik, Croatia our approach is the same, customer contentment.

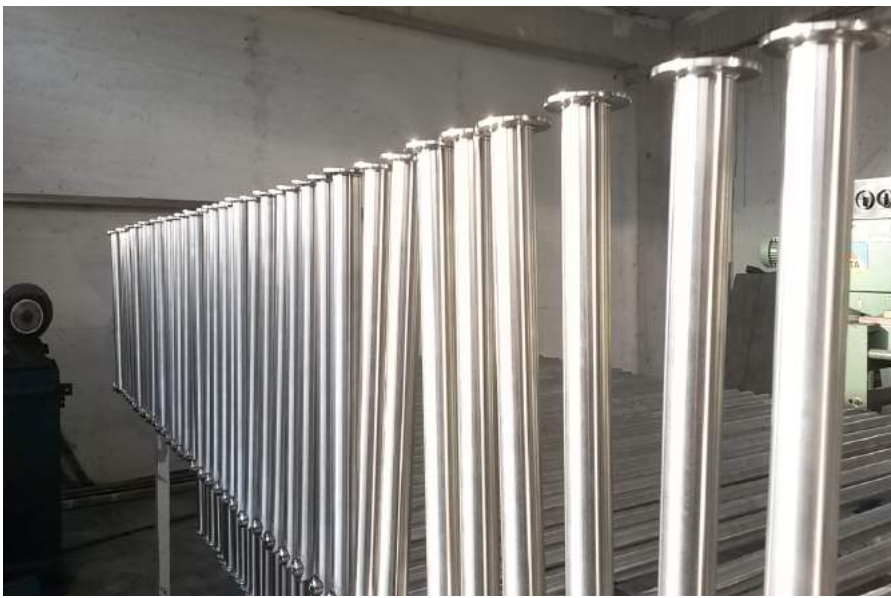

We can combine stainless steel with plywood, hardwood and glass section with our business partners.

Our area of expertise include stainless steel furnishing of shops (food and non-food), apartments, villas, hotels, marinas, boats, yachts...

## Bulk orders

The majority of our ranges are designed and manufactured for specific clients and small quantities.

But with constant investment in technologies and worker education we are able to produce large quantities of stainless steel products with very affordable price.

Our new CNC machine production is capable to meet the requirements of those clients who have need for large bulk orders.

Technology park is equipped with:

- Latest CNC fiber laser 4kW
- NC press brake 3000mm/160tons
- CNC tube punching machine
- And project office with latest CAD/CAM software AutoCAD, SolidWorks, Lantek Expert...
