

Why choose Torneria Due C

A reliable partner for precision mechanics: experience, innovation, and quality at the service of your company.

Torneria Due C is an Italian company specialized in the production of precision turned parts and in the manufacture of high-precision mechanical components. Founded in 1977, it has over 45 years of experience and has built its growth by continuously investing in innovative technologies, advanced production processes, and quality control. Today, it is a trusted partner for companies operating in numerous industrial sectors, offering reliable, precise, and customized solutions.

The advantages of choosing Torneria Due C

Production experience and expertise with nearly fifty years of activity, the company offers technical know-how in precision machining even thanks to the modern machine park consisting of:

- single-spindle CNC lathes.
- multi-spindle lathes.
- sliding headstock lathes.
- latest-generation multitasking machines.

This wide range of technologies makes it possible to optimize time, cost and quality ensuring the most suitable solution for every mechanical component.

Flexibility and speed of development

From prototype production to mass production, Torneria Due C supports the customer at every stage of the project. The ability to develop special tools in-house and quickly manage any changes helps reduce development times, costs, and delivery times.

Cutting-edge technology

Continuous investment in the machine park ensures high standards of precision, productivity, and competitiveness, guaranteeing reliable machining even for complex and high-performance components.

Certified quality and rigorous controls

Quality is one of the company's core values. The quality management system is certified according to **ISO 9001:2015** and supported by an internal equipped with modern measuring instruments. Upon request, the company can provide specific technical documents, including

- PPAP
- IMDS
- MSA

- Material certification

and other specific certifications requested by the customer.

Each batch undergoes dimensional and quality checks throughout all production stages carried out by qualified personnel, with in-process and final inspections, optical sorting systems, and dedicated procedures to ensure, where required, zero-defect standards for critical characteristics.

Wide range of materials and application sectors

Torneria Due C manufactures mechanical parts using a broad range of raw materials, including

- steels,
- stainless steels,
- brass,
- copper,
- titanium,
- aluminium,
- technical plastics.

This versatility makes it possible to meet the needs of several industrial sectors:

- Hydraulic,
- Medical,
- Dental,
- Gas,
- Agriculture
- Industrial automation,
- Automotive.

Customer-oriented approach

The company's focus is to build strong and long-lasting partnerships by offering technical support, on-time deliveries, and solutions designed to optimize quality, costs, and production processes.

Why choose Torneria Due C

Choosing Torneria Due C means relying on a partner that combines **experience, technological innovation, certified quality**, and **production flexibility**.

Thanks to its ability to support each project **from prototyping to mass production**, the company guarantees **high-precision mechanical components, consistent reliability**, and a service focused on **customer needs**, contributing to the success of projects destined for both national and international markets.
