

CYTEC

Thermoformage forte épaisseur / Thick-gauge thermoforming
Rotomoulage / Rotational moulding
Extrusion de plaques / Sheet extrusion
Usinage de plaques / Sheet machining
Transformation des matières plastiques / Processing of plastic materials

CYTEC, le sens du partenariat

Créée en 1998, CYTEC a connu un développement rapide dans le domaine de la transformation des matières plastiques grâce au professionnalisme d'une équipe investie. Attentifs aux évolutions technologiques, nous adaptons nos procédés de fabrication pour satisfaire les demandes les plus pointues dans les domaines automobile, médical, militaire, ferroviaire...

Dans un esprit de progression constante, des équipes d'ingénieurs et de techniciens qualifiés œuvrent ensemble autour de concepts toujours plus innovants. En cultivant notre passion pour la performance, nous avons aujourd'hui acquis une renommée européenne et sommes présents parmi les leaders dans le secteur de la pièce technique en matière plastique.

CYTEC - the sense of partnership

Founded in 1998, CYTEC has developed rapidly in the plastics processing industry thanks to the professionalism of its committed team.

We closely monitor technological developments, adapting our manufacturing processes to meet the most demanding requirements of the automotive, medical, military and rail industries.

Our skilled engineers and technicians work together in the spirit of continuous improvement to develop innovative new concepts. Through our passion for performance we've attained an excellent reputation in Europe, today being considered among the leaders in the plastic technical components sector.

CYTEC, une mise en œuvre maîtrisée

Nos équipes qualifiées interviennent sur la base d'un cahier des charges précis en respectant un programme de fabrication rigoureux.

- réalisation d'une étude préalable.
- élaboration d'une maquette.
- fabrication de prototype
- présentation des premiers de série

Des logiciels performants assurent une évaluation optimisée des contraintes techniques et économiques exigées par nos clients.

CYTEC - a mastered implementation

Our skilled teams work with your specifications and a rigorous production routine:

- preliminary assessment
- model development
- prototype production
- first production series

Powerful softwares ensure optimal evaluation of the client's technical and economic requirements.

Secteur moule et maquette

Nous réalisons en interne nos maquettes, prototypes et outillages pour une meilleure maîtrise de la qualité et des délais.

Mould and model department

Our models, prototypes and tooling equipment are made in-house, for better control of quality and lead time.

La complémentarité de nos process vous garantira une solution optimisée.

Our process synergy ensures optimised solutions.

Thermoformage

- Jusqu'à 1700 x 2700 mm
- ABS, HDPE, PP, PET, PMMA
- Épaisseur de 1 à 10 mm

Thermoforming

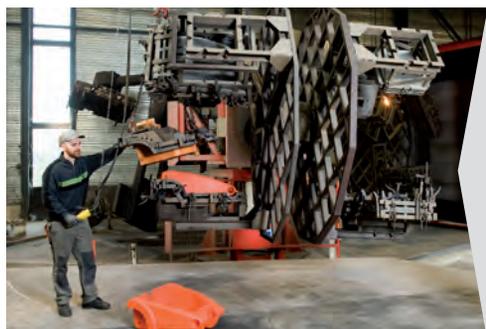

- Max. size 1,700 x 2,700 mm
- ABS, HDPE, PP, PET or PMMA
- Thickness from 1 to 10 mm

Extrusion

- Largeur 1500 mm
- Longueur 4000 mm
- Épaisseur de 1 à 10 mm
- Matières : ABS, PE

Extrusion

- Width 1,500 mm
- Length 4,000 mm
- Thickness from 1 to 10 mm
- Materials: ABS, PE

Rotomoulage

- Jusqu'à 3,5 m de diamètre sphérique
- PE, PP, PLA,...

Rotational moulding

- Max. size 3,5 m spherical diameter
- PE, PP, PLA,...

Usinage 5 axes

- Jusqu'à 1700 x 3000 mm

5-axis machining

- Max. size 1,700 x 3000 mm

Montage

- Assemblages, aménagements
- Contrôles d'étanchéité
- Soudure US, fil

Building

- Assembly, fittings
- Leak testing
- Ultrasonic or wire welding

Nous donnons forme aux besoins de nos clients

Giving form to client requirements

Returnable Packaging

We give shape to your ideas!

Cytec, the Specialist since 20 years for Thermoformed and Rotomoulded Pieces.

With our up to date technology and motivated teams, we are your partner for R/D and production of returnable packaging.
