

Our company, **Meccanica Marcato**, was born in 1996 and is specialized in **precision mechanical workings**. We operate in Camposampiero (PD) in a production site of 1200 m², in which 20 people, considering operators, technical and administrative staff, work.

Over the years, we have been able to **reach high standards of processing** that have led us to work for **internationally** renowned companies in the various sectors listed below.

Our production department is equipped with 18 high-tech machines, all with CNC machining centers up to 6 controlled axes and milling / turning centers up to 11 controlled axes.

In March 2019 a NEW **Mazak Variaxis i500 simultaneous 5-axis machining center** was installed in our company.

- **Integrated production-management and quality-control system Tesar SICOP and MOTIS: all machines are networked to 2 control terminals inside the industrial premises. Firstly, they control the production, by carrying out its daily analysis, pointing out any machine pause, etc. Secondly, they check the quality by means of control instruments in serial connection, micrometers, calibres, altimeter comparators as well as data analysis, X-R control cards capability, certificates of compliance, etc.**

We meet the requirements of the **industry 4.0**

This particular kind of manufacturing made us acquire high professionalism for complex working on materials such as: **AISI 316L, TITANIUM**, several alloy steel sorts (39NiCrMo3, 18NiCrMo5, 41CrAlMo7) and aluminium alloys (**2011, 6082, 7075, ERGALL**) besides normal steel, i.e. the so called automatic steel (AVP PR 80 AVZ).

QUALITY

We are equipped with a metrology room, used in testing and provided with measuring machines and instruments such as: calibres, micrometers, alesameters, several smooth and threaded swabs, a SYLVAC altimeter, OGP projector profiles, a **SMART SCOPE OGP 3D optical measuring machine** and a **DEA GLOBAL PERFORMANCE three-dimensional continuous scanning measuring machine**.

Our **quality system** is **certified** according to **UNI ISO 9001: 2015**.

In collaboration with our partners, we are able to supply products with thermal, galvanic, welding and small assemblies.

We have a NEW **industrial vertical storage system by Hänel** which help us to manage and organize the space and order of the company in a better way.

OUR OBJECTIVES

Our main goal is **to meet the customer's needs**.

For this reason, we offer our customers **full service**: starting from an idea or a design, we study the feasibility, create prototypes, and finally start the production of the item in series.

Customer will find:

- **Competence**
- **Reliability**
- **Accuracy and Quality of Workings**
- **Punctuality in deliveries**
- **Technical support**
- **Clarity and completeness of administrative and technical documentation**
- **Ability to cope with customer emergencies**

OPERATING SECTORS

Over 20 years of experience we have developed expertise in several areas by offering quality services and processes recognized by our customers.

Here are some of the key areas in which we work:

- **Bicycle sector**
- **Motorcycle sector**
- **Automotive sector**
- **Fashion, watch, and luxury sectors**
- **Furniture sector**
- **Medical sector**
