Who are we?

Laser Style is a company with 15 years of experience in sheet metal processing and metalworking.

The company is a manufacturer of metal products, solariums with own brand ActiveSUN[®], fire and metal doors, stands shelving shops and advertising, furniture stores, metal cabinets and wardrobes.

Our clients are companies of metal products, advertising agencies, shops in some of the largest shopping centers in the country, construction companies, solar studios, residential complexes and others. The company has customers and partners in the European Union countries - France, England, Greece, Nederland, Belgium and others.

We can offer our clients quality products, the company has its own production facilities. We have a complete set of equipment and machines for processing of different materials.

Our goals are:

- ✓ To offer optimal products and solutions
- ✓ To develop and realize your ideas in a stylish and unique way.
- ✓ Contribute to increasing your success.

Sheet metal processing

Laser style has a complete set of equipment and machines for processing of different materials that allow a full production cycle. Our equipment is technological processing capabilities of these thicknesses and materials:

Laser Cutting Units: **TRUMPF - TruMatic 5030** - Laser power 5 kW, Work space 3000x1500 mm

TRUMPF - TruMatic 5030 - Laser power 5 kW, Work space 3000x1500 mm

Max. thickness of the metal sheet:

- ✓ Black Steel – up to 25 mm
- ✓ Stainless Steel – up to 20 mm
- ✓ Aluminium – up to 15 mm

Sheet – Bending Press

- ✓ Tensile strength – up to 65 t
- ✓ Maximum length of the material – up to 2.5 m

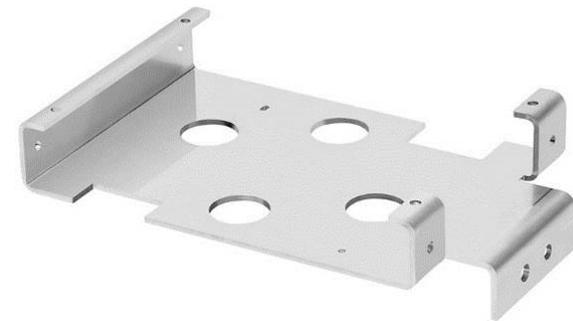

CNC Guillotine

- ✓ Maximum thickness of processed sheet – up to 6 mm

Welding station

- ✓ CO₂ welding wire feeders
- ✓ Welding in a protected argon environment
- ✓ Point welding

Power and Polymer Painting - Full RAL color palette

Technical capacity for main manufacturing processes

Laser Cutting	
Black Steel – up to 25 mm	In-house processes
Stainless Steel - up to 20 mm	In-house processes
Aluminium – up to 15 mm	In-house processes
Bending - up to 65 t	In-house processes
Punching - up to 3 mm	Outsourced
Deburring - by hand	In-house processes
Self clinch fastening	In-house processes
Stud welding	In-house processes
Spot welding	In-house processes
Welding	
Black Steel	In-house processes
Stainless Steel	In-house processes
Aluminium	In-house processes
Light steel construction	In-house processes

Surface treatment	
Galvanizing	Outsourced
Hot-dip galvanizing	Outsourced
Nickel-plating	Outsourced
Painting	
Dip-priming	In-house processes
Powder coating	In-house processes
Wet painting	In-house processes
Labeling of parts	
Printing	Outsourced
Engraving	Outsourced
Printing labels	Outsourced
Assembly of components	In-house processes
Technical development	In-house processes
Engineering and design	In-house processes
Packing	In-house processes
