

Our geographical position allows us so many benefits in production, storage and distributing.

We own 1000 m² warehouse and five machines. They occupy 300m² and 300m² of office space. As far as production is concerned we could expand the production facility or use the rest of the space for warehouse purposes.

We were considering the possibilities of production for foreign markets with the help of partners and achieve common interest.

We think we have good proposal so there is one more reason to contact us please feel free.
