

Rubber Products

Manufacturing by Moulding and Insert Moulding
of Technical Rubber Items

Shaping the future. Together.

Who we are

imateg93 Srl is a rubber moulding Company established in 1993 in Robassomero, in the Province of Torino, Northern Italy.

We strive for constant quality improvement, to always deliver the best products to our Customers. We constantly develop leading-edge technologies, driven by a spirit of continuous innovation.

We have solid, stable finances, supporting robust R&D and sustainable growth.

What we do

We manufacture technical rubber products for all industries, from Automotive to Household Appliances

For hundreds of satisfied Customers Worldwide.

Why choose Imateg

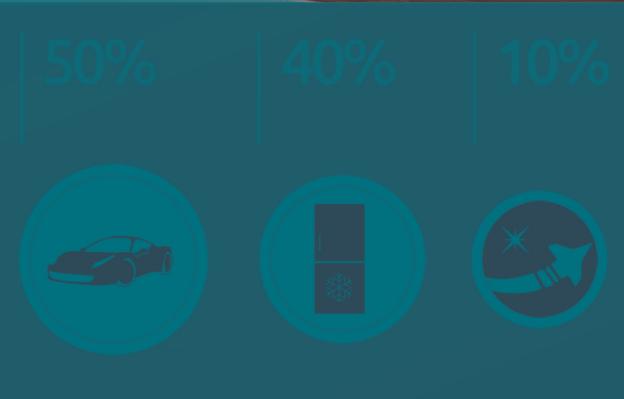

Because you demand **excellency**, and you deserve a **partner you can rely upon.**

100% of the time.

Expect more.

Imateg93 is uniquely positioned to meet all of your specific rubber requirements.

We continue to work tirelessly to manufacture products that consistently exceed your expectations and we develop initiatives to remain at the forefront of rubber technology and support your business as you compete in an ever-evolving global economy.

Professionalism & Care

Our experience and know-how are the starting point for the building of moulding tools. The realization of perfect moulds are the basis for the production of high quality items at contained costs. We assist you with the design of your rubber products in order to optimize them for their specific usage, we take care of mould design and realization, therefore manufacturing products that are 100% controlled in our laboratories and always compliant to your specific requirements.

We are OEM (Original Equipment Manufacturer) suppliers for the major automotive and household appliances companies, for which we produce grommets, bonnets, gaskets, bellows, muffler supports, plugs, rubber-to-metal and rubber-to-plastic bonded parts, and many other.

Some materials that we use:

NR (Natural Rubber)

SBR (Styrene-Butadiene Rubber)

EPDM (Ethylene Propylene Diene Monomer)

CR (Polychloroprene Rubber, Neoprene)

NBR (Nitrile Butadiene Rubber)

HNBR (Hydrogenated NBR)

EAM (Ethyle Acrylate Rubber / VAMAC®)

FKM (Fluoroelastomer Rubber / VITON®)

and many more...
