## Company presentation

- S.C. RadTech S.R.L is positioned on the profile market for LASER CUTTING in complex contours for sheets and metal confection, which is an advantage because being services dedicated exclusively to customers, execution times are very short.
- Company is located in Arad, Romania, where we have our office and production area.
- Favourable geographical position due to existing transport infrastructure, and location in the west side of the country
- Our company was created on 2021 with buying a new laser cutting machine.

## Activity domain

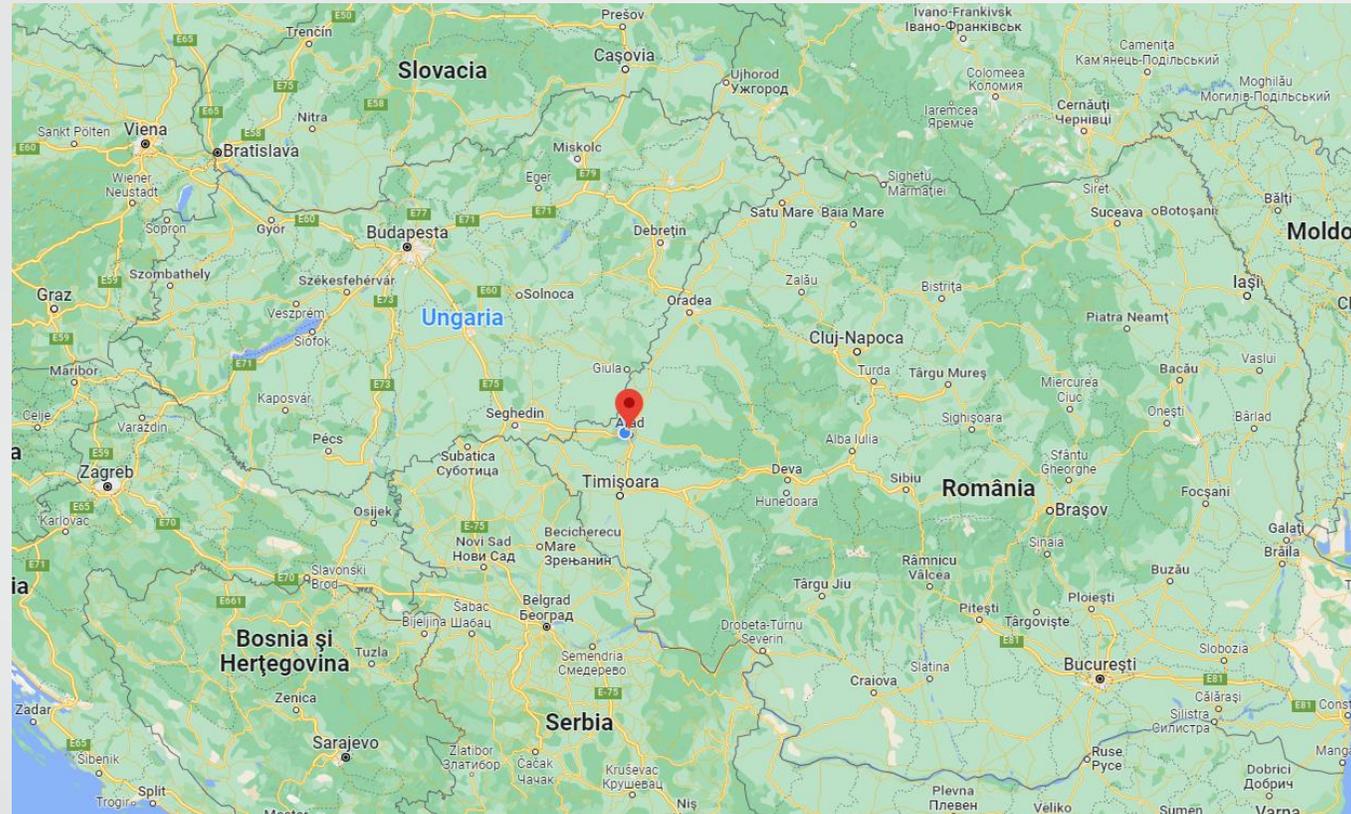

- Equipped with high technology equipment, RadTech offers different cut parts based on customer demand.
- With high precision and accuracy of cutting we can provide our services for all industries.
- We can cut the following materials:
  - Steel up to #16mm
  - Aluminum up to #5mm
  - Stainless Steel up to #6mm
  - Cooper up to #4mm

## Quality

- Our objective is to make a product with a high qualitative level, maintaining this level consistently, meeting the requirements of the customers and all the legal requirements.
