Elevate Your Machined Parts with PrintPack: Your Reliable Partner in Precision, Quality and Timing.

At "Printpack Service" our engineering team has developed unique and innovative ways to get the most out of the CNC machining technology and developed excellent manufacturing skills for metal and plastic parts. With a commitment to excellence and a focus on delivering outstanding results, we take pride in our craftsmanship. Our CNC machines enables us to deliver more complex geometry parts for you. Our mastery of CNC turning techniques helps us achieve precision, faster turnaround times, and more versatile projects.

CNC machines:

- **Doosan LYNX 2100 LSY Turning Center (5 axis)**
Materials: Plastic, Aluminium, Steel, Stainless steel
Max Dimensions: 300 mm (diameter) x 510 mm (length)
Operations: Turning and Milling
- **Mecanumeric Pro 4020 Milling machine (3 axis)**
Materials: Plastic, Aluminium, Composite.
Max Dimensions: 4020 mm x 2000 mm x 150 mm
Operations: Milling
- **Elitron Combo SD+ Milling machine (3 axis)**
Materials: Plastic, Composite.
Max Dimensions: 3100 mm x 2100 mm x 50 mm
Operations: Milling

Quality control:

At our CNC shop, quality is our top priority. We have invested in cutting-edge equipment and maintain rigorous quality control standards to ensure that every part we produce meets the highest standards of precision.

Reliable Timeliness:

At PrintPack we understand the importance of on-time deliveries. You can count on us to meet your deadlines consistently, ensuring your projects progress smoothly and efficiently.

Materials Ready When You Need Them:

Our extensive warehouse is stocked with a wide range of materials, ready to be machined. This means no delays in starting your projects and faster delivery times.
