

# FESP MOLD

THE ITALIAN EXPERIENCE IN MOULD PRODUCTION

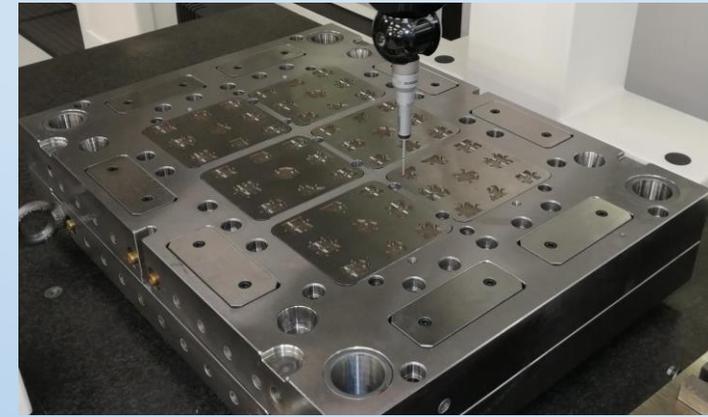

Injection moulds for plastic, rubber and silicone.

Sandrigo, January 2023

FESP MOLD distinguish themselves for the **tecnology** applied on the **internal motion, carts, unscrewing cores and horn pins.**

We create **multy-cavity** injection molds with **hot chamber**, single and multiple **nozzles, closing nozzles and sequential injection.**

We manufacture molds for **vertical rotative** injection machine or **multiple** (bi and tri) injections; with **translative** pieces and **inserts.**

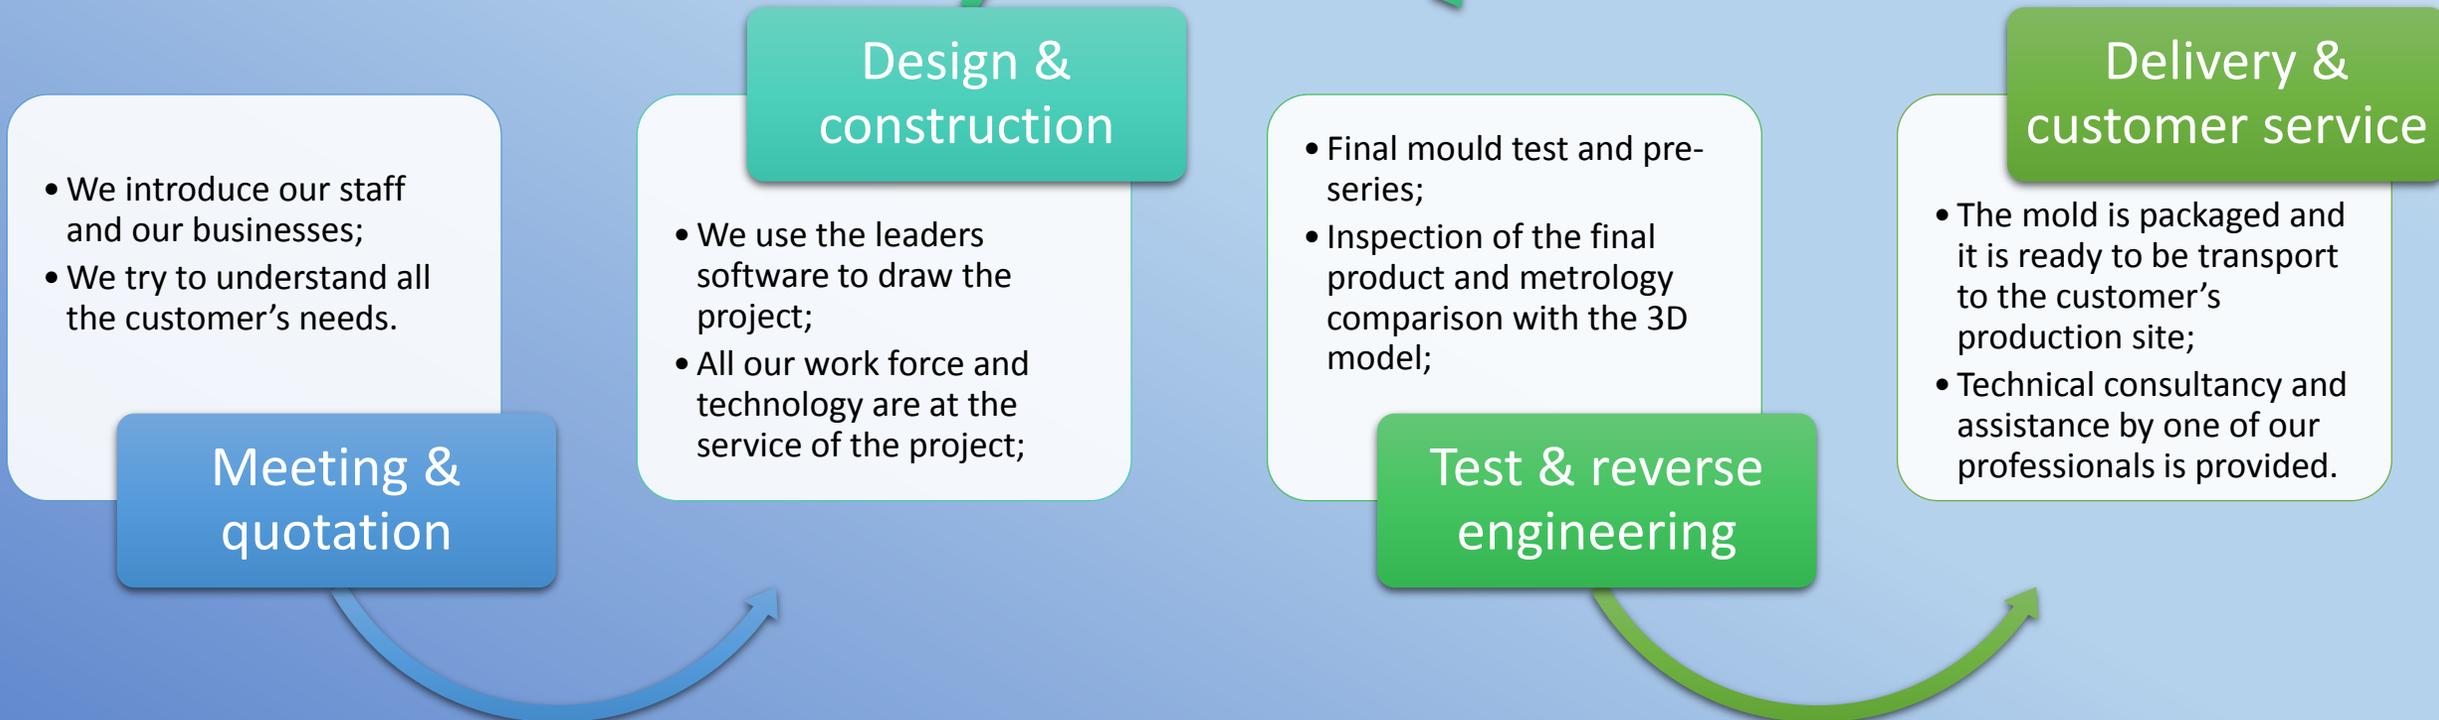

Our production site is equipped with **milling machines** in 5 and 3 axis, **lathes, EDMs** wire cutting and die-sinking, **grinding machines, measuring machine** and a lot more...

# WHAT WE DO

FESP MOLD implements a structured design process where, besides the standard design and construction services, it includes a number of very important additional services: pre-series, maintenance, reverse engineering and micro moulds.

Essential are also the preliminary feasibility services that, thanks to targeted technical interventions, avoid problems during production. Finally it is our care to be there during the test and assist you in the production.

# OUR TECHNOLOGY

- 6 Five-axis milling machines (Mikron and DMG)
- 3 Three-axis milling machines
- 1 EDM Die-sinking
- 1 EDM Wire cutting
- 1 EDM Hole drilling
- 1 Radial drilling machine
- 1 Measuring machine Zeiss

- 3 Grinding machines (tangential, internal and external)
- 3 Lathes
- 1 Mould spotting press
- 2 CAD workspace (Creo)
- 3 CAM workspace (Hypermill)

# HISTORY AND PARTNERSHIP

FESP MOLD was established in 1997 by Chiampesan's brothers.

After gaining a decade of experience in producing moulds, they founded FESP MOLD only to produce moulds only for plastic, rubber and silicone's items.

Our team is composed by 16 technicians who contribute with their personal experience to the production of individual moulds with great precision.

We are intensely aware of the continuous market's evolution and we keep up with it researching and investing in new technologies, updating timely systems and machine tools.

From 2019 FESP MOLD is a founding partner of FOR MOULDS, a local business network that includes some of the best mould manufacturers in northern Italy.
