

Manufacturer of precision
turned and machined
components

Rowes Precision Products has over 12 years of experience working for SMEs and large companies, providing quality bespoke components and exceptional customer service using CNC services.

We manufacture precision turned and machined components, offering a 'sub-contract machining service

The logo for Rowes Precision Products features a large, stylized green letter 'R' on the left. To its right, the word 'rowes.' is written in a lowercase, green, sans-serif font. The letters in 'rowes.' are filled with a green-to-white gradient, giving them a 3D, metallic appearance. The period at the end is a solid green dot.

We support our customers by providing a complete end to end machining solution backed up by plating and heat treatment services, with the capacity to tailor materials in small, medium, and large batch sizes, with all the types of ferrous and non-ferrous materials, including mild steel, stainless, brass, titanium, and plastics.

Why Us?

Control of costs, versatility, delivering times, capacity to scale up production, quick responses, and accuracy of quotes, etc. are key challenges in your selection process and Rows has a solid and tested process to deliver high quality products and services

Rowes.

From prototyping and the initial drawings, right through to production and delivery of precision machined components and complex parts in various materials, our dedicated team of passionate engineers are on hand to help you achieve your desired result

Sectors

Automotive
Aerospace
Oil and Gas Industry
Medical Industry
Marine Industry
Transportation Industry
Military and Defense Industry

Materials:

Steel

Stainless steel

Aluminium

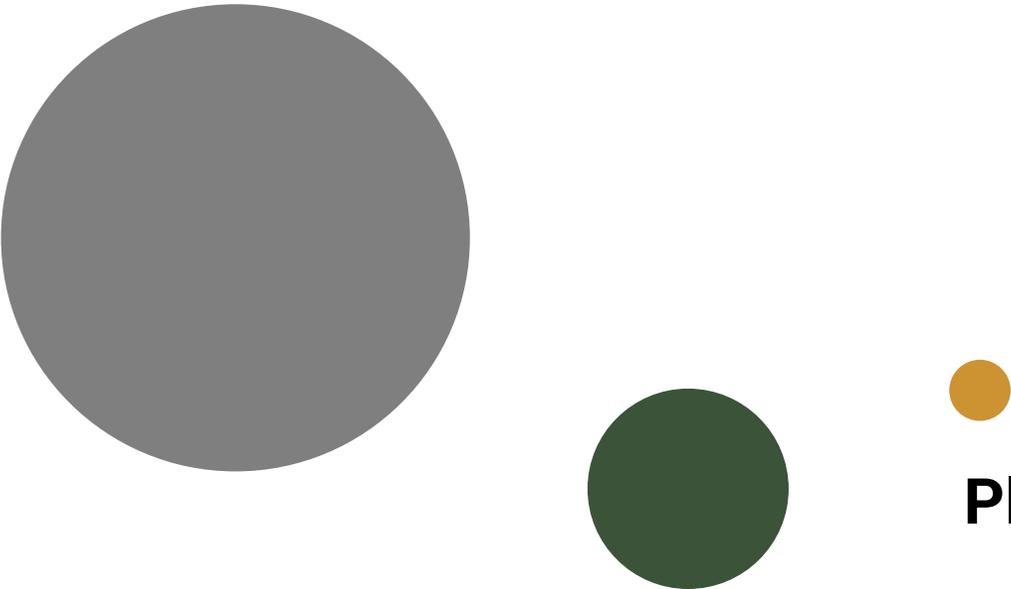

Titanium

Copper alloys, etc

but also engineering plastics such as PE,
POM, PP

Rowles.

Plating Services:

Rowes recognise the crucial process stage to enhance corrosion resistance and for aesthetic improvements, and rely upon the skills and capabilities of its group partner's PLATING TECHNOLOGIES LIMITED (PTL)

PTL has two purpose designed automatic jig processing lines, fully automatic and programmable. Automatic processes include the very latest Zinc Nickel and Zinc Iron coatings; high performance latest Automotive coatings including Trivalent CrVi Free.
