

# DELUQ NUMÈRICS S.L

Machining parts in C.N.C. lathes

Specialist in medium series of parts with multiple operations

DELUQ NUMÈRICS, SL is a machining company established in Torrelles de Llobregat (Barcelona).

We count on 30 lathes, equipped with fix and sliding spindles, with two spindles and 2 turrets equipped with power tools , so we can finish in our lathe complicated pieces, from  $\varnothing$  2 up to 65mm bar diameter. This high technical equipement allow us to produce parts with high standards of quality and competitive prices, in flexible delivery times.

We can machine various materials, steel, stainless steel, aluminium, brass, plastic...  
As we are a experienced company we have colaborators for many extern treatments as plating, heat treatments, anodizing and any request you need.

We have all the measure elements needed for any fabrication.

Following our policy of continuous improvement and excellence in service, in July 2007 we implemented the quality system of our sector, ISO 9001 :2015, certification number EC-8565/16.

Following our continous improvement system, we have recently been accredited with UNE-EN ISO 14001:2015, certified number 1941/20.

**Competitivity , quality and service**
