

DISMANTLING JOINT TYP MV-KPD/DS2

- dismantling joint with axial mounting clearance, applied for installing and removing various types of shut-off and regulating valves,
- stuffing box packing design allows dynamic compensation of axial displacements,
- possibility of customising face to face length and flange connections,
- dismantling joint is intended for operation with air, gas, drinking water, process water, sewage and other media,
- all stainless steel elements undergo etching and passivation by dipping or spraying,
- dismantling joint MV-KPD/DS2 is used in water supply management and waste-water treatment, power generation, mining, chemical, petrochemical, metallurgical, cement and paper industries.

TECHNICAL DATA

Flange drilling:	PN 2,5, PN 6, PN 10, PN 16, PN 25 or others
Nominal diameter:	DN 50 to DN 2400. customised diameters and diameters above DN 2400 made to special orders
Material:	carbon steels, stainless steels, acid resistant steels or others
Corrosion protection:	primer painting, epoxy/bitumen, coating, zinc plating or hot dip galvanization, etching and passivation (stainless and acid resistant steels)
Seal:	Graphite, PTFE or others
Standardized elements:	galvanized, A2, A4

Other versions available on special order

Dismantling joint typ MV-KPD/DS2 Order form

Material*:

1. Carbon steel (S235JR/S355JR or others), with one of available coatings: epoxy/bitumen/galvanized
2. Stainless steel and acid resistant steel (1.4301/1.4541/1.4571 or others)

Standardized elements*:

Galvanized/A2/A4

Seal*:

Graphite/PTFE

Dimensions:

Nominal diameter DN =
Face to face length** L =

* delete as appropriate, other versions available on special order

** only in the case of non-standard variants
