

# JSC "GPP 3D"

Empowering Innovation in 3D Printing

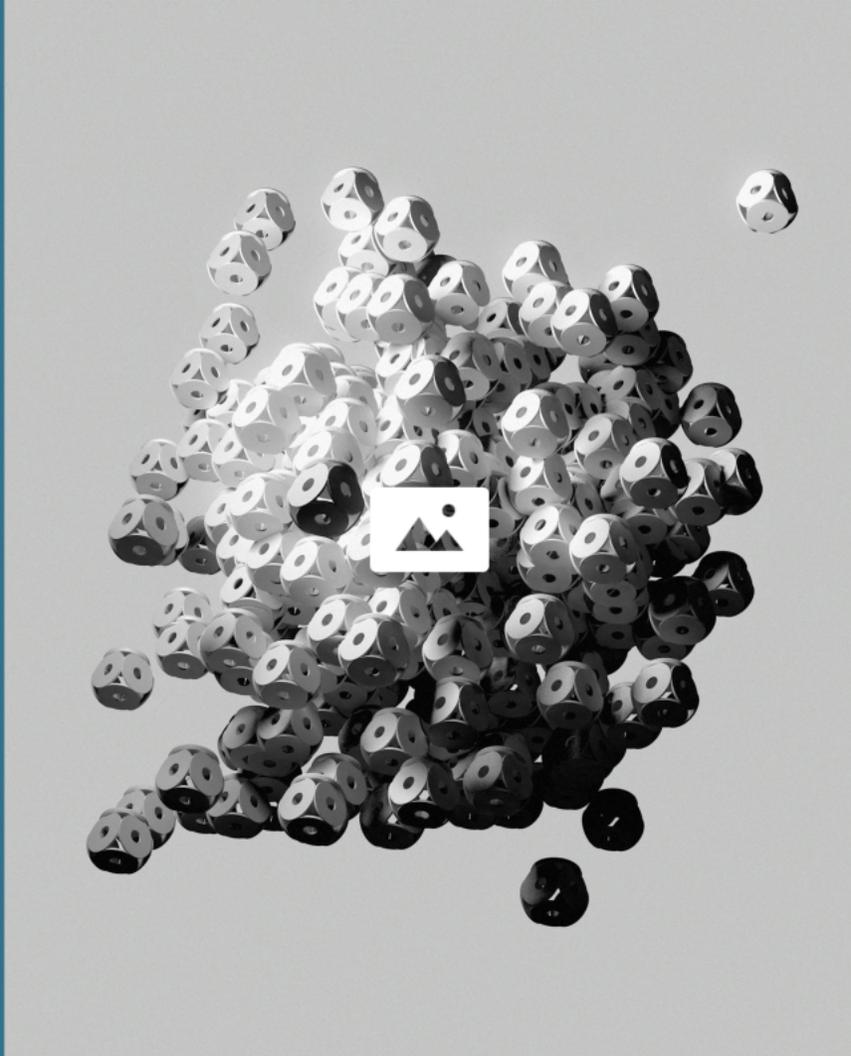

## Who We Are

- We are a pioneering 3D printing company in Latvia, leveraging cutting-edge Markforged 3D printers and materials.
- We are 51% owned by Latvian investors with a huge support by 49% of investors from Sweden.
- We bring together 20+ years of professional and international experience.
- Team of high precision supported by high ambition.

## **What We Do**

We specialize in CFF and FDM printing technologies, providing high-quality, custom 3D printing solutions.

## How We Help

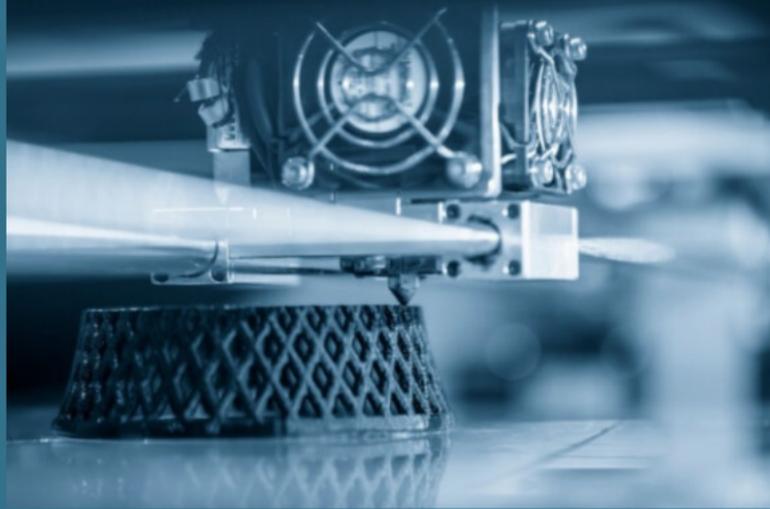

- We enable innovation and rapid prototyping through our advanced 3D printing capabilities, supporting diverse industries.

# Markforged Innovation

- Markforged 3D printers redefine additive manufacturing, offering unparalleled precision and performance.

# To the moon and back!

Our engineer Janis Bartmanis is the first latvian to actually work on the F1 car and manufacturing of it, so the GPP 3D will be the first Latvian company to print parts for anything that goes into the space.

## **Unmatched Quality and Reliability**

- Our commitment to quality and reliability sets us apart, ensuring the delivery of exceptional 3D printing solutions.
