

KEY FACTS

Company	Dudek
Product	Metal processing services, parts
Website	dudek.lt
Established	2012
Export share %	60
Export	Scandinavia, Germany

ABOUT THE COMPANY

Dudek is a Lithuanian company that specializes in CNC metal turning, milling, EDM cutting, gear manufacturing, and metal heat treatment. The company has a team of professionals capable of producing parts with varying complexity while maintaining precision across different industries.

WHY CHOOSE DUDEK?

Satisfied Customer Base

Over 100 satisfied customers, with a 70% repeat business rate

Global Reach

Exporting 60% of products to various international markets

Precision

Offering CNC services with exceptional 0.01mm production accuracy

Efficient Turnaround

Production in as little as 3 weeks, with quick delivery in about 1 week

Experienced Team

Over 10 years of industry experience, with professionals boasting 20+ years in metalworking

Wide product assortment

Production of parts of varying complexity and ensures precision for a variety of industries

REFERENCES

Metal processing services

- **CNC Lathe:** High-speed, accurate parts manufacturing (up to 280mm diameter, 750mm length, +/- 0.01mm turning accuracy).
- **CNC Milling:** High-precision milling (parts up to 500x500x500mm) for faster production.
- **EDM Machining:** High-speed, precise electrical discharge machining for complex parts (up to 1000x1000x700mm).
- **Gears Production:** Single and serial gear manufacturing based on drawings.
- **Heat Treatment:** Hardening, annealing, and normalizing services with a max temp of 1200°C.
- **Precision Product Design:** Custom products and prototypes from specs or samples.
