

T TECHmold

Slovakia

YOUR PARTNER FOR CNC MACHINING

**5-axis machining
prototype and mass production
3 & 4-axis machining**

Techmold

is a small family based company established in 2015 by cousins with many years of experience.

These experience, combined with qualified experts and the latest technologies, enable the production of high-quality and precise components.

5-axis machining

Programming by

hyperMILL®

Machinery

Vertical 5-axis machines

- 2x Hermle C400
- Herme C 42U

Horizontal 5-axis machines

- 3x GROB G350
- GROB G550 with palletization

Mitutoyo- 3D measuring machine

- Measuring machine upgraded by Renishaw
- Measuring protokol for precision components
- Certificate ISO 9001:2015 Quality management system

3&4-axis machining

Machinery

3-axis machines

- AWEA FM-99
- Feeler QM-40SA
- Feeler VMP-23A

4-axis machines

- Fancu robodrill 2-D21LiB5
- Feeler TC-20

Other technologies

- Die-sinking EDM
- Precision Wire EDM
- Laser Welding
- Preci drilling
- Conventional milling
- Grinding

Products

Prototype production

High-quality and precise components for machines, airplanes, trains, automobiles and healthcare industry

Machining of castings

Mass production

Mass production of parts from raw material to final product e.g. parts for bicycles, motorcycles, trains, packaging machines, cash machines etc.

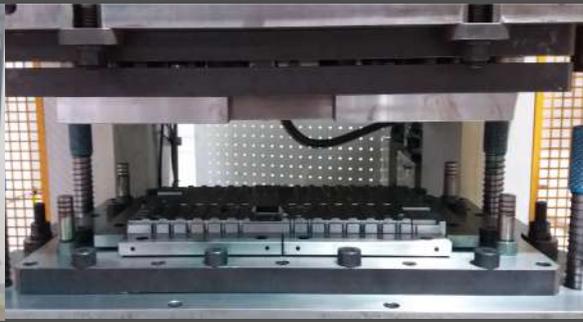

Products

Molds production and mold repairing

Design and machining molds for lost wax casting. Machining molds for injection casting and vacuum forming.

Cutting tools for plastic and aluminium castings

Clamping tools and jigs

Production of clamping tools and jigs for machining and hand operations.
