

CNC PROCESSING
AND
WELDING

ABOUT US

- The company specializes in CNC and WELDING production, using advanced technologies and high precision CNC machines and knowledge in welding. Our team of experts provides high-quality metal and other material processing services according to specific client requirements. Our equipment and experienced staff enable us to produce parts of high precision and complexity for various industries. We offer fast production, competitive pricing and excellent quality control to meet our clients' needs.

CNC PROCESING

- MILING
- DRILLING
- TAPPING
- ETC

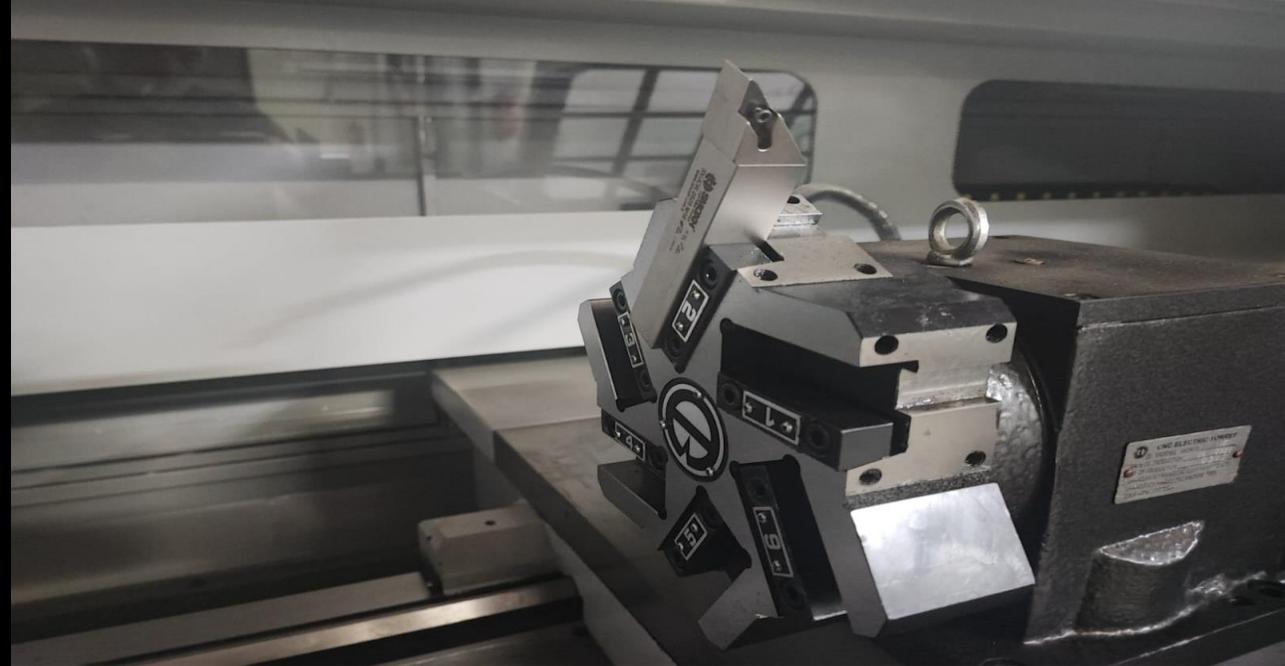

VMC MASCHINIG CENTER
VMC1160 WITH FANUC
0I-MF

CNC PROCESING

- DRILLING
- COUNTERSINKING
- REAMING
- TAPPING EXTERNAL AND INTERNAL THREADS
- ETC

CNC TURNING MACHINE
CK6156-2000
SIEMENS 808D

WELDING

Types of welding that we are very good at and that we do:

MiG MAG-Electricarc welding with flux electrode wire and shielding gas.

WiG-Electricarc welding with a non-fusible electrode in a protective inert gas atmosphere.

REL-Electricarc welding with a coated electrode.
