ABOUT US

With deep roots stretching back to 1960, MECANICA HUEDIN SA was originally founded as a manufacturer of agricultural machinery. In 2009, following a significant reorganization, we became a joint-stock company, opening the way to modernization and innovation.

Since then, we have evolved into a modern production facility, enriched with an extensive range of capabilities. With over 22 years of experience in the manufacturing industry, we are proud to contribute to the progress of the industry and to be recognized as a reliable support for our business partners by providing innovative solutions and superior quality products.

Our factory is located in the town of Huedin, in Cluj county, 50 kilometers from the city of Cluj-Napoca and 130 kilometers from the border with Hungary. With a total area of approximately 33,000 square meters, our factory is comprised of 6 distinct buildings with a generous area of over 2,500 square meters. They represent our workshops, offices and warehouse and reflect a well-organized structure adapted to our production needs.

Flexibility and quick adaptation to market requirements have made our products address a very large number of fields, such as: agricultural, automotive, construction, energy, food, hydro, furniture, animal husbandry.

We respond to the needs of our partners or customers with a wide range of services and we produce on demand metal parts, subassemblies and unique finished products or in series from various materials, such as steel, aluminum and stainless steel for domestic, commercial and industrial use.

Cutting

Welding

Punching

Turning

Bending

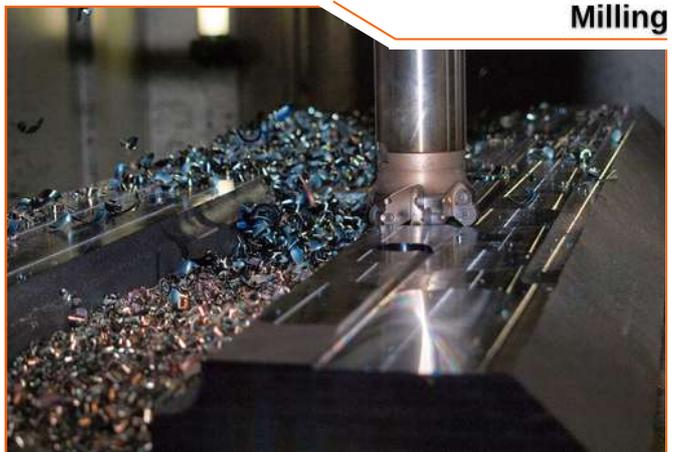

Drilling

Painting

Milling

Currently, at Mecanica Huedin we have 46 employees and we believe that our people are our most valuable resource.

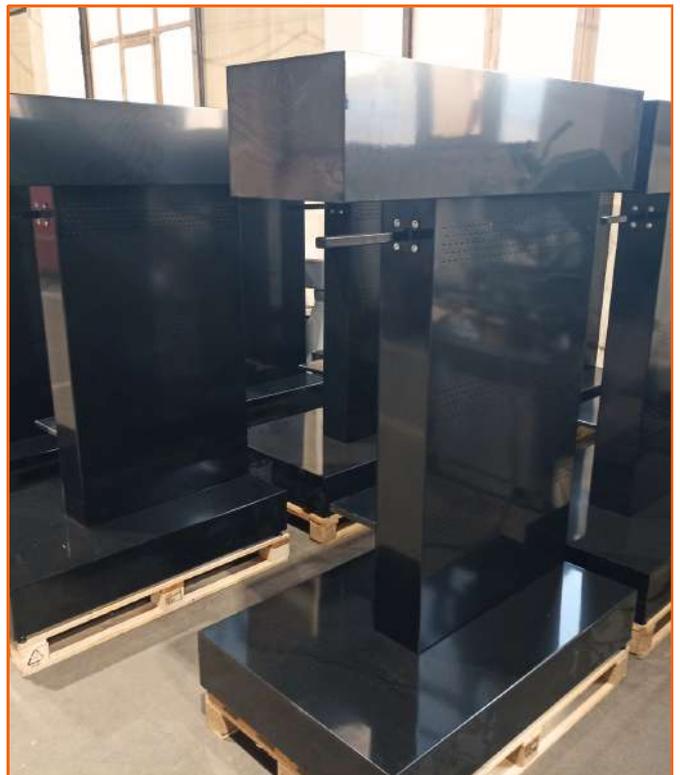

Specializing in high-precision machining, we offer customized services for single or serial parts, being equipped with modern production facilities, crane and machinery:

- Automatic Laser and plasma cutting machine
- Automatic Punching presses
- Automatic Sheet metal bending presses - Abkant
- Milling and turning machines
- Sheet metal rolling machine
- Welding machines (Tig, Mig-Mag, MMA)
- Bohrwerk
- Band saw
- Spot welding machine
- Sandblasting
- Electrostatic powder coating

In the field of quality,
Huedin mechanics
holds the certification
ISO 9001:2015.
