

RACE APPROVED PARTS

# MILLING COMPANY

We Design, we create , we Machine  
Using the latest DMG Mori Generation machines

# ABOUT US

We believe in Hard Enduro!

Sometimes, all you need to find is an extra motivation in order to give the best in what you do. How WE help YOU with this?

We believe in our passion. We're all passionate about Hard Enduro and engineering. That is why you will discover some unique products and features. Also because we spent thousands of hours studying protections and parts and we are trying to improve every time.

First of all, we stand for quality. That is why we design and produce our products in Romania - the mother of Hard Enduro.

All our products are tested by our team and by TOP hard enduro riders like Sandra Gomez, Teodor Kabackiev and Peter Weiss among many others.

We may not reinvent the wheel, but we have certainly raised the standards in terms of protections and accessories for Hard Enduro.

After 14 years of experience in the Hard Enduro world, we decided to improve the protections and accessories for Hard Enduro and MX.

FmParts is a part of Fm Racing Romania, the biggest racing company in Romania. For 14 years, we provide rental bikes and technical assistance to more than 500 riders from all over the world, during the extreme enduro races in Europe like Red Bull Romaniacs, Erzberg Rodeo, Redbull MegaWatt, Sea to Sky and many others.

Our main goal is to provide you with the best Hard Enduro parts and protections, this is why we have already started to offer User Lifetime Warranty.

We believe in our passion and most of all, we believe in what we produce.

We design and produce our parts in-house on the newest 5 axis CNC machines from DMG Mori. We support passion and we understand it. Our projects are someone's own passion and belief.

**WORK HARD**  
**PLAY HARD**

# INTRODUCTION FROM CEO

My Name is Alfred Aldea , since i was 12 years old i spent all my life surrounded by dirtbikes, now i am 39 and my whole life i been working on the race tracks or in the office, preparing everything for the next race

I started this business from the desire to offer quality in terms of accessories and protections for enduro bikes, I started this business 4 years ago by subcontracting different local factories to produce the parts according to my ideas, in 12 months I realized that it is very difficult to find factories that respect delivery deadlines and quality control, in 2019 we decided to open our own factory in Romania and purchased the first CNC milling machine from DMG Mori, from the beginning we purchased the best machine available on the market as well as the best engineers , thus we started the production of accessories and parts

---

# OUR HISTORY

It all started with a Radiator Guard for KTM

## 2019

Developing the first UniBody concept of Radiator Guards and produce the first samples in Romanian Factoryes

## 2020

Opening our own factory and buing the new DMG Morri 5 Axis Machine

- Developing another 30 Nedw products

## 2021

A new DMG Mori machine joined our forces, Fm-Parts become a trademark  
Developing another 20 new products and increased our dealers network

## 2022

2 Brand new machins  
New laser Engracing Machine  
New Skin Packing Machines  
Developing products for Rieju Factory

# OUR RESOURCERS

## 5 DMG MORI CMX50U MACHINES

5 Axis machines with 0.02;mm precision

## FaroArm 3D Measurement

Quality Control and parts inspection on site with FaroArm

## Laser Engraving Machine

We can Engrave with accuracy most of the materials

## Skin Packing Machine

Semi-Automatic Skin Packing machine for our products

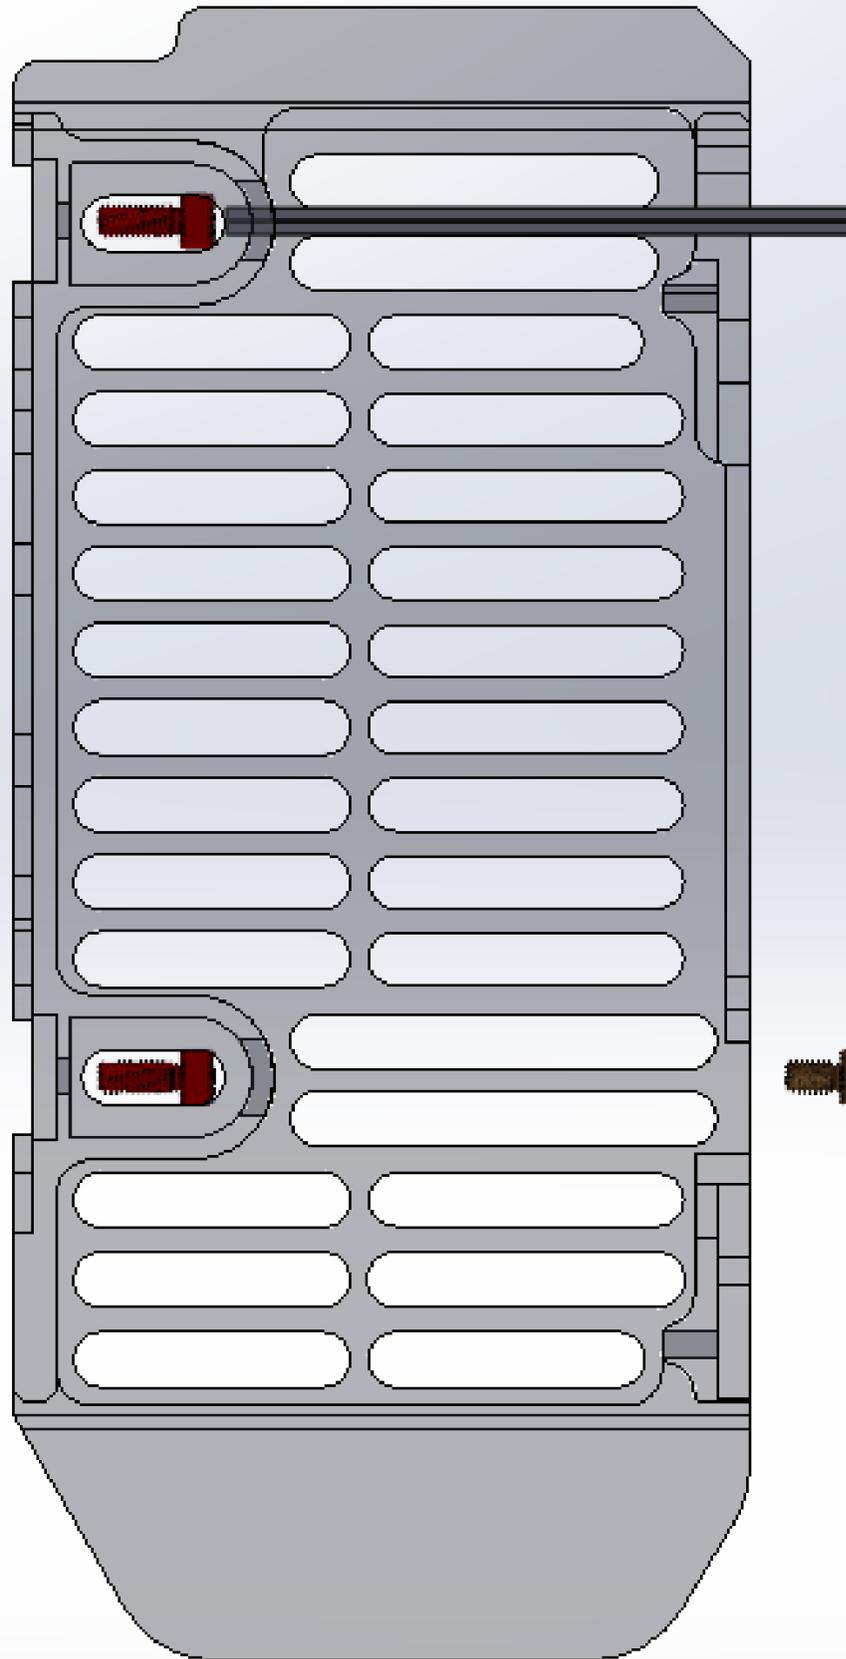

## 3D Printers with fillament and Resin

Perfect way for prototyping and testing the new parts

## SolidWorks & SolidCam 2023

Designing and machining Software from SolidWorks and SolidCam

---

# OUR VISION

**01.**

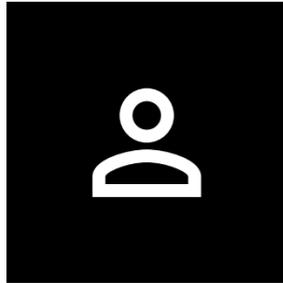

To produce and deliver quality parts in a short time, Customized design adapted to your needs

**02.**

The development of new parts in Hard Enduro, this is an area that we master very well

# OUR SERVICE

## Parts Design and Production

We can produce almost any part from scratch, or we can produce according to the 3D model or 2D drawing

## Anodizing

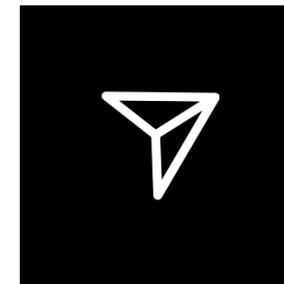

All our parts can be anodized in Romania

## Packing

We are offering 3 types of packing :

- Skin Packing on cartoon box with Logo
- Cardbox Packing with logo
- Personalized Cartoon Box

## Labeling

we can add labels printed with a thermal printer, both with barcodes or EAN and with the name of the product

# A SMALL PART OF WHAT WE HAVE DEVELOPED SO FAR

Concept of UniBody Radiator Guards

Throttle Position Sensor Protection

Cylinder Flange Protection

Idle Screw for TPI

HandleBar Risers

Wide brake pedal Tips

Heavy Duty Clutch Covers
