

## Company brochure

The company Furomaro was founded on 2006 as an individual business, which transforms to a local micro company at 2017 (family business). Our experience in machining metal goes back more than 33 years.

The company main profile is to machining parts for clients (more exactly milling and turning parts). It is complemented by other operations in cutting, drilling, plane grinding and mantle grinding as well as small batch welding. As the reference works reflect, we preferred more the small series. We are flexible and efficient, always following the principle of maximum precision. We always only take the work that we can predictably perform.

The machine park:

- Universal lathe SNB Arad - 400 x 1500
- Univerzal lathe HBM – 320 x 1000
- Precision turret lathe Weiler RDU 260/28
- Universal milling machine Marghita FUS 32 (digital display) 560 x 320 x 400
- CNC lathe Weiler UD 24 CNC – 110 x 180
- CNC lathe Gildemeister CT 40 – 250 x 700
- CNC lathe Gildemeister CTX 310 – 200 x 400
- CNC milling machine Mikron VCE 500 – 400 x 400 x 500
- Surface grinding machine RPO 200 x 600 x 300
- Surface cylindrical grinding machine 100x 500
- Shaping machine
- Column drill machine
- Metal bandsaw
