Pamtek Metal Industrial

Established in 2012, Pamtek Metal has become one of the leading providers of precision sheet metal manufacturing and engineering for companies in various industries in Turkey and around the world.

We have been providing our customers with innovative and comprehensive manufacturing solutions for nearly 10 years. From initial design to mass production, our customers of all sizes rely on us for product and process expertise in the execution of their OEM business.

As Pamtek Metal, we offer our customers a reliable, single-source manufacturing partnership with unconditional customer satisfaction, operational excellence and dedication to high quality. With our business-partnership approach we offer, we help our customers to be decisive in their own fields and to provide competitive advantages.

Our References

Capacity

7.800 tons
years / capacity

1.500.000 pcs.
processing capacity

350.000 m2
coating capacity

Company Size

5,000,000 EUR
annual turnover

+ 100
employees

Our Strengths

Laser processing and marking
on high-performance machines

Computer controlled sheet
metal bending and forming

process capability for different
thicknesses up to 0.3-30 mm

Pressing, embossing, forging
and riveting

MIG, MAG, WIG and electrode
welding

Machining
