12
fixed partners

Complex solution, continuous improvement

Since it was founded in 1993, Agro Line has established significant domestic and international relationships in the production and distribution of carbon steel and Hardox-built products.

Our initial 13-member staff has now expanded to 220, supplying more than ten internationally renowned Western European strategic partners: Hamm, Ammann, Bomag, Behringer, elumatec, Willibald, Goldhofer.

Field of operation

Thanks to our modern and large equipment fleet, besides serial production we also produce individual parts and machine structures. Our manufacturing process builds up of technical planning, which is based on the special needs of our partners, careful selection of materials, machining, locksmith works, welding processes and painting, if required.

We can manage the entire workflow with our own technology thanks to the continuous investments. The outstanding quality of the products is guaranteed by quality assurance throughout the production process.

Thermal cutting

- Laser cutting machines with 3000x1500, 4000x2000, 6000x2000 mm replacement table (5 KW - 10 KW)
- Flame cutting machine with 2000 x 6000 mm table
- Plasma cutting machine with 2000 x 6000 mm table

Chopping

- CNC controlled saw machine

Blasting

- Roller track automated blasting machine, with track size of 5000 mm x 2200 mm and maximum fixture height of 900 mm
- Blasting cabinet with railway wagon, 5000 mm x 7000 mm x 3000 mm

Folding

- CNC controlled folding machine with modular bumping system (x:6000 mm, 800 T)
- CNC controlled folding machine (300 T)

Conventional chipping

- Lathes from 500 mm to 4000 mm length, 800 mm diameter
- Milling machines (X - 1000 mm, Y - 600 mm, Z - 500 mm)
- Drilling machine
- Grinder (X - 1000 mm, Y - 400 mm)
- Cylindrical grinder (Ø400, maximum length of manufacturable piece 1000 mm)

Locksmith works

- Assemble products on a locksmith table using these component devices and templates.
- Maximum weight of product: 10 tons

Welding

- Welding plant certification due to MSZ EN ISO 3834-2 standards
- Certified welders due to MSZ EN ISO 9606-1 standards
- Impulse welding with focused arc welding machines
- Five-axis welding robot with integrated 6-axis component rotation

Machine tools

- Turning tool CNC controlled lathe machine
- Horizontal drill mill with 80mm spindle, X - 1000 mm, Y - 900 mm, Z - 1200 mm
- Horizontal drill mill with 100mm spindle, X - 1500 mm, Y - 1100 mm, Z - 1300 mm
- Horizontal CNC controlled drill mill with 130mm spindle, X - 4000 mm, Y - 2500 mm, Z - 1500 mm
- Three-axis vertical machining center
- Three-axis vertical machining center, X - 2100 mm, Y - 1000 mm, Z - 1000 mm
- Five-axis vertical machining center, X - 3000 mm; Y - 800 mm; Z - 720 mm
- Portal milling machine X - 4000 mm, Y - 3200 mm, Z - 1400 mm
- Portal milling machine X - 6000 mm, Y - 3200 mm, Z - 1600 mm

Surface treatment

There are 2 washers and degreasing and 6 wet painting cabin in a separate painting hall (10 x 5 x 3,5 each), but if necessary, 2-2 painting cabins can be connected, allowing us to paint large-scale fittings.

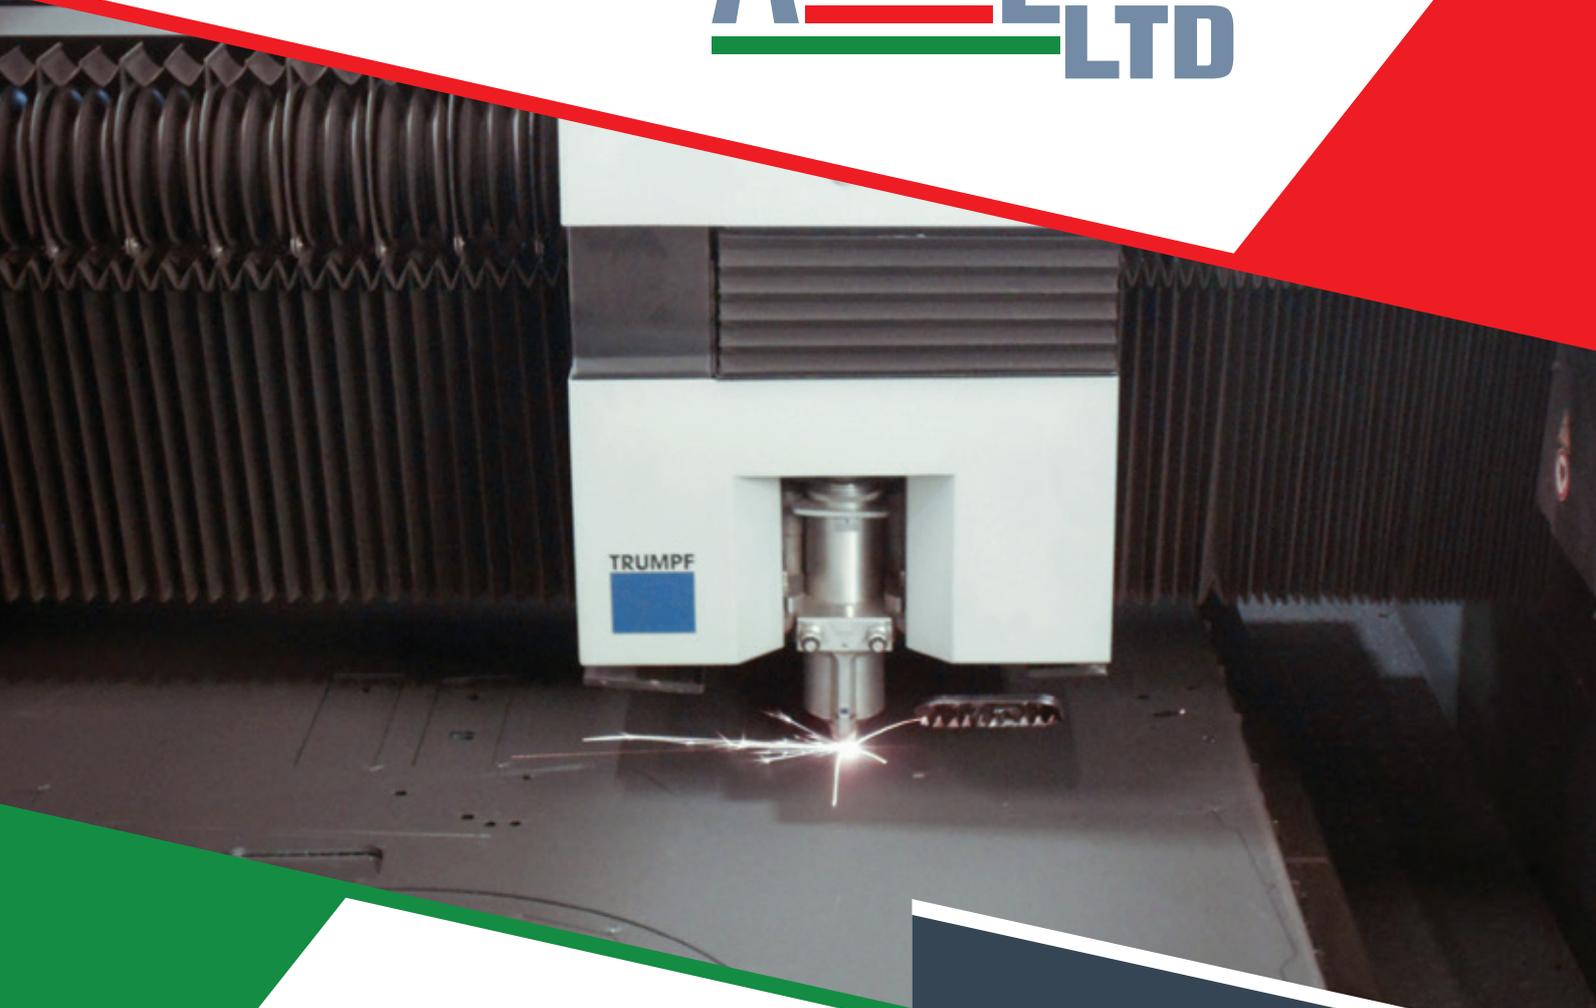

Products

We strive to meet the challenges independently, so the entire production process is carried out at Agro Line's plants, which guarantees a flexible service and generates extremely high added value.

- Road roller and road construction components
- Machine tool building blocks
- Blasting machines
- Parts for mining and construction machinery
- Tillage
- Elements for airport ground service machines
- Parts of machines used for preparing biological materials for composting, biogas treatment or thermal utilization

AGROLINE LTD

Our company applies the **ISO 9001:2015** quality management system,

has **ISO 3834-2**-welding plant certification and all welding has **ISO 9606-1** qualifications

entitled to use a „**Hardox In My Body**” based on Swedish SSAB classification.

Based on our 2021 results, we are among the **top 100 medium-sized companies** in the industry category.
