

Tresoldi & Casiraghi Srl

Presentation

The company

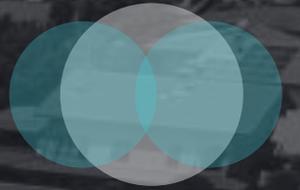

Producing quality is more than a mission for Tresoldi & Casiraghi has always been a real passion. Since 1962, the year the company was born, this passion has materialized in the production of carpentry which, over time, has become recognized in the Italian and international market. A way of working that marked the transition from the artisan to the industrial and technological dimension to guarantee competitiveness and offer only the best, at always competitive prices.

A progress made not only of numbers but also of safety of internal processes and respect for the external environment. A success built thanks to the daily commitment of a group of people capable of looking at the challenges of the future with the same unchanged enthusiasm of the first day.

The company employs personnel specialized in welding, bending, punching, and assembly. The welds are performed by qualified personnel in possession of the qualification licenses:
TIG - MIG - MAG - ELECTRODE.

We are also able to issue mechanical test certificates and non-destructive test certificates.

The company

Tresoldi & Casiraghi was born in 1962 and it is specialized in realization of mechanical and thermal carpentry. Tresoldi & Casiraghi has ISO 9001 certification and operates with a system of quality subject to periodical check from accreditation agency.

We annexe a copy of ISO 9001 conformity certificate.

• Our shop has a modern and C.N.C. machineries as follows:

CARPENTRY AREA:

- Plasma cutting until 50 mm thick, cutting 3000x14000
- Shears
- Turret punch presses until 6 mm thick
- Press brakes

MECHANICAL PRODUCTION AREA:

- Milling machines
- Lathes turning
- Drilling machines
- Boring machines
- Tapping machines

As support of our production we have ten cranes capacity among 3 and 16 Ton.

- Orders are developed with planning and procedures according to our production responsible and our quality responsible. This last assures the quality of productions and the conformity of our plans, in according to specifications of our contract and sector.
- Welding are done by skilled workers with TIG-MIG-MAG-ELETTRODO qualification licence. We are also able to issue certificated of mechanical tests and no-destructive control certificates.
- Our flexibility permits us to face up with a lot of orders, improving our productive capacity and managing with continual supplies during the time, as the following list shows:
 - Grinding plant, complete with reciprocating feeders, plant carrying total capacity of 400mc (Kg. 250.000)
 - Manufacturing of pressure vessels in according to PED regulation
 - Stainless steel Flotation system
 - Production of machinery for the metal surfaces treatment
 - Movement liquid tank
 - Special protection of bodywork (ballistic structure)
 - Construction of armoured vehicle for Italian army
 - Maintenance and repair of operating machinery
 - Waste treatment technology incineration
 - Preparation of assembly line for PUMA 4x4 e 6x6 armoured vehicle
 - Preparation of fire vehicle for airports and petrochemical environment
 - Preparation of facilities for cruise ships
- Our qualified suppliers permit us to manage an order as prime contractor, to assure the quality and the conformity required by our customers.

Our Strengths

Technology and Innovation

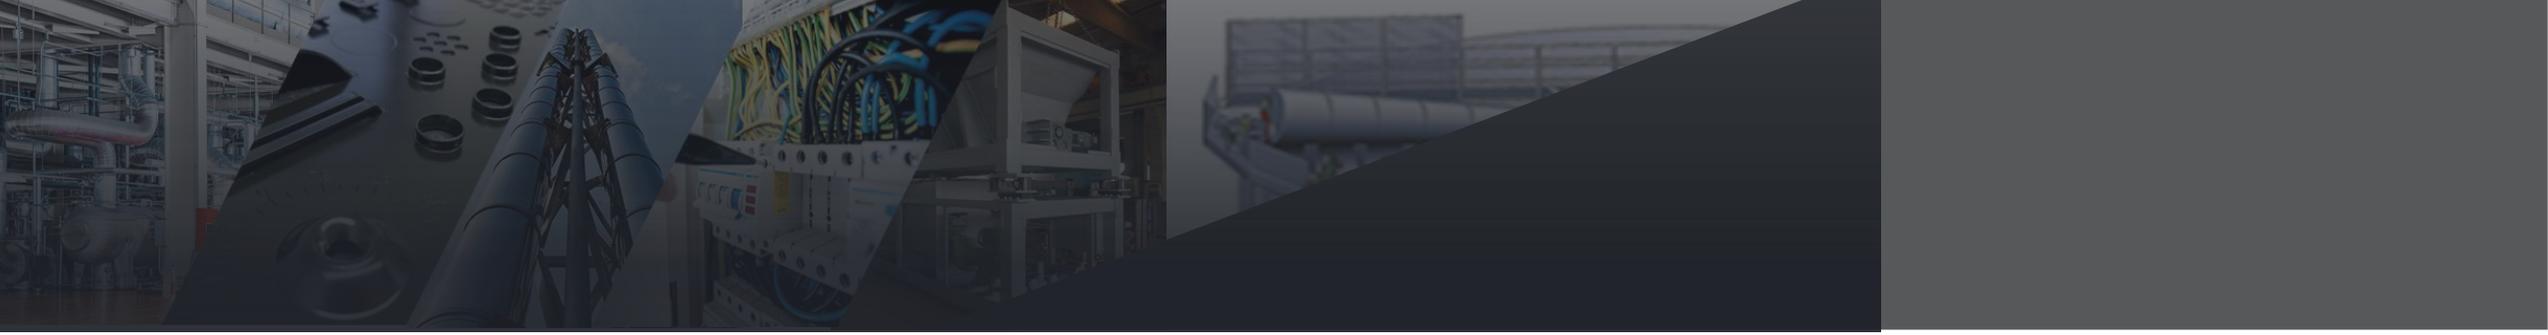

All the generations that have followed one another in T&C, up to the present day, have had in common the tenacity, the correctness and the desire to improve.

Still today the development of new technologies and the propensity to invest in machinery and above all in personnel are the main engine that allows T&C to continue to be a reference in the world of mechanical carpentry

Quality

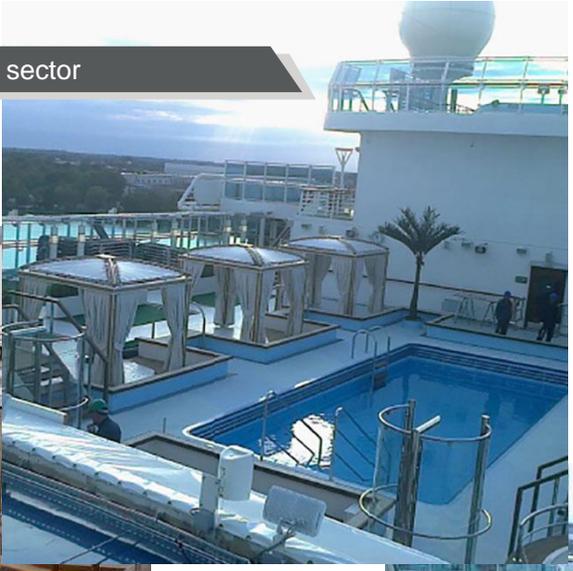

ISO 9001/2015, certification of welds, patent welders are the prestigious awards obtained over the years by T&C to guarantee the quality of its products and attention to the customer.
