

PANORAMA

# Technology and Precision in CNC Machining

Driven by experience, defined by innovation.

## About

Based in Croatia, Panorama tech d.o.o. offers CNC milling services for complex and high-precision components.

We focus on quality, reliability, and clear communication, delivering parts according to client specifications and deadlines.

Production is carried out in our own facility using modern CNC machines, reliable tooling, and high-quality measuring equipment.

Each part undergoes thorough inspection before delivery to ensure consistent and precise results.

## Equipment

We operate modern CNC machining centers, including Doosan DNM and Haas VM, with a maximum table size of 1400 x 700 mm.

Our machines are equipped with high-pressure coolant systems and through-spindle coolant, ensuring efficient cooling and superior machining quality.

This setup allows us to machine a wide range of components with high precision and consistent quality.

## Services

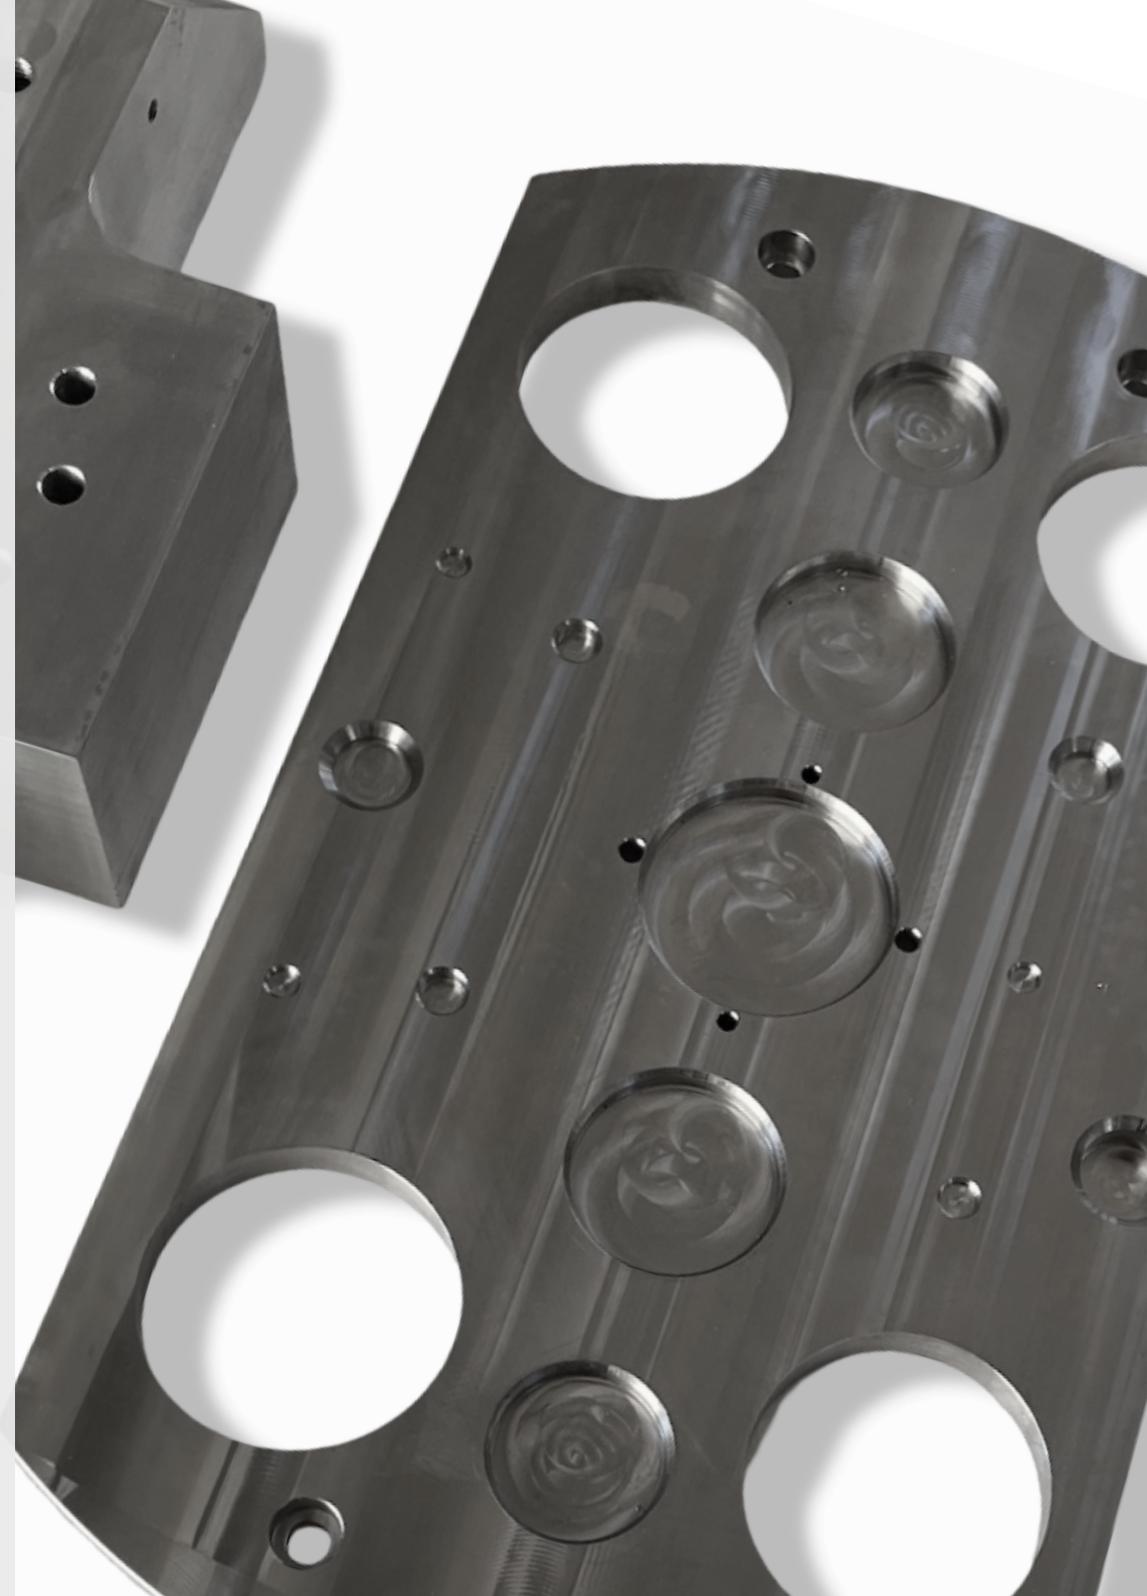

- Precise CNC Milling  
(prototypes, single parts, production series, custom components)
- Design support  
(CAD/CAM programming, DFM consultation)
- Mechanical assembly
- Surface treatments  
(anodizing, hardening, powder coating...)
- Logistic and transport organization

## Materials

- Ferrous Metals  
(Steel, Stainless Steel, Tool Steel, Hardox)
- Non-Ferrous Metals  
(Aluminum, Copper, Brass, Inconel, Titanium)
- Plastic

## Industries

- Automotive
- Aerospace
- Machinery
- Electronics
- Medical
- Energy
- Construction
