

COMPANY INTRODUCTION

CNC Portal Milling Machine Manufacturing

Machine Modernization

Custom Machine Manufacturing

Machining and Welding

DIRECTOR'S GREETING

Zoltán Szabó
Managing director

Our company operates on a total area of over 10,000 square meters. Our main activities include machine manufacturing, particularly CNC portal milling machines and carousel lathes, where we possess 60 years of experience and market-leading expertise. In addition to manufacturing new machines, we also modernize used machines and equip them with the latest technologies to make our clients' production processes faster and more cost-effective. We have extensive experience in custom machine manufacturing, ranging from mining machinery to flame cutting machines and various conveyor systems. Alongside our machine manufacturing division, we also have machining and welding divisions. We work with more than 25 machining tools and excellent, certified welders. All three of our divisions serve our customers with excellent quality and precision.

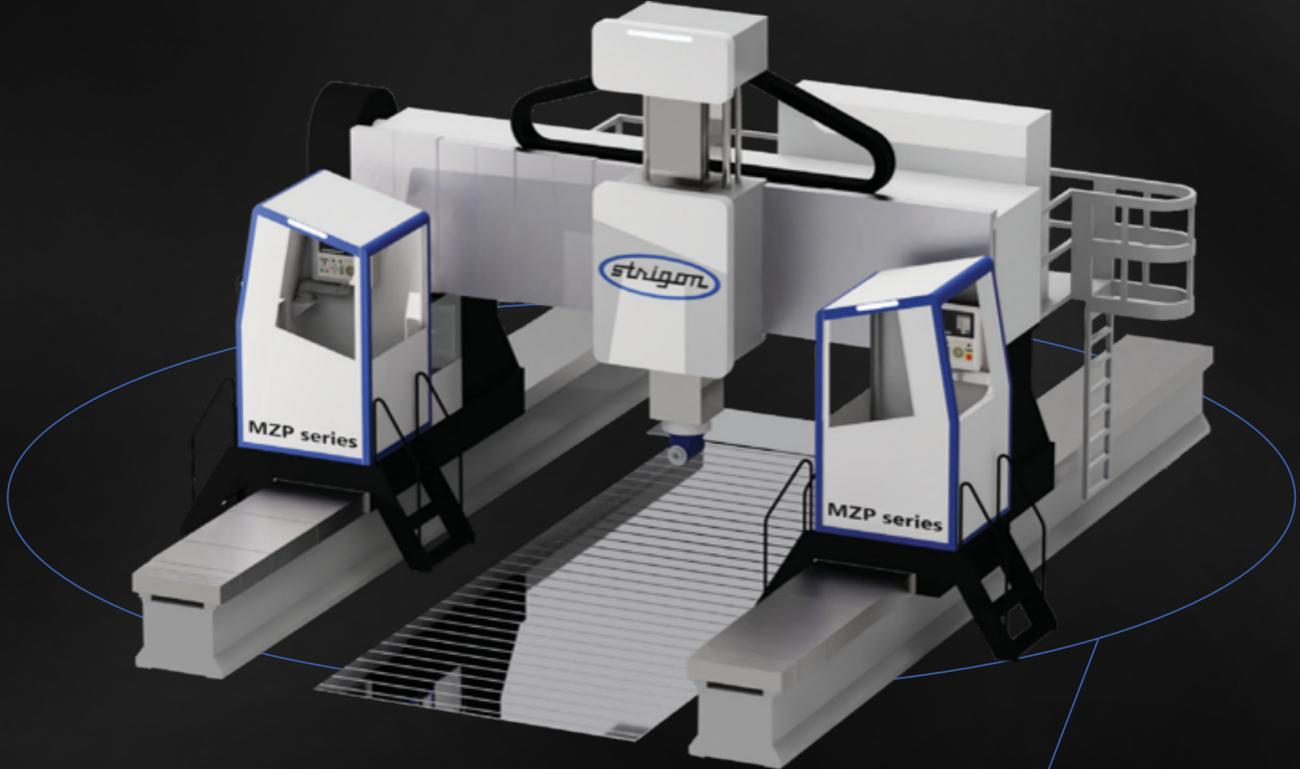

We look forward to welcoming your company into our circle of satisfied customers.

OUR MACHINE TOOLS

We manufacture CNC-controlled portal milling machines with table sizes ranging from 2x4 meters to 5x20 meters, and carousel lathes with rotary table sizes ranging from 2 meters to 5 meters. Our reference list includes renowned companies from both Europe and beyond. It can be said that we produce based on unique customer needs, with flexibility and at more favorable prices than our competitors.

MACHINING DIVISION

Our machining division consists of more than 25 milling machines, lathes, and grinding machines, specializing in the machining of medium to large-sized workpieces. Our references include major Western European multinational companies. We perform machining tasks precisely and cost-effectively in three shifts.

WELDING DIVISION

Our welders work based on the MIG/MAG welding process, handling the most complex forms up to 20 tons in weight! A speciality of ours includes welding particularly large, intricate workpieces.
