

The image features a dark blue background with several light blue, stylized geometric shapes that resemble parts of a machine or industrial components. In the center, the letters 'CMB' are rendered in a bold, blue, sans-serif font with a slight 3D effect. To the right of 'CMB', the tagline 'Your Manufacturing Partner' is written in a smaller, white, sans-serif font, stacked in three lines.

CMB Your
Manufacturing
Partner

Your Manufacturing Partner

We make your project our own,
and we work on it with great
commitment.

We choose full responsibility, and we
aim to find the best solution with you at
every step of the production.

We bring passion in our work:
from prototype to serial production.

In the heart of the industrial area in Northern Italy

Rovereto is in a strategic area: within 100 km there are
the most productive areas in Italy.

In the northeast of Italy there are **10** mechanical,
electronic and automation districts.

A link between Italian creativity and the DACH markets

CMB is based in Rovereto,
in the heart of the industrial area of North
East Italy, one of the most important
production areas in Europe.

Rovereto is in Trentino, a region that has
always been the link between Italian
creativity and the DACH markets (Germany,
Austria and Switzerland), our main customers
since the beginning.

Technical and manufacturing services available through CMB

We offer our customers a large variety of manufacturing services, that we combine differently for each project, according to customer's requirements and product specifications:

PROTOTYPING

PRODUCT INDUSTRIALIZATION SERVICE

SUPPLIER SELECTION AND MANAGEMENT PROCESS

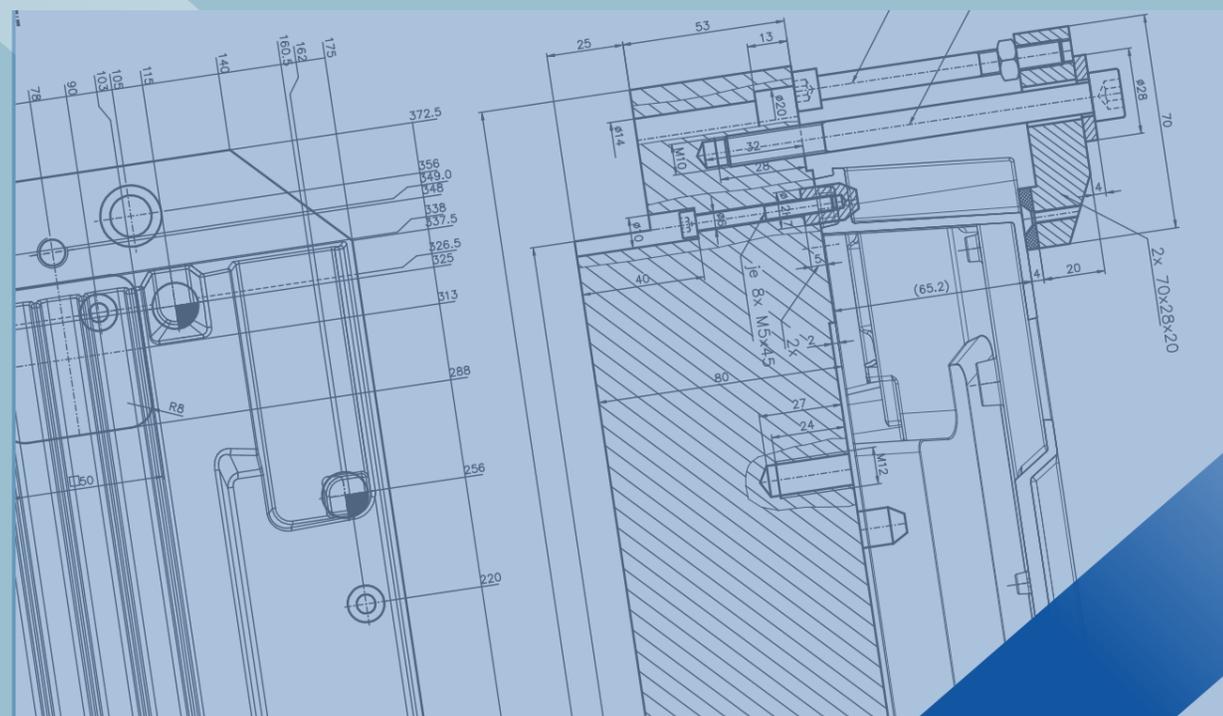

MECHANICAL PROCESSINGS

SURFACE TREATMENTS

PREASSEMBLIES OF SUB-ASSEMBLIES

FINISHED PRODUCT ASSEMBLIES

SURFACE FINISHINGS

Process and production capacity

ARCOS-FANUC robotized island
for brushing, grinding, satin finishing and polishing operations

Fanuc Robotdrill
ALPHA D21-LiB5 10k / 10,000 rpm spindle with 4 axes for milling, drilling and threading operations

Measuring arm
model FARO ARM EDGE 2.7 for three-dimensional measurements with acquisition software analysis and reporting Polyworks inspector

Painting booth
for spray painting of water-based or solvent-based paints

Welding area
consisting of two Siegmund benches and flexible clamping system

Assembling and testing area
prepared for the assembly of electronic components with periodic ground resistance monitoring of the devices in specifically designed ESD working areas

Housings and cabinets

HOUSINGS FOR AUTOMATED PAYMENT MACHINES

Painted steel and stainless steel

Over **15,000** units
produced in the last **10** years

Possibility of strong
customisation

Vehicle barriers

BARRIER BOOMS SINGLE PIECE VERSION / FOLDING MODEL

Over **100,000** units
manufactured in the last **10** years

Possibility to customize colors,
dimensions and led integration

Turnstiles

TURNSTILES FOR SKI AREAS AND OTHER GATES

(TRIPOD TURNSTILES FOR STADIA,
EXHIBITION CENTERS, OFFICES, BANKS AND GYMS)

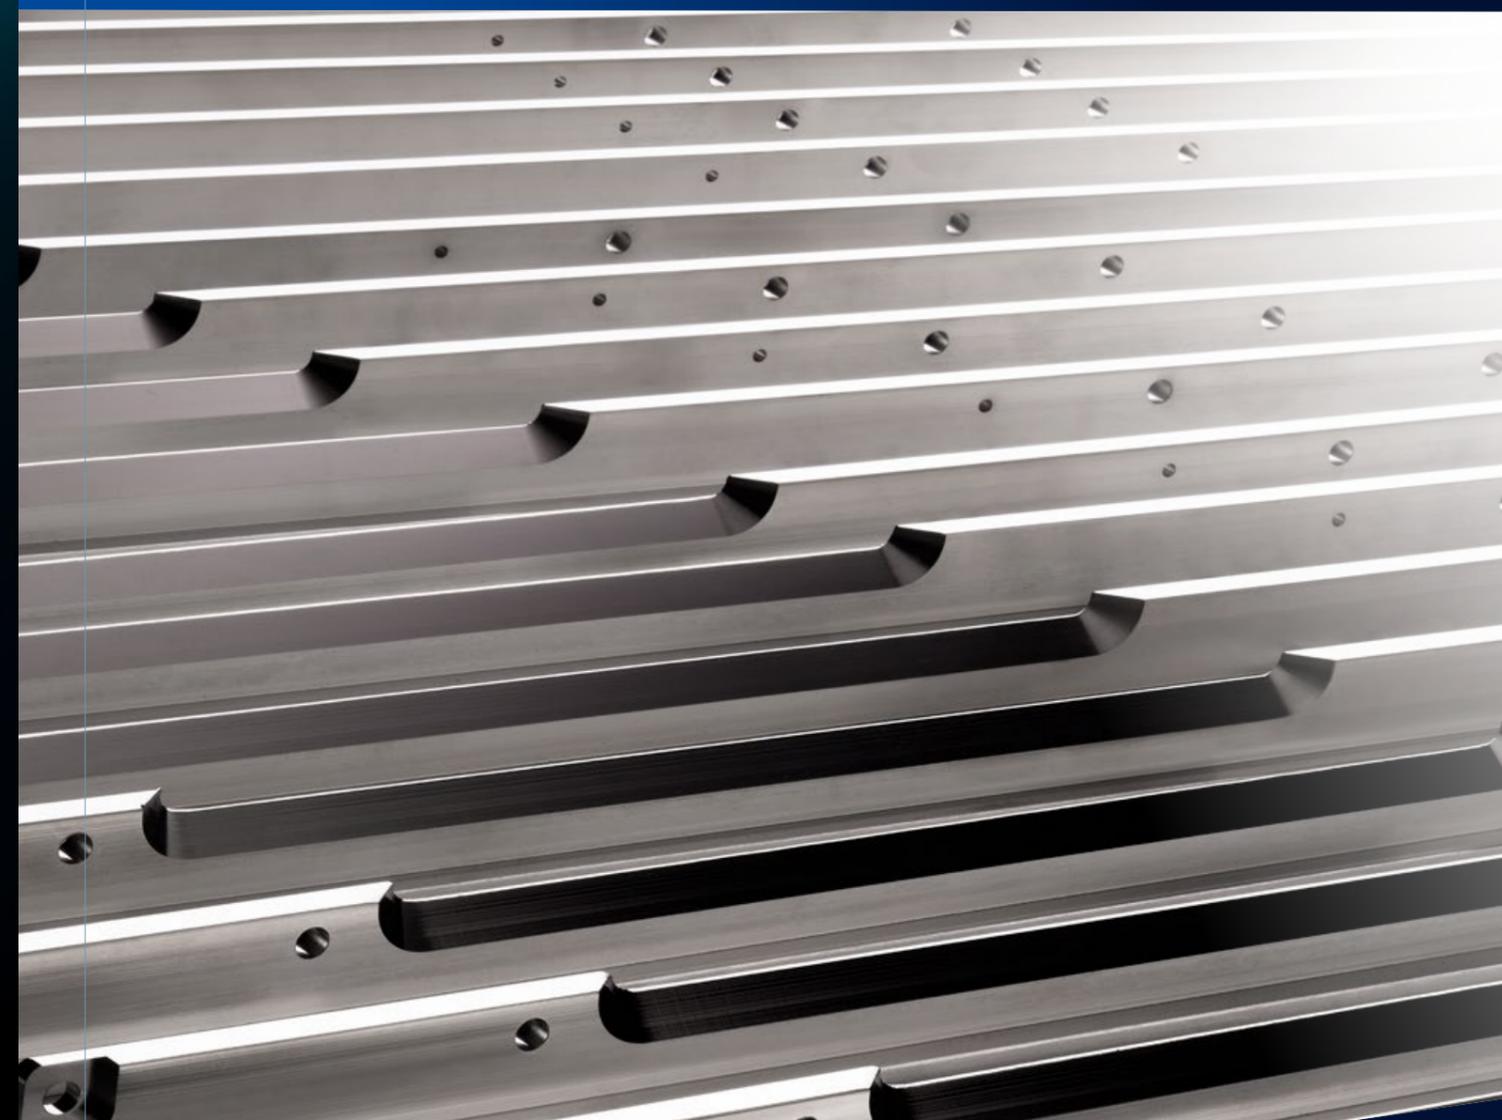

25,000 units
delivered in the last **20** years

Possibility to manufacture also the accessories such as
antennas, card reader supports and pedestals

Aluminium frames

CMB can provide its customers also with simple products, that require however several workings and adjustments and/or treatment operations.

The customer's advantage in this case is that CMB will act as a unique supplier and will source all the necessary additional suppliers and manage the relevant production from the technical and administrative points of view.

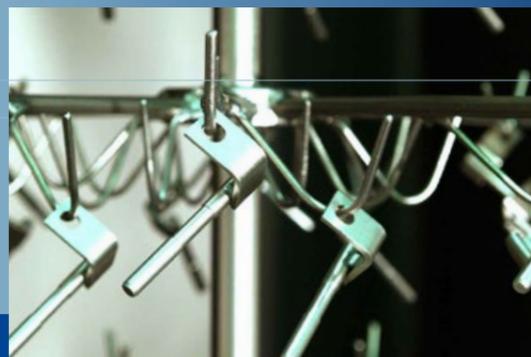

Mechanical works

Mechanical subassemblies & metal sheet working with significant mounting operations and important quantities.

Possibility to manage the whole process in order to supply the completely finished equipment.

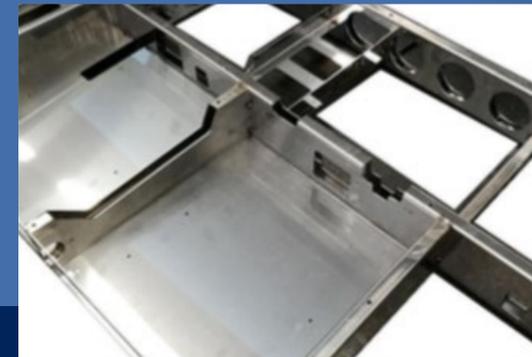

Aluminum castings completely finished: mould management, casted units with necessary mechanical working, painting and surface finishing: possibility to manage the whole casting process to supply the totally finished pieces.

Welding

Stainless steel welding operations for elaborated subassemblies with several pieces to weld together and with particular accurate finishing to grant aesthetic quality.

Electro-mechanical assemblies

Possibility to build up full electromechanical subassemblies including mechanical parts, electronic boards, cables, motor and external housing. CMB can also grant to effect a final functional test on the finished product before dispatch based on customers testing procedures and testing equipment.
