

HIGHFIELD GEARS & MACHINING LTD

CNC Machine Specialists

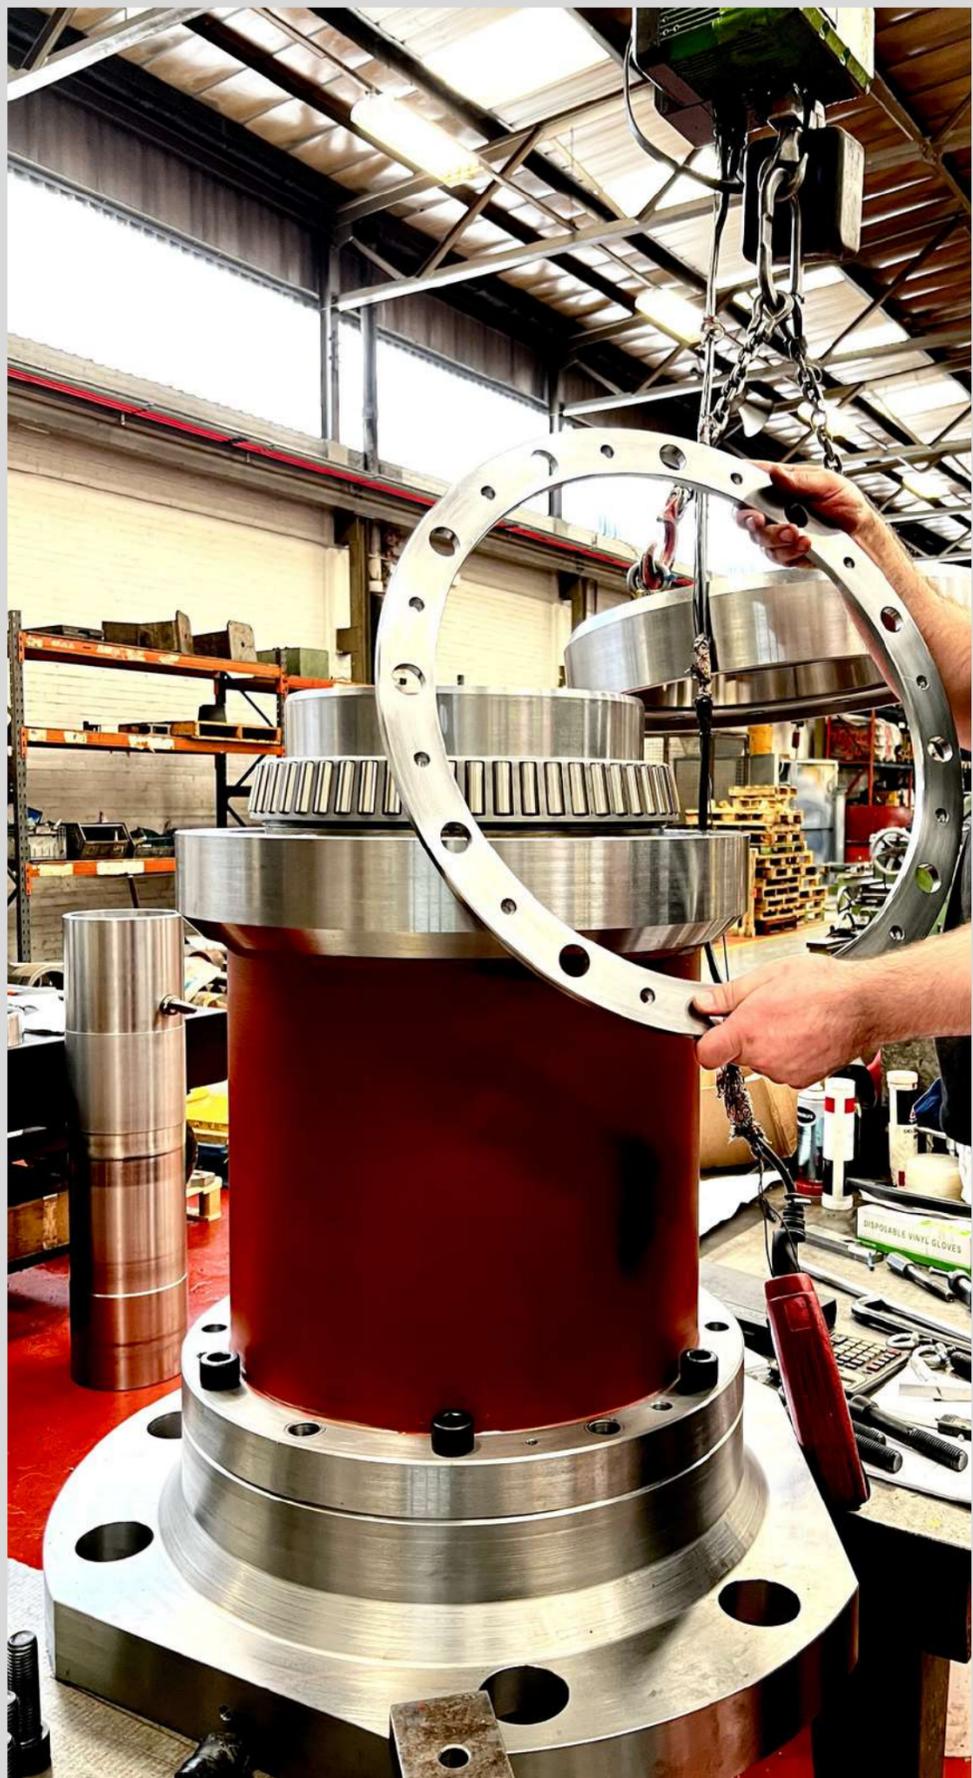

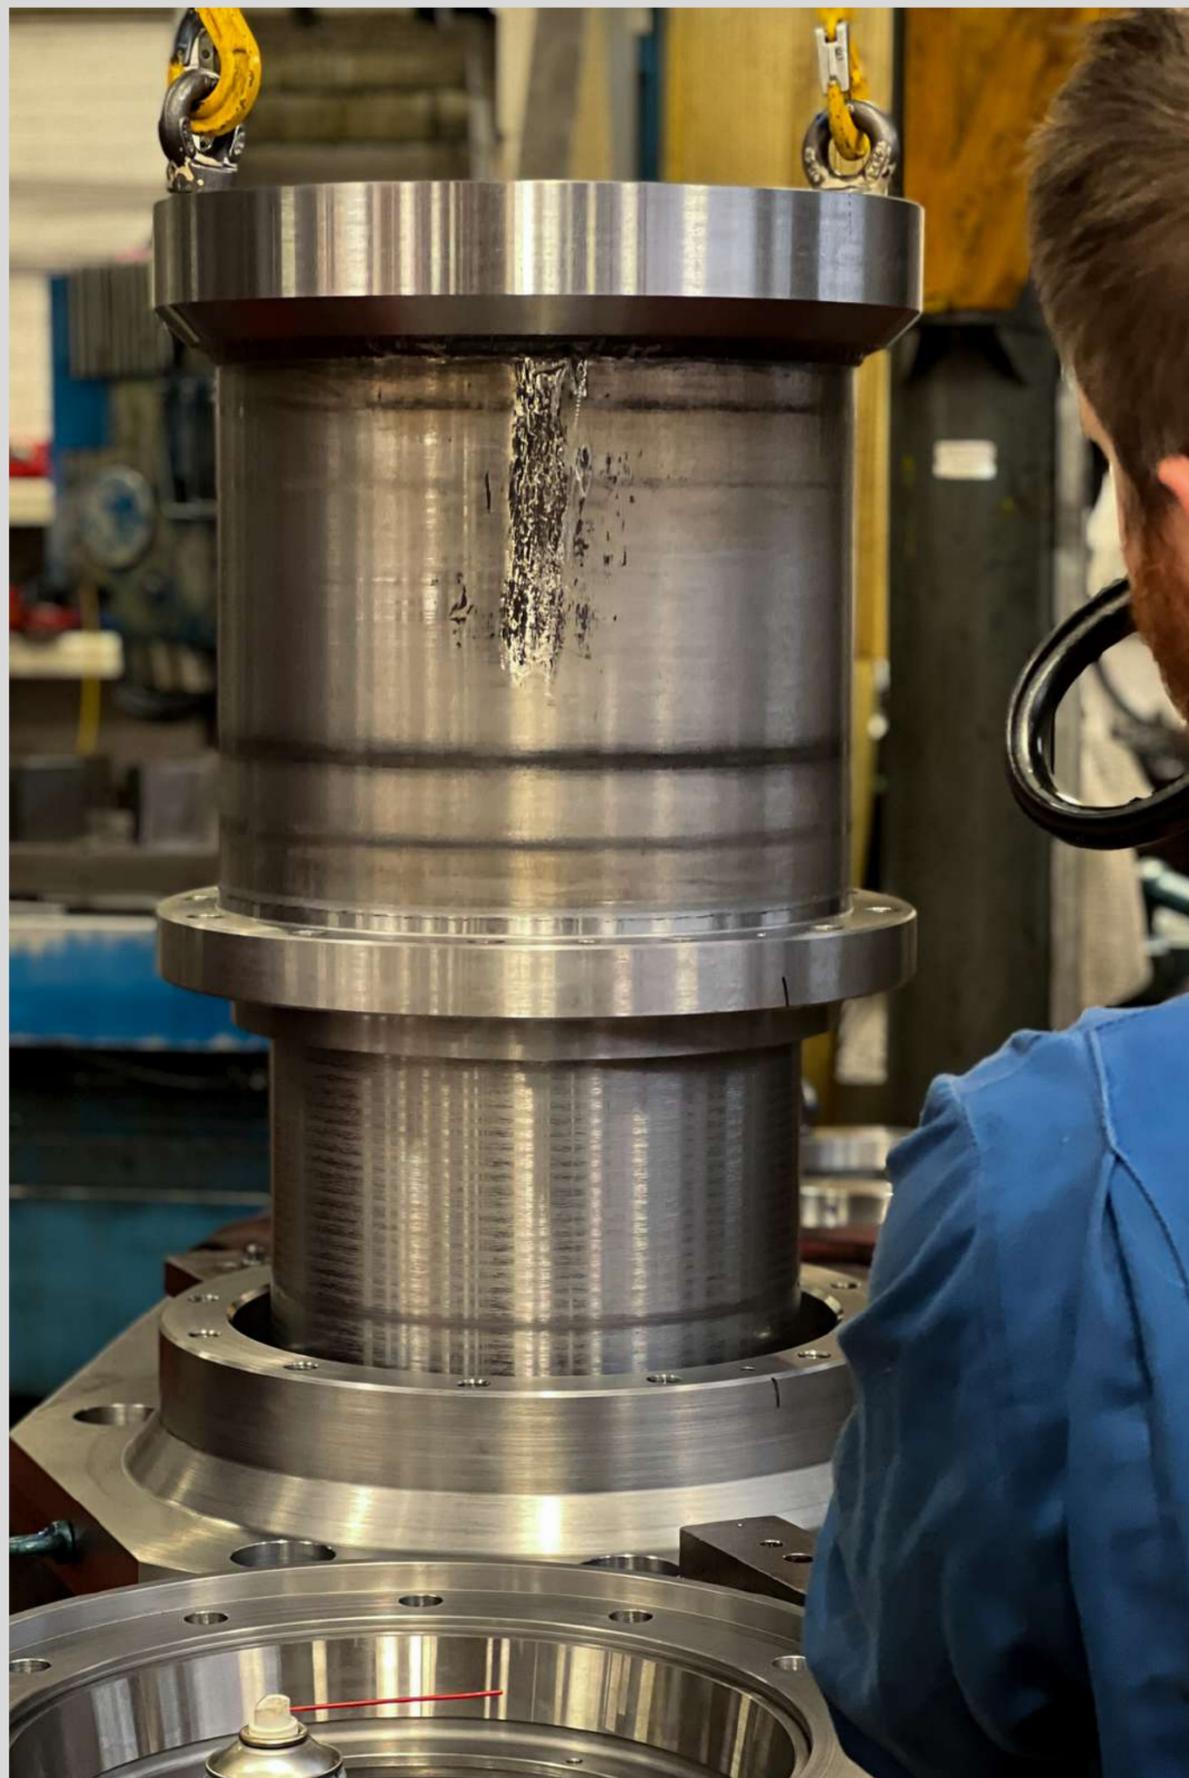

From the moment you get in touch with our CNC machining services team, we'll work hard to understand your needs and how our systems can help you.

We'll take your technical designs, 2D or 3D CAD drawings, and samples, and produce them on one of our CNC milling, boring and turning machines.

Where we differ from our competitors

- Full range of in house CNC turning and milling capabilities for any customer need.
- ISO9001:2015 accredited
- Available 24/7 – Flexible for 1 offs at short notice, in-house fixtures and tooling for specialist batch work
- We are committed to investment in new technologies that keep us ahead of other CNC machining companies allowing us to machine small screws to parts up to 10 tons. Our machines can turn, mill, drill, keyway and do horizontal and vertical machining operations.
- CNC Machines with CAD/CAM software for complex machining operations
- Technical expertise in CNC design, machining and tooling. Our production staff are time served engineers with extensive manufacturing experience of low volume and high volume components

Brands we work with

BRIDON

Lubrizol

synthomer

CEMEX

Smurfit Kappa

BWSC
YOUR GLOBAL ENERGY PARTNER

BritishSugar

Ibstock
Brick

TATE & LYLE

INEOS
THE WORD FOR CHEMICALS

TATA STEEL

COSTAIN

Marshalls

قطر للبترول
Qatar Petroleum

kentintrol

byco

قافكو
QAFKO

Industries we cover Uk & overseas

Polyurethane/Plastics

Packaging Industry

Sugar Processing

Pigments & Dyes

Oil & Gas

Food & Beverage Production

Power Generation

Aerospace & Defence

Water Treatment

Mining & Quarrying

Metals Processing

Building & Construction

Highfield Gears & Machining Ltd

Industrial Gearbox Repairs Specialist -
CNC Machining & Gear Manufacturing

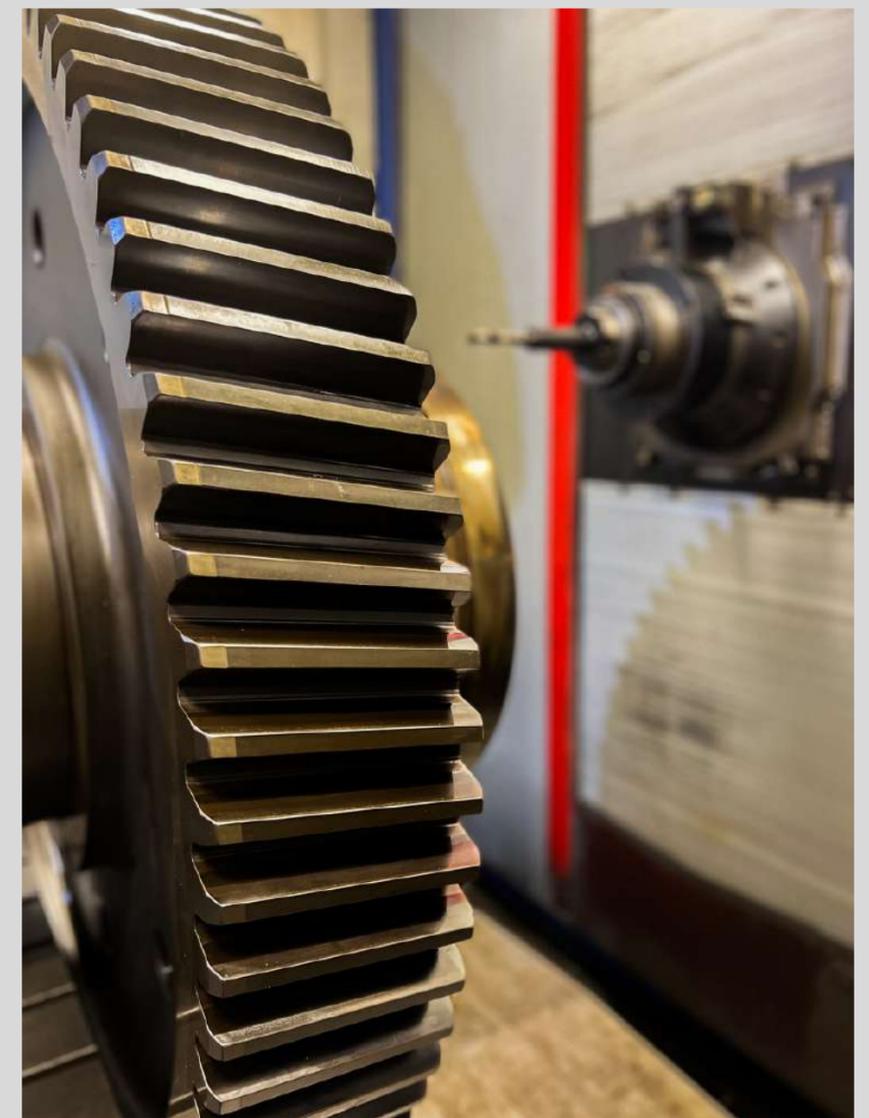

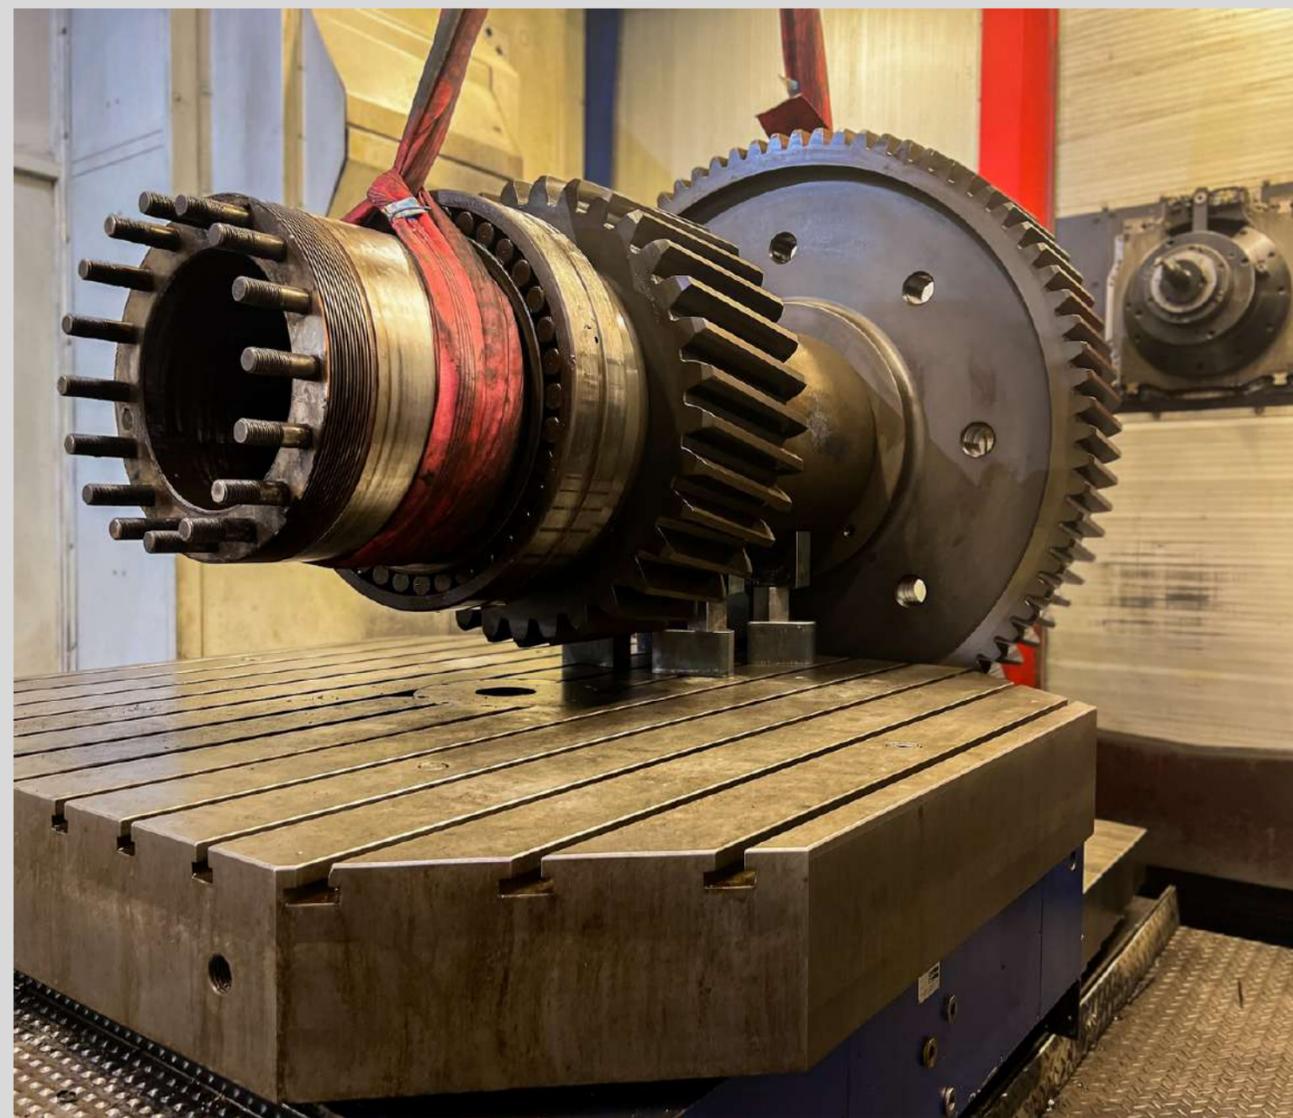

**We are an ISO 9001: 2015 accredited
precision engineering and CNC
machining company.**

**We deliver exceptional levels of quality
and customer service to clients across
both UK and International markets.**

ISO 9001
CERTIFIED

British Assessment Bureau

Working from technical drawings and the use of CAD/CAM software our Depo CNC Machine has table sizes up to 1600mm and table loads of up to 5 tonnes we can machine a variety of materials such as Inconel, Duplex, Super Duplex, Bronze and much more.

Highfield gears – Design

01 In-house CAD

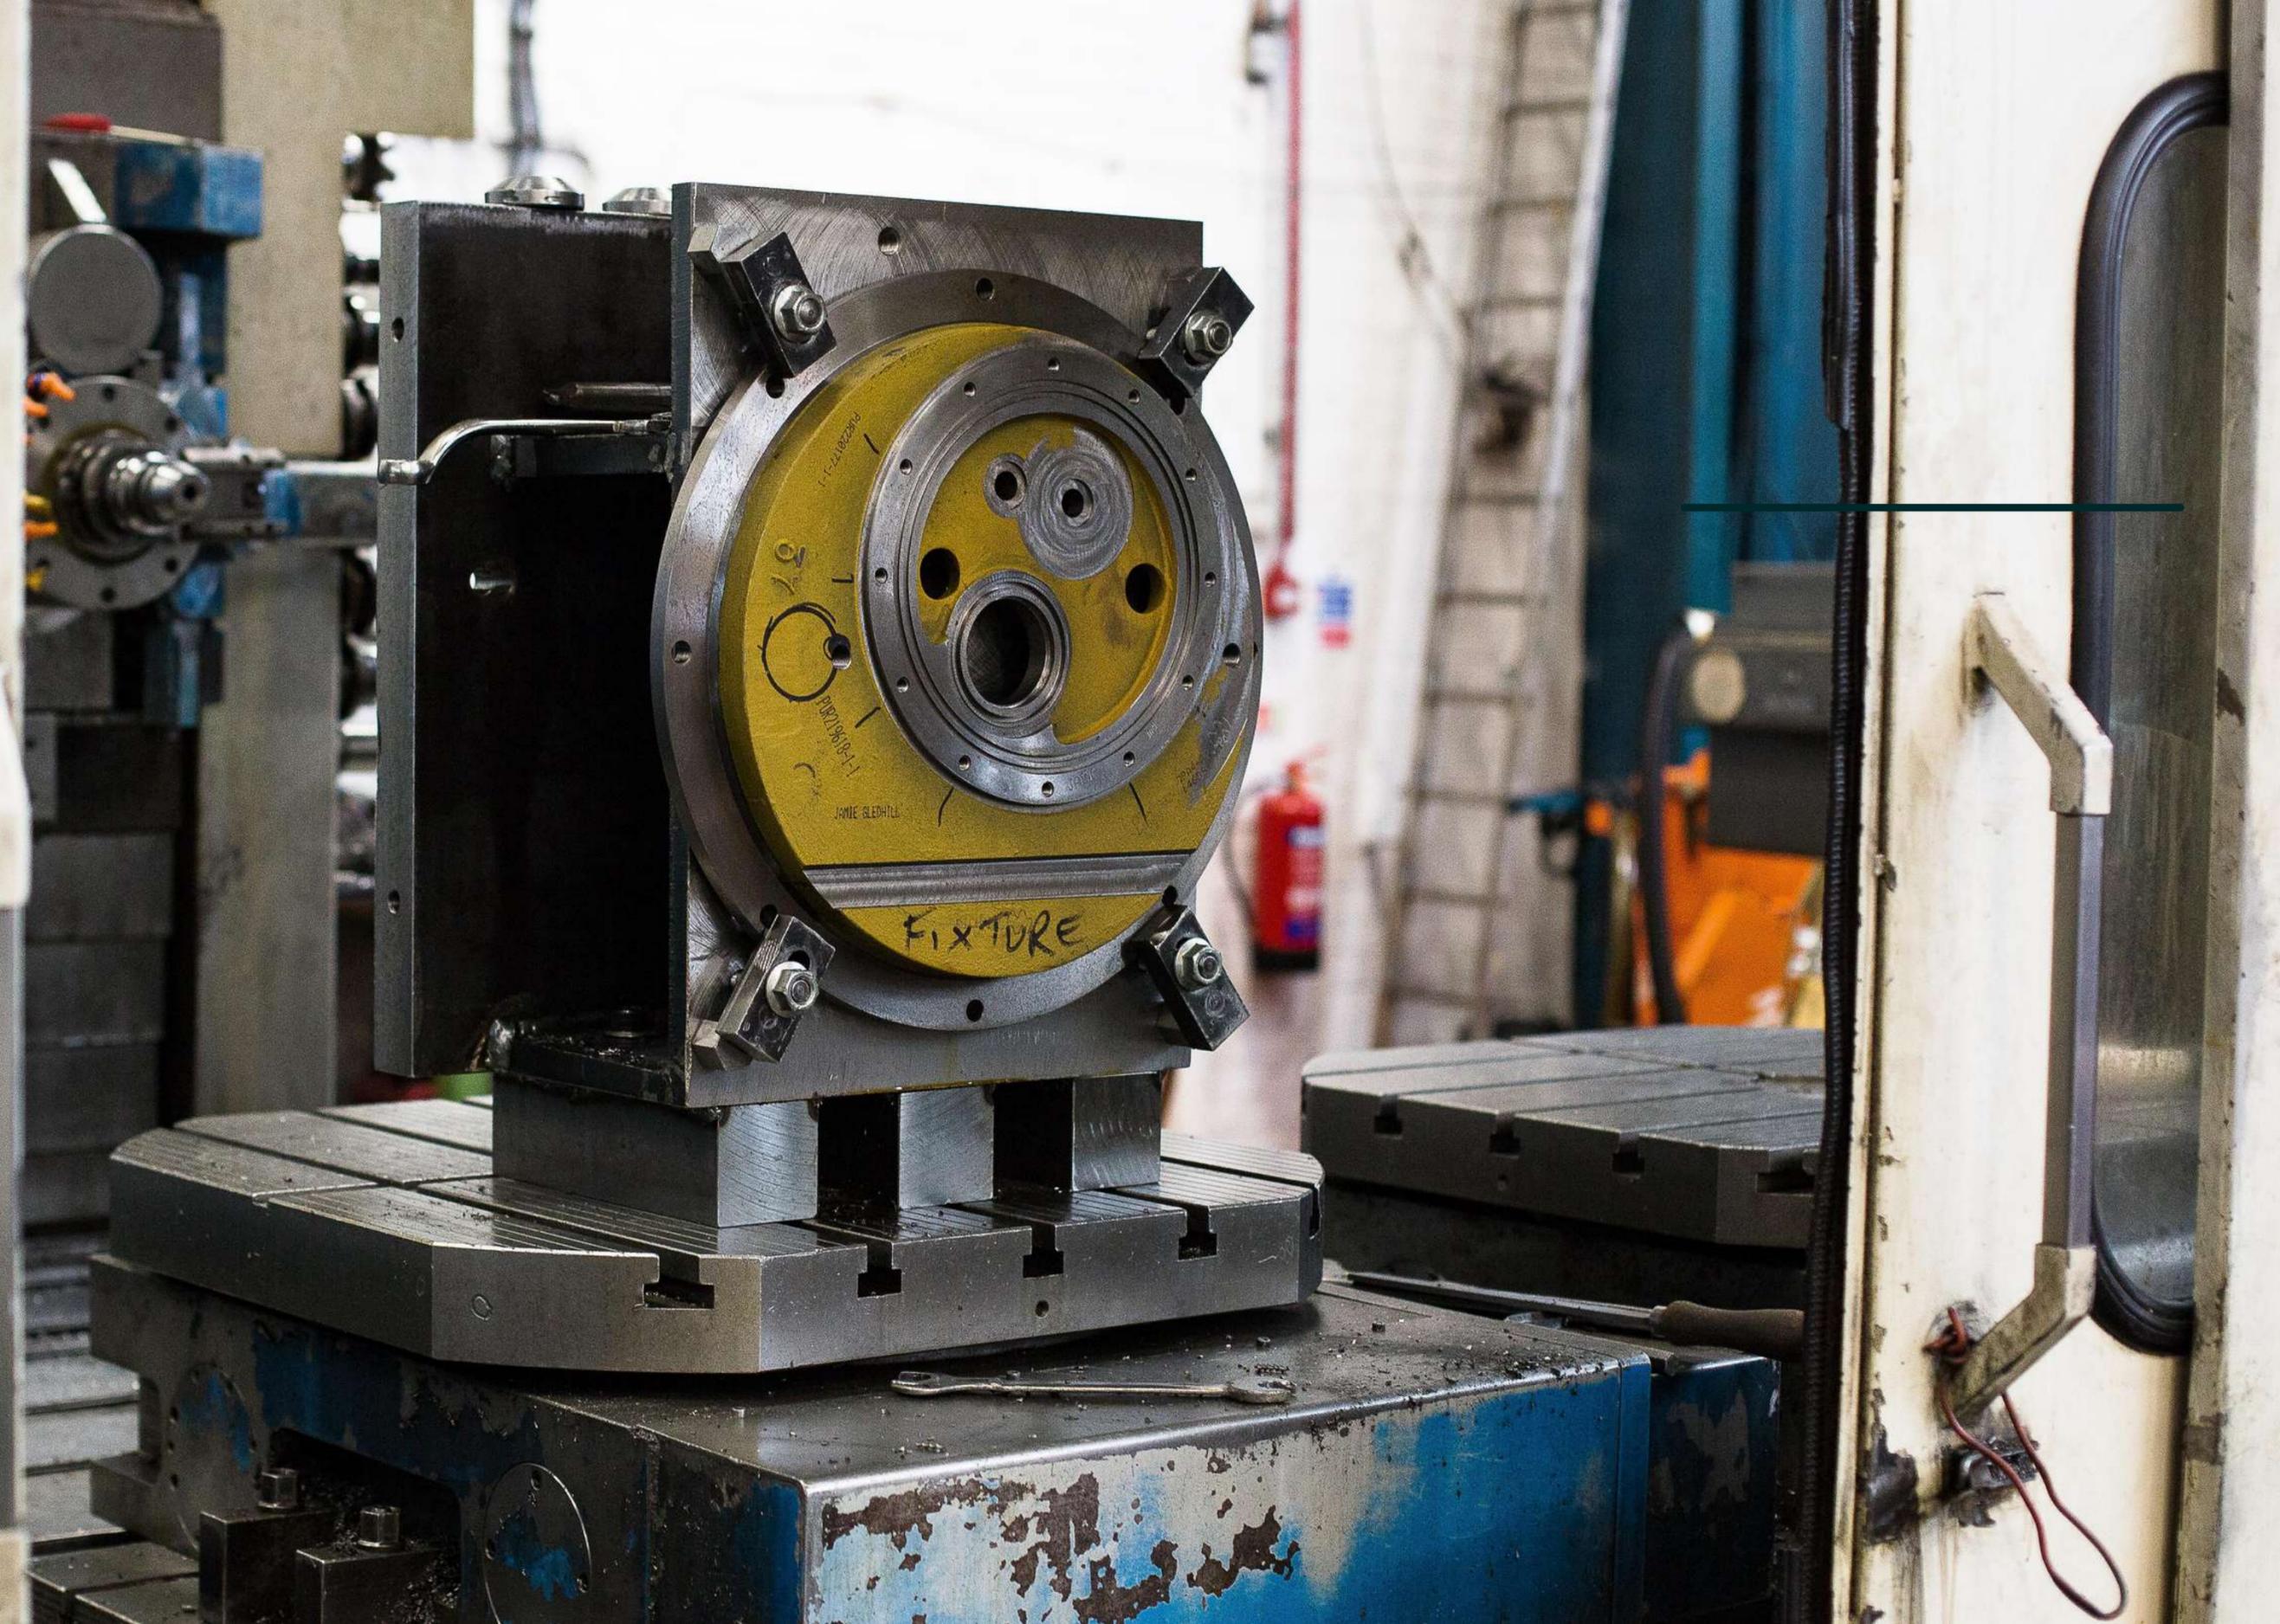

With our in-house CAD design team we can re-work samples/upgrades and help with modifications to existing parts.

02 Your Way

We will work to YOUR specific drawings to manufacture components of any size.

03 IP Inventory

Highfields can help you build up your IP inventory of critical parts by submitting them to CAD. This means when you next have a breakdown, we already have the necessary tools to start manufacturing right away.

We offer the following services to suit you.

Gearbox Refurbishments

**Gear Manufacturing - Helical, Spur, Bevel, Worm,
Double Helical**

**CNC Machining - Turning, Milling, Horizontal &
Vertical Boring**

New Gearbox Design & Manufacture

**New Gearbox Supply - Highfield, Amarillo,
CIDEPA, SEW**

Fenner, Santaslo, Sumitomo, Radicon

Bearings

Re-engineer any type of gearbox - Draw up internals (Gears & Shafts/cases)

Enabling you to build up an IP Inventory

Hydraulic Cylinder Repairs

Fitting Work

Oil Sampling & Vibration Analysis

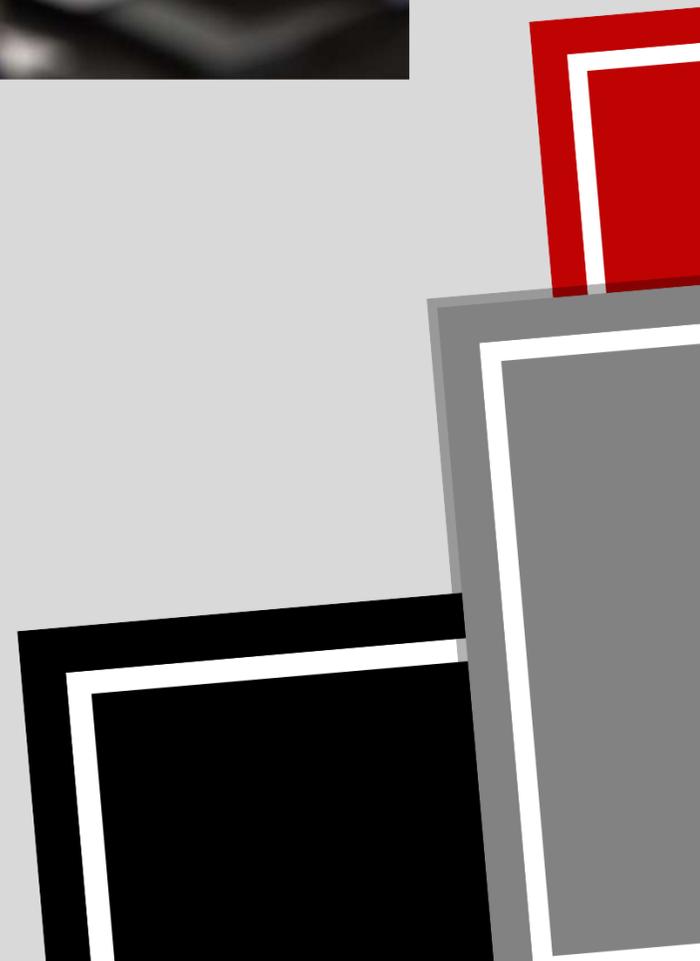

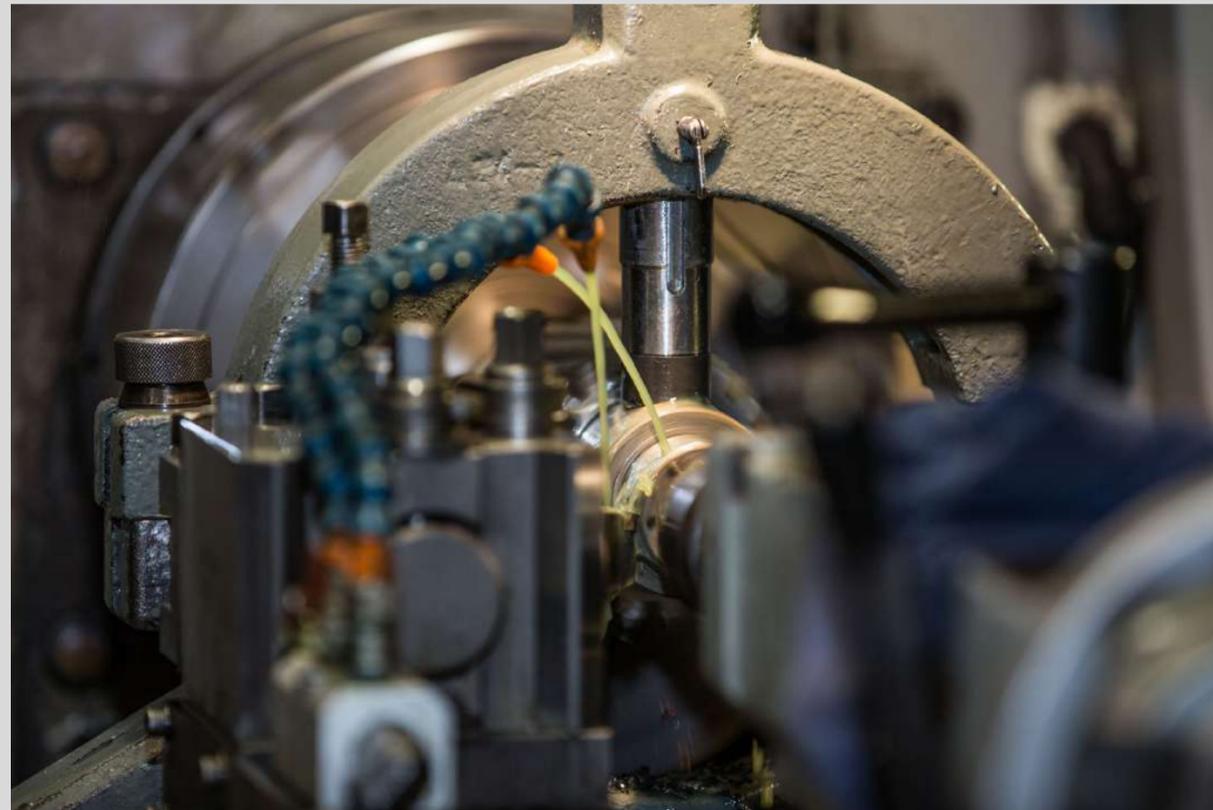

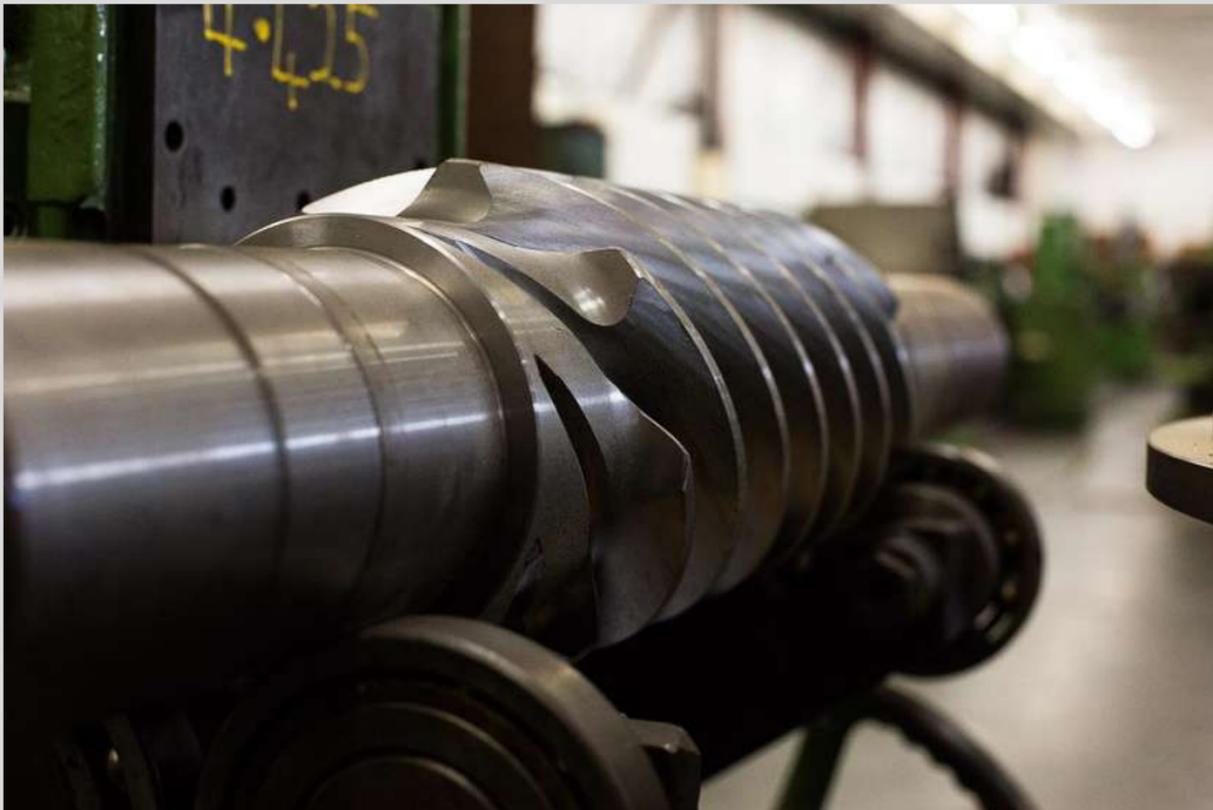

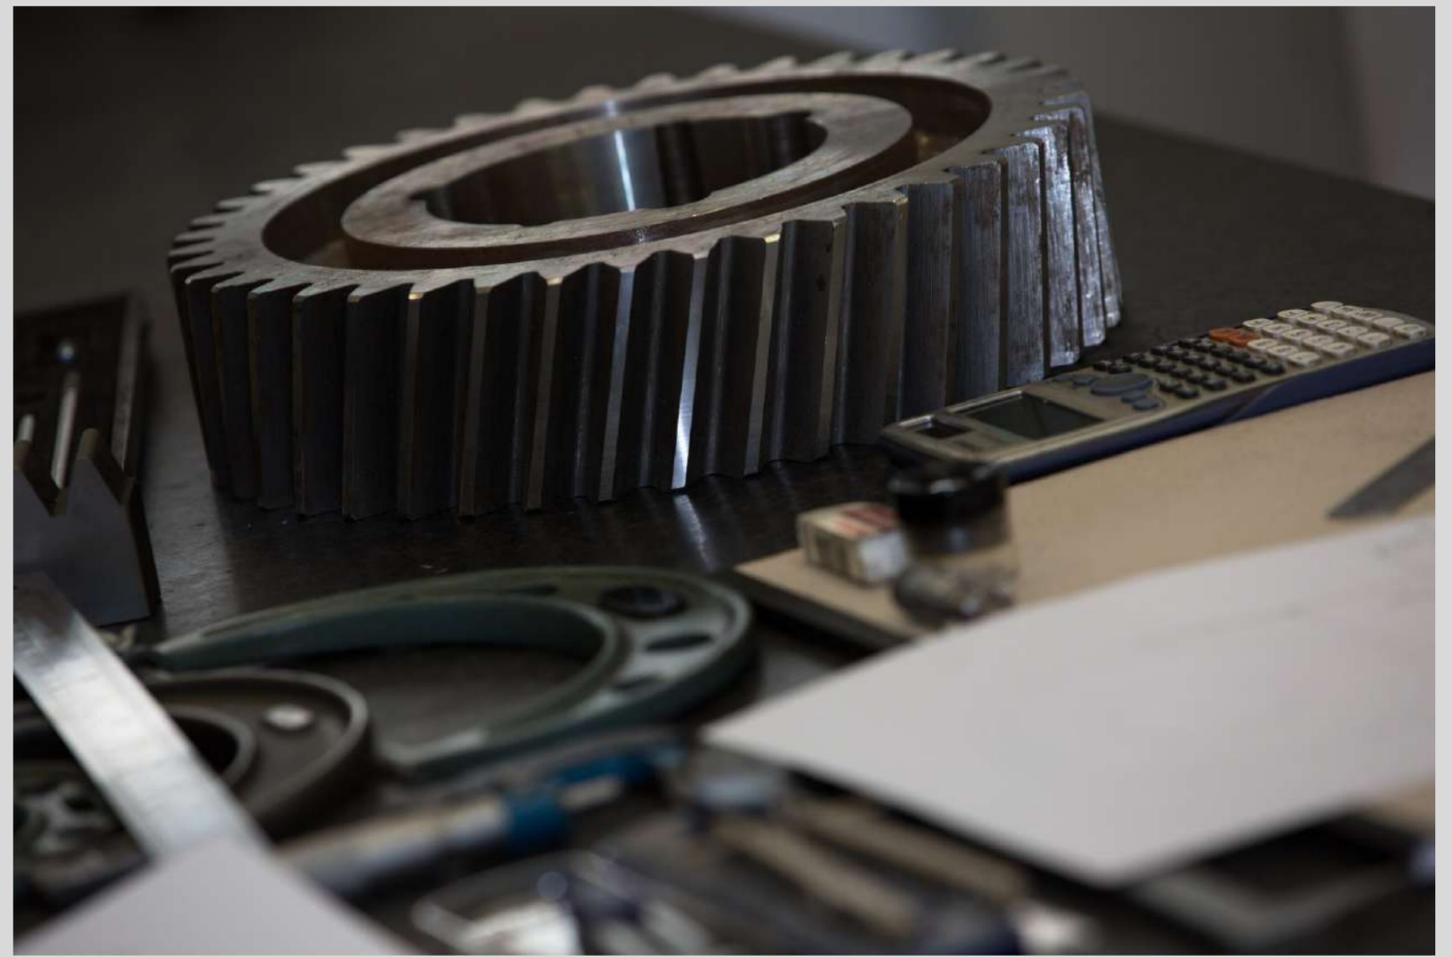

12 Month Warranty on all Units

2D & 3D CAD Design

Strip & Inspection Report Service

On-Site Services

Pump Repairs
