

HIGHFIELD GEARS & MACHINING LTD

Industrial Gearbox, Gears
Manufacturer & Repairs

A Leading British and Worldwide Designer, Manufacturer & Reconditioner of Industrial Gearboxes & Drives

Our Credentials

Established in 1927 with a wealth of experience and expertise in the worldwide design and manufacture of gears and gearboxes in a variety of industries

Due to our vast knowledge of Gearboxes we can strip and supply a full report on all manufactured gearboxes and report on the full cost of the repair in no time at all. Complete in-house manufacturing enables our highly experienced technicians to re-engineer any internals required for your particular gearbox.

All production of our parts is done in-house at our Huddersfield site enabling us to trace everything used in production and monitor their progress through our ISO9001:2015 management system.

Your industrial gearbox will always come with a detailed inspection report about what we have found, a summation of what our gearbox specialist carried out and any requirements we suggest you need. No matter how big or small the job is our engineers will draw on their years of experience, provide quality workmanship and have your industrial gearbox fixed for complete peace of mind and minimal downtime.

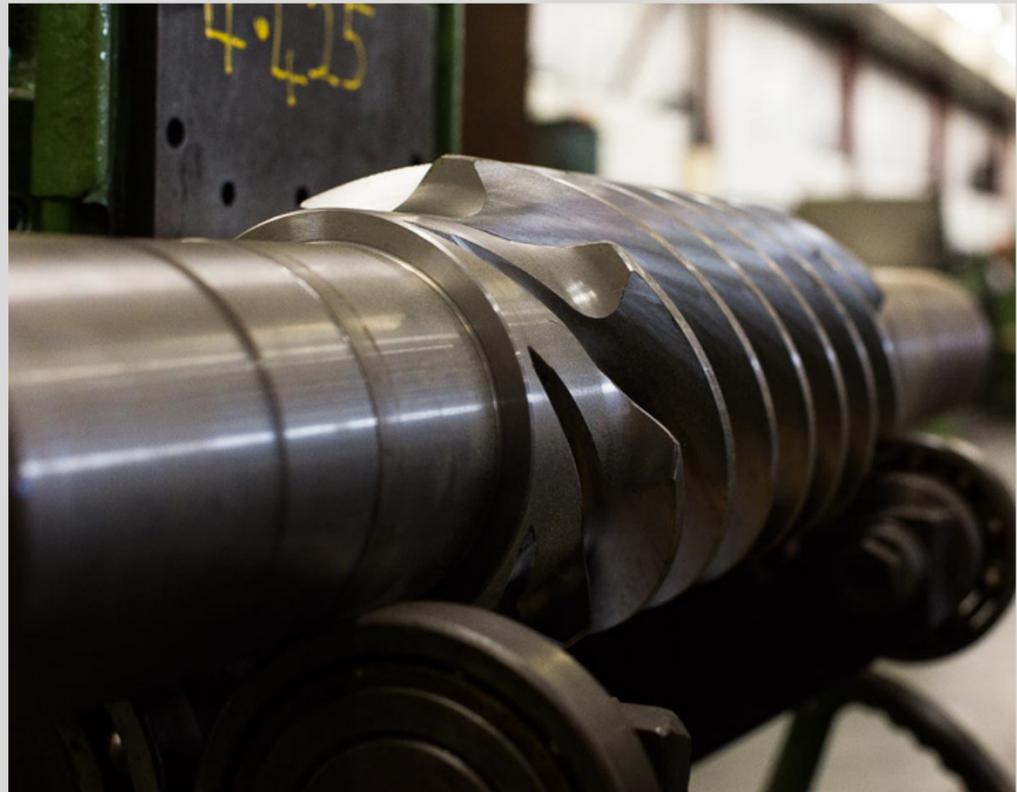

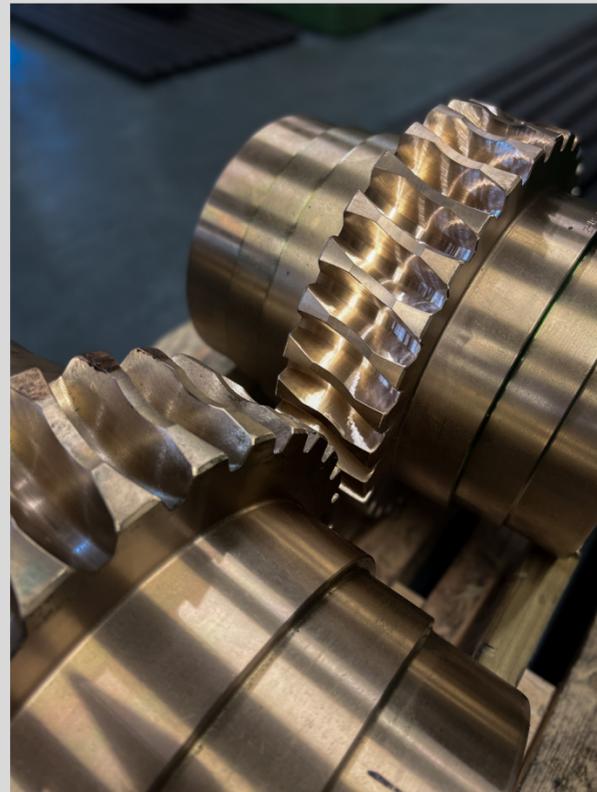

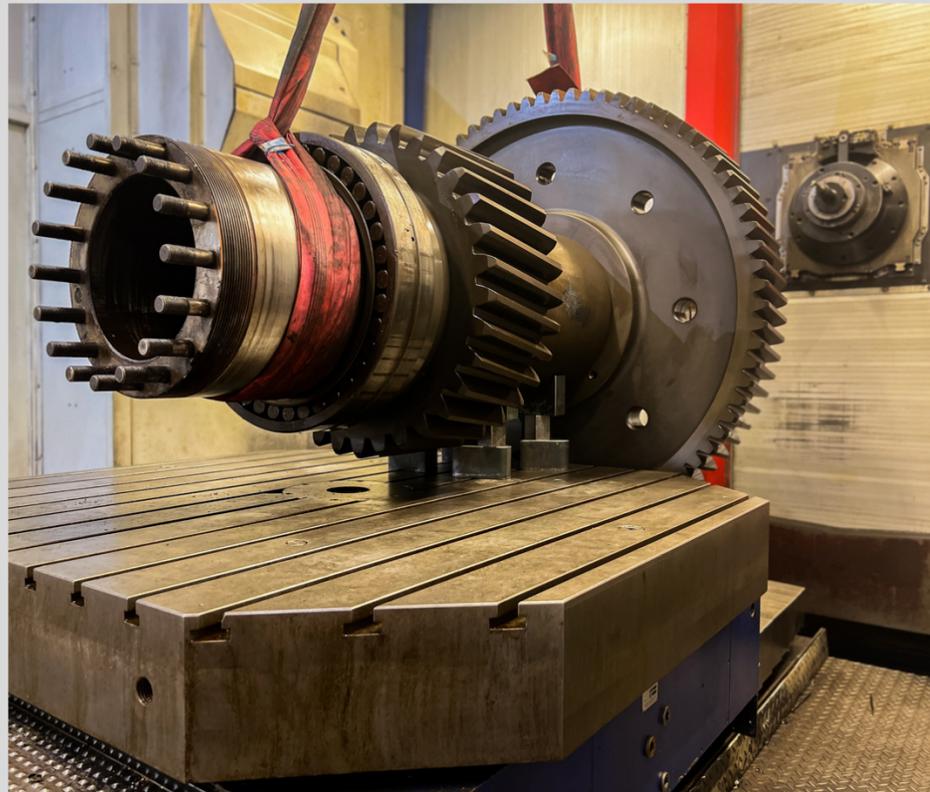

Gear Manufacturing

Highfield Gears & Machining Ltd offer spares for any type of gearbox, not just the Highfield range!

These include;

Radicon, Hansen, Siemens, Sumitomo, Flender, Santasalo and many more.

We are able to manufacture any replacement component for any gearbox either from your samples or drawings. A drive towards continued investment in our facility means that we can manufacture a wide range of gears from Wormshafts, Wormwheels, Helical, Double Helical and bevels.

Industries? We got you covered

Polyurethane/Plastics

Packaging Industry

Sugar Processing

Pigments & Dyes

Oil & Gas

Food & Beverage Production

Power Generation

Aerospace & Defence

Water Treatment

Mining & Quarrying

Metals Processing

Building & Construction

HIGHFIELD
Gears and Machining Ltd

Highfield Gears & Machining Ltd maintains a policy of commitment to customer satisfaction for service, quality and value.

The Highfield approach is both dynamic and flexible, allowing us to interact with our customers 24/7 no matter where they are in the world and respond rapidly with solutions for their practical need.

Our focus is always customer orientated, putting you at the heart of everything that we do. Offering a complete service to ensure we minimize down time and keep your plant running at full capacity.

We are an ISO 9001: 2015 accredited precision engineering and CNC machining company.

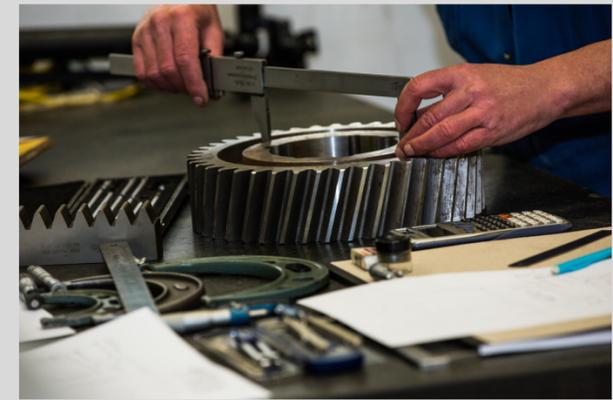

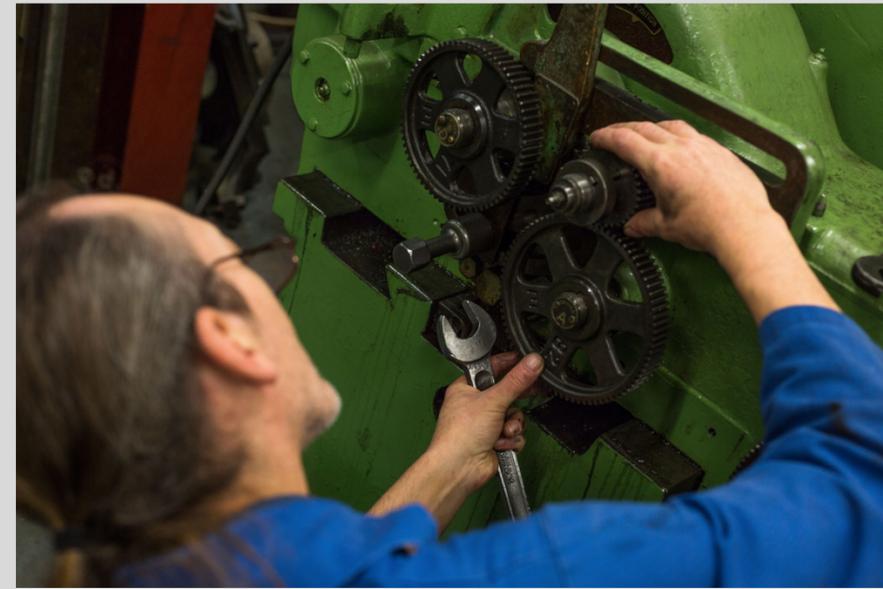

We deliver exceptional levels of quality and customer service to clients across both UK and International markets.

Where we differ

- Full range of in-house capabilities for repairing gearboxes – CNC Machining, Gear Cutting, Fitting Bays
- Technical expertise in the manufacture and repair of any type of industrial gearbox having been established since 1927
- Specialists in manufacturing Gears including Worm, Bevel, Helical, Spur etc
- Site services including installation and removal of gearboxes, sitework, site surveys and maintenance checks.
- Available 24/7, Handling of collections and deliveries anywhere in the world
- Repairs specialist of hydraulics/pneumatics cylinders
- 300Ton Press on site
- CAD Drawing to reverse engineer gearbox internals for your records
- 12 Month warranty on all reconditioned units
- ISO9001:2015 Accredited
