

Mold Solutions

MEET US

MOLD SOLUTIONS

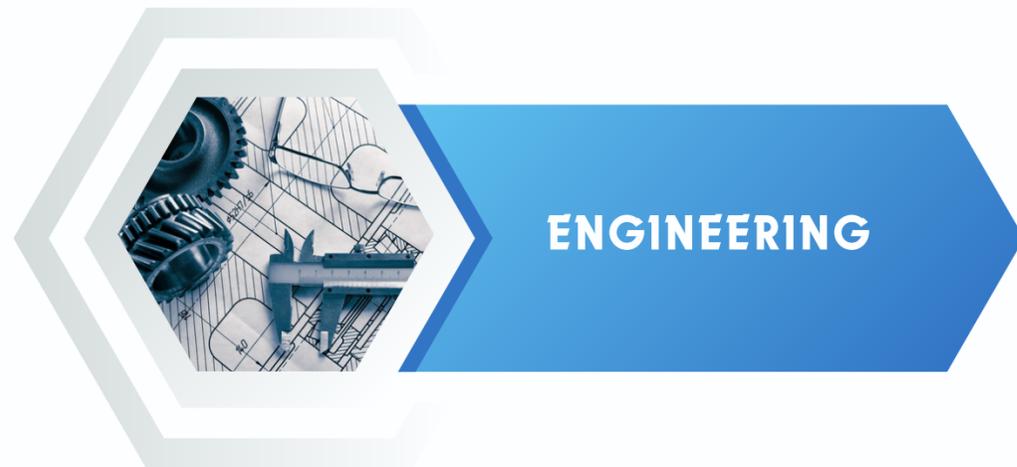

INTRODUCTION

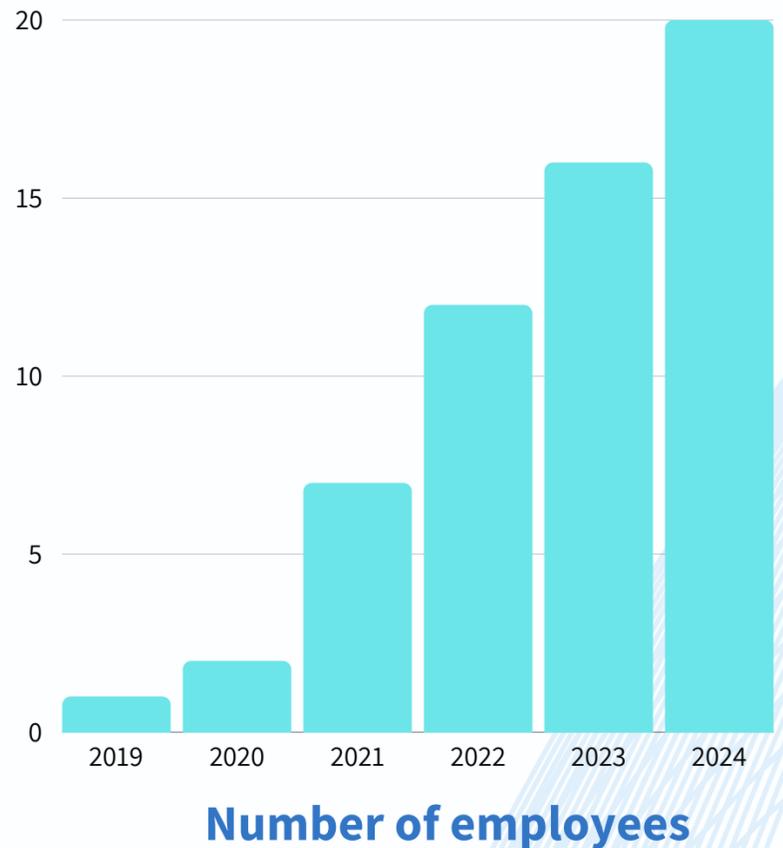

Mold Solutions, founded in 2019 in Kragujevac, Serbia. Our core business focuses on the injection molding of plastic products and the manufacturing of molds for plastic injection. We offer end-to-end services, from design to production, for industries like automotive, electronics, and packaging. Focused on quality, we are **ISO 9001 certified** and utilize advanced quality control methods. Our expert team ensures precision and reliability throughout the project lifecycle. Mold Solutions delivers efficient and tailored mold solutions to meet all of your diverse needs.

SERVICES WE OFFER

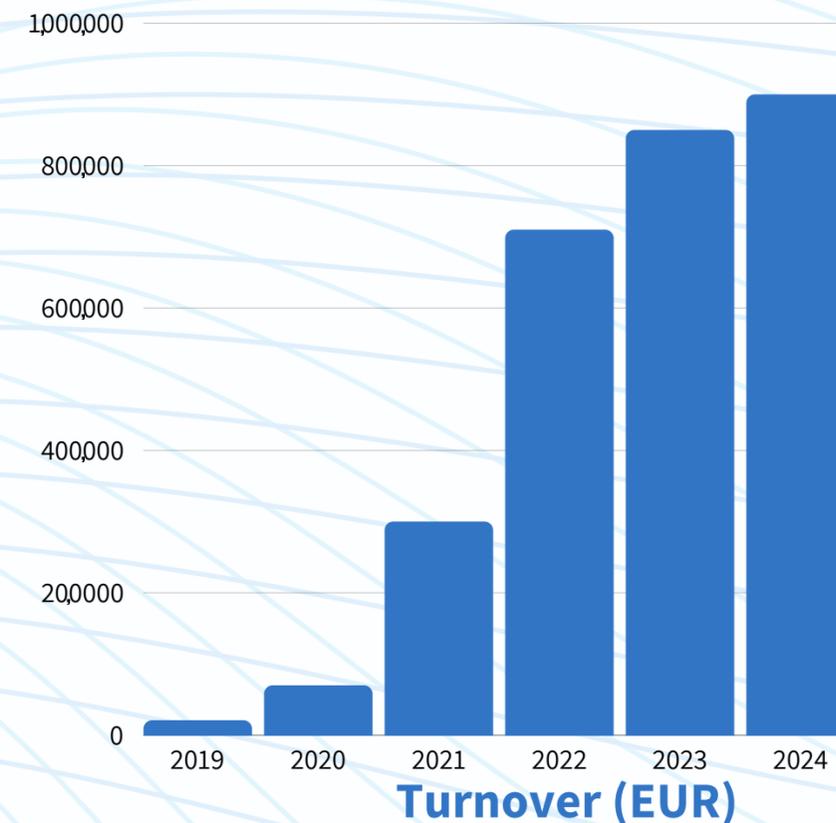

MOLD SOLUTIONS TIMELINE

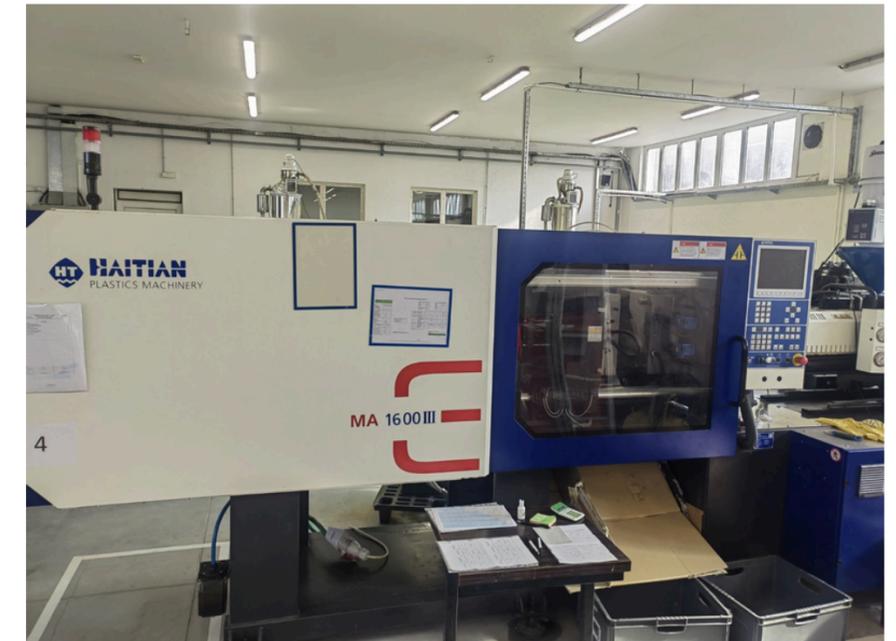

Over the years, our company has steadily expanded its human resources potential, investing in talent development and creating a strong, skilled workforce. Through continuous growth and strategic hiring, we have built a dedicated team, and today, we proudly **employ 20 professionals** who contribute to our success and innovation.

Year after year, our company has achieved consistent growth, with **turnover steadily increasing**. Through strategic investments, operational efficiency, and a commitment to quality, we continue to expand our market presence. As a result, our success keeps rising, positioning us as a stronger and more competitive player in the industry.

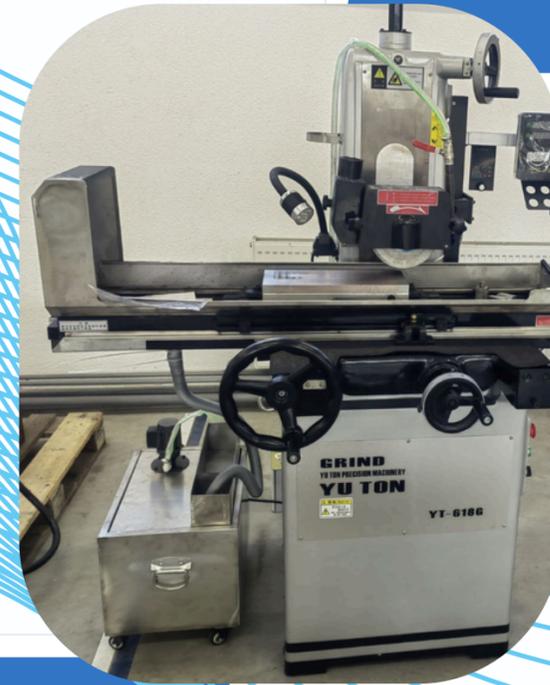

INJECTION MOLDING MACHINES

- ENGEL VICTORY 80/25 Tech (25t)
- ENGEL VICTORY 200/45 Tech (45t)
- ENGEL ES 330/75 HL-V (75t)
- Haitian MA1600III/570 eco (160t)

- We specialize in small, precise injected plastic parts up to 170 grams, with expertise in the electronics, power tools, cable, and home appliance industries.

TOOLING MACHINES

- DMG MORI ecoMill 600 V
- Mitsubishi EA8S Advance Sinker EDM
- Mitsubishi MV1200S
- YuTon grinding machine YT-618G
- Laser engraving machine MR. CARVE S4-30W
- BOAO Laser – BMII2000

- We are capable of producing tools weighing up to 600 kg, with dimensions up to 600x500 mm.

KEY BENEFITS FOR GERMAN CLIENTS

- **Competitive Pricing:** Significantly lower costs compared to Germany.
- **Proximity to Germany:**
 - 1h 50m by plane, 9h by car.
 - Easy and quick personal verification of production stages.
- **Fast Truck Deliveries:** 2-3 days.
- **Injection Molding:** Highly competitive pricing for plastic part production.
- **Production Capacity:** 30-40 tools manufactured per year.
- **Low Transport Costs:**
 - 150 EUR for a tool (250x300x300mm, 70kg).
 - 400 EUR for a tool (600x600x300mm, 450kg).
- **Expansion Opportunities:** Additional facility space for growth and investment.
- **Efficient Supply Chain:**
 - All major granulate and steel plate manufacturers have representatives and warehouses in Serbia.
 - Quick price retrieval and fast raw material delivery.
