about us

Established in 2010 in Agnosine – Brescia, Mecor Srl specialises in precision mechanical manufacturing and construction for third parties.

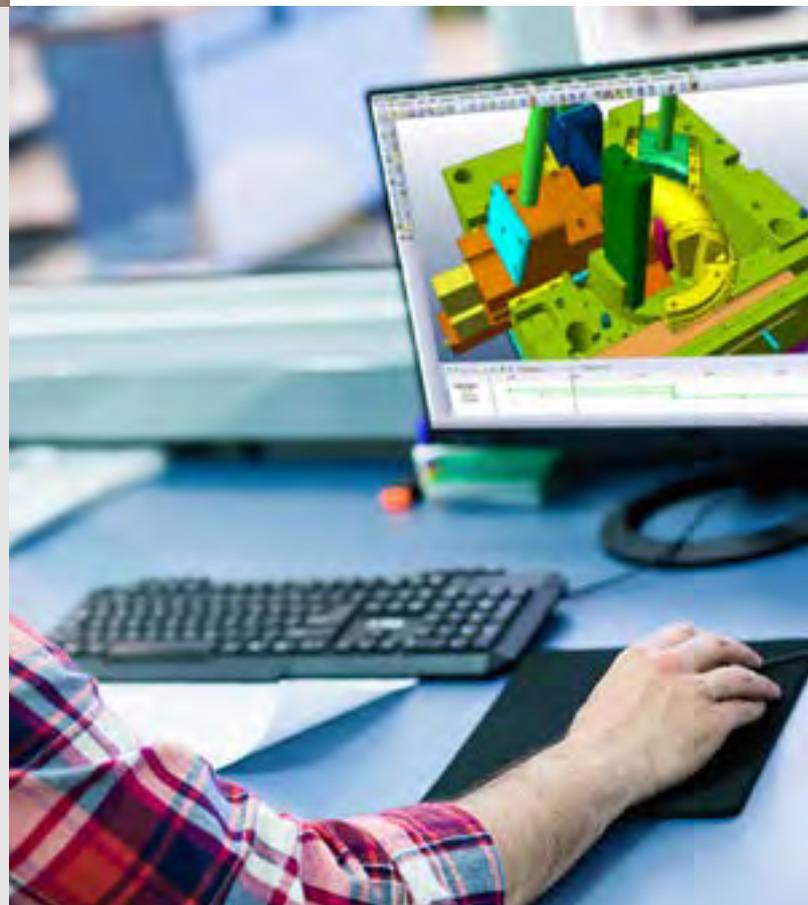

We can provide customers with a complete service, creating a collaborative dialogue that extends beyond the simple customer/supplier relationship, with the ability to satisfy any request and to create items from the design phase to the finished product.

Professionalism and competence are put at your service, with the support of new and latest generation machinery that guarantee the highest quality of the products.

design

The technical department of Mecor Srl specializes in CAD/CAM and 3D design and programming, utilizing excellent software such as Esprit Cam and Visi Cam, to ensure maximum customer satisfaction, even in complex machining processes.

Starting from the customer's request or provided drawing, we develop the manufacturing specifications for our work centers, incorporating feasibility studies, engineering, and product industrialization in close collaboration with the customer.

mechanical machining

Our company operates on vertical CNC machining centres and is specialised in the production of custom parts.

mechanical equipment

We carry out the construction of mechanical equipment for:

- ✓ Machining centres
- ✓ Transfer clamps
- ✓ Robots

individual details

We produce individual parts for:

- ✓ Furniture
- ✓ Automation
- ✓ Automotive
- ✓ Transfer components
- ✓ Nautical

milling

Services for mould makers up to dimensions 1500 x 1500 x 800 mm:

- ✓ Drilling
- ✓ Grinding
- ✓ Roughing of mould holders
- ✓ Flattening and squaring

small batches

We also produce small batches, for example:

- ✓ Samples
- ✓ Small series
- ✓ Special productions

materials

Our flexibility allows us to work and therefore to perform parts in different materials, such as:

- ✓ Steel
- ✓ Aluminium
- ✓ Inox
- ✓ Brass
- ✓ Plastic

SERVICES

Using qualified suppliers, we also offer the following services:

✓ Surface treatments

anodising of any colour, hot or cold burnishing, sandblasting, satin finishing, painting

✓ Heat treatments

remediation, phosphating, induction/TAF, nitriding, vacuum

To fully satisfy customer requests, Mecor Srl collaborates with companies and craftsmen who offer the following services:

carpentry

Medium-small carpentry work through laser cutting, waterjet cutting, and subsequent processing.

special processing

We also specialize in mechanical processing of special materials, such as:

carbon fiber

A lightweight and highly resistant composite, used in high-performance applications, such as aerospace and automotive.

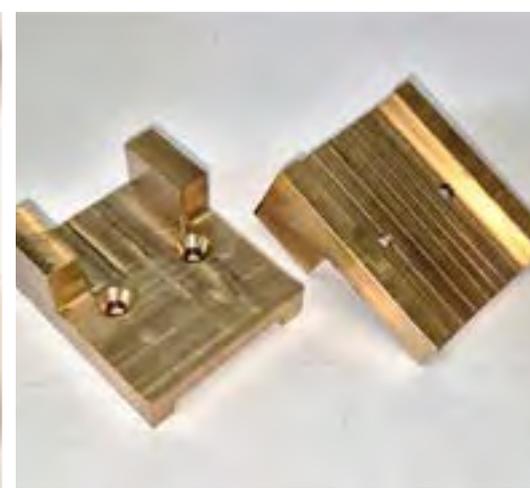

PEEK (polyetheretherketone)

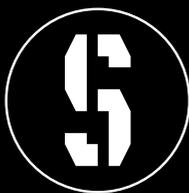

An advanced thermoplastic, known for its thermal, chemical, and mechanical resistance, used in extreme environments like aerospace and medical applications.
