

HOW WE WORK

The great advantage of BIKS is its fast and **efficient order management system**. In this field, time and money are often wasted in the various phases that accompany the actual processing.

These phases include finding suppliers for particular finishes, organizing transport, and the endless exchange of emails and reminders.

It is precisely these aspects that BIKS has focused on the most, **significantly streamlining procedures while maintaining a high standard for the final result**.

**YOUR STRATEGIC PARTNER
FOR MECHANICAL
PROCESSING**

WHO WE ARE

Biks is a dynamic and qualified company as a supplier of products and solutions in the field of mechanical constructions and CNC machining.

STRENGTHS

Optimization of times and costs.

Clear and agreed work cycle.

Project manager dedicated to each order.

Maximum confidentiality of all drawings and projects.

Development of synergies and partnerships.

Guaranteed and on time payments.

Dedicated technical assistance for each supplier, to avoid machine downtime.

Single point of contact for all orders.

Orders and order proposals, with construction drawings of the details, always on time.

Higher margins on the market, thanks to integrated management of the order with 4.0 technology.
