

SERWOTECH

where quality meets machining

SERWOTECH specialises in the contract production of metallic and plastic components customised to the individual requirements of the clients.

Our quality has been appreciated on the most demanding European markets, such as Austria, Belgium, the Czech Republic, Finland, France, Germany, Norway, Switzerland, Hungary and the USA.

We have modern machinery, a team of qualified engineers and experience in industries with the most stringent quality requirements, such as the automotive sector and aviation, and we can successfully complete even the most demanding jobs.

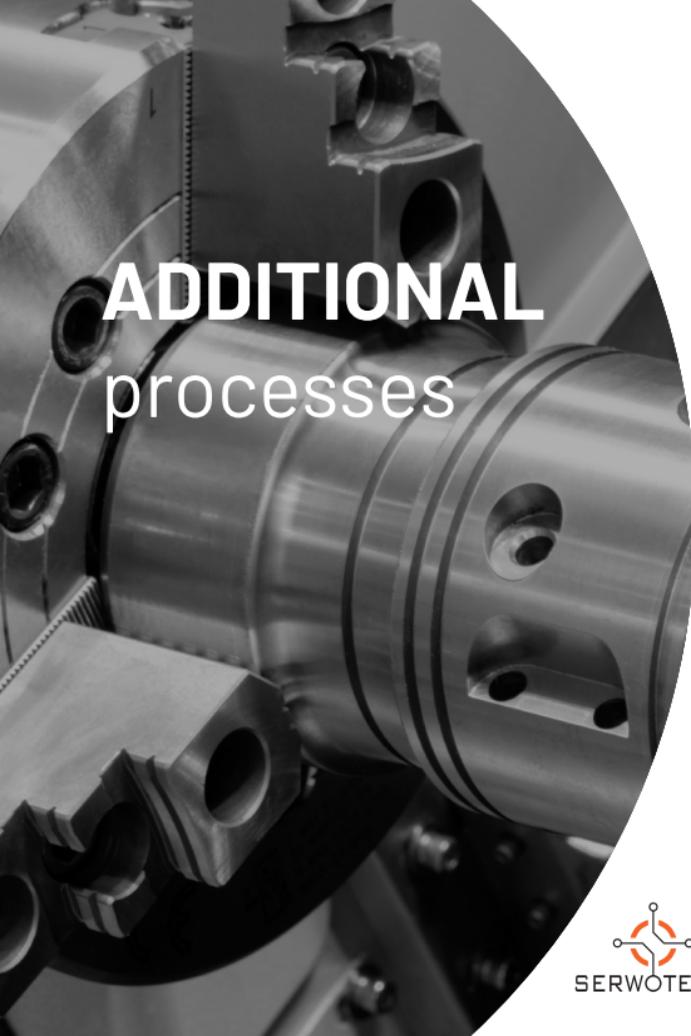

# SERWOTECH today

- Over **40 employees**
- **20+ CNC machines** from top manufacturers: Mazak, Nakamura, Makino, Star, Traub, Fanuc
- Highly automated production: gantry robots, bar feeders, pallet inverters, industrial robots, **dedicated production lines** for large-batch production
- Well-equipped **testing laboratory**: coordinate measuring machine (CMM), Keyence optical measurement systems, Mahr roughness tester, Mitutoyo electronic height gauge

# PRODUCTION capabilities

- Milling **complex workpieces** (4- and 5-axis machinery)
- Turned parts and turned and milled parts of up to **1000 mm in diameter**
- **Precise parts** turned and milled using Swiss-type CNC
- **Large-batch turning** on fast Mazak IVS machinery
- Machining of **difficult materials**: INCONEL, Hastelloy, Monel
- Making **deep holes** in difficult-to-machine materials (e.g., Hastelloy)
- **Individual machining** of complex and critical product parts

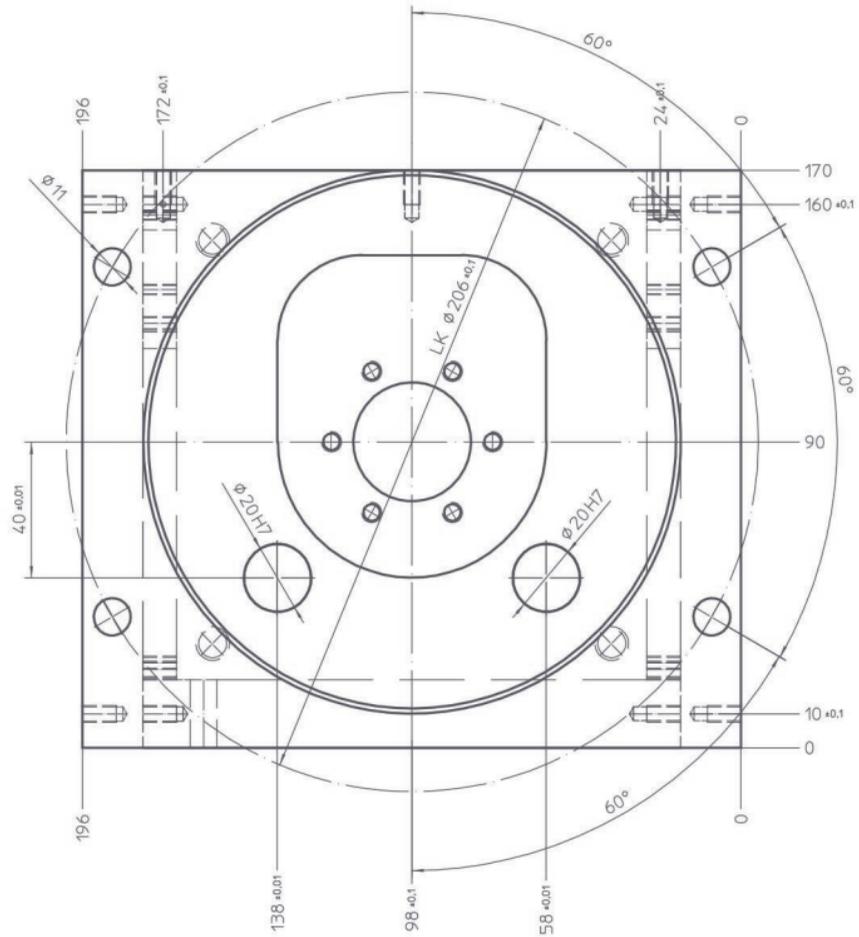

## ADDITIONAL processes

- Fully **automated measurement systems** integrated with production lines – up to 100% measurement of critical workpiece features
- **Vibro-abrasive treatment** of parts (deburring, polishing)
- Cooperation with proven suppliers of **galvanic and paint coatings** for batch production, including ZnNi zinc-nickel, zinc plating and KLT cataphoretic painting
- High-quality **laser marking** of components – batch production using laser marking systems from Keyence
- **Cleaning and washing** the components
- **Assembly** of components
