

SARI METAL LTD.

LASERCUTTING AND SHEET METAL WORKING
ISO 9001:2015

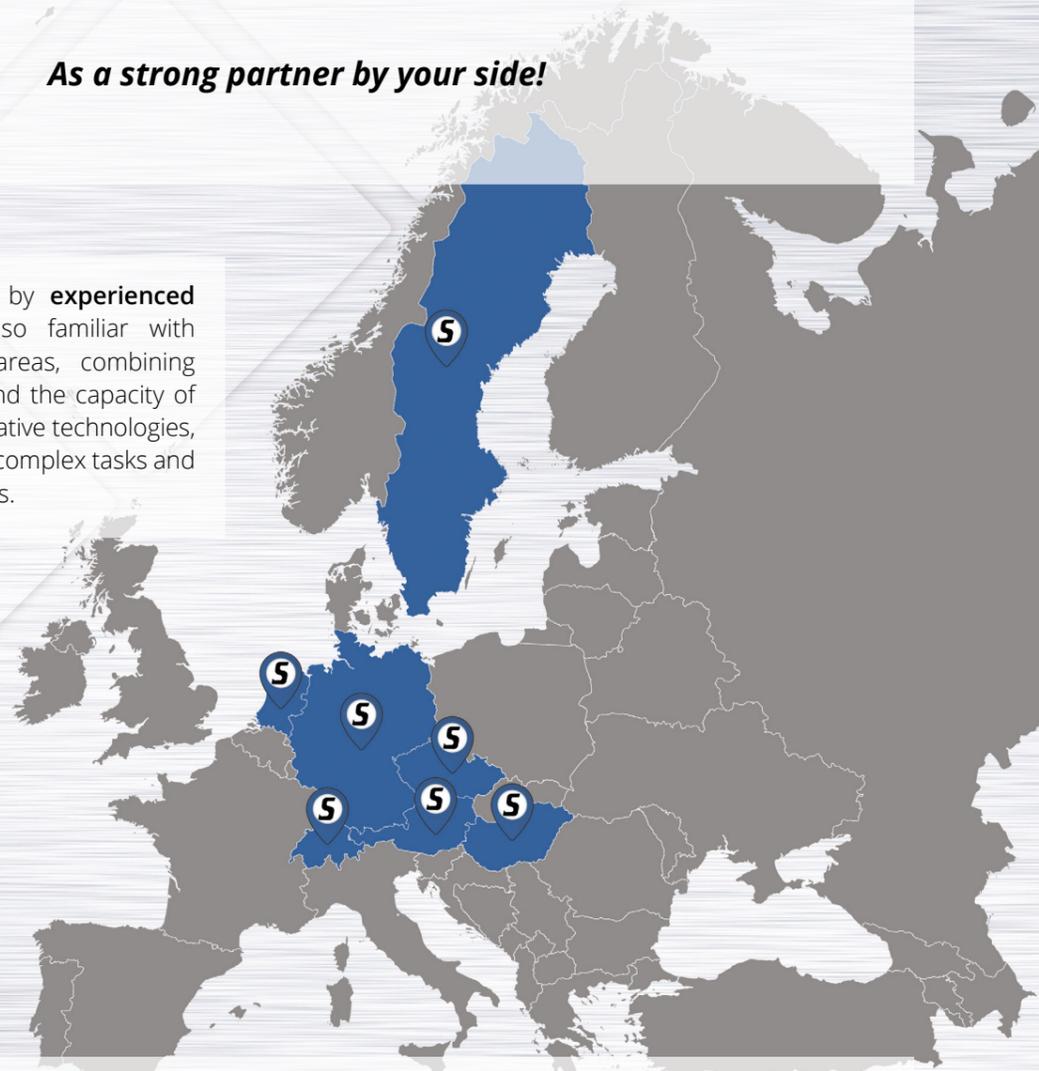

Our company's long experience and thorough knowledge of modern technology to facilitate the processing guarantees arising high demands of unique or series production. When developing complex equipments we cooperate closely with our innovative partners and strive to achive the most optimal construction, this cooperation complements our range of services, so we offer personalised solution for all problems.

We are using 3D CAD software for designing that visuality makes easier the work and controls the material and cost-efficient production of the construction. The processing of our orders happening to a short deadline because of our intelligent perspectives providing stock and works in shifts makes it possible. Therefore we can be excellent partners for small and large enterprise claims equally.

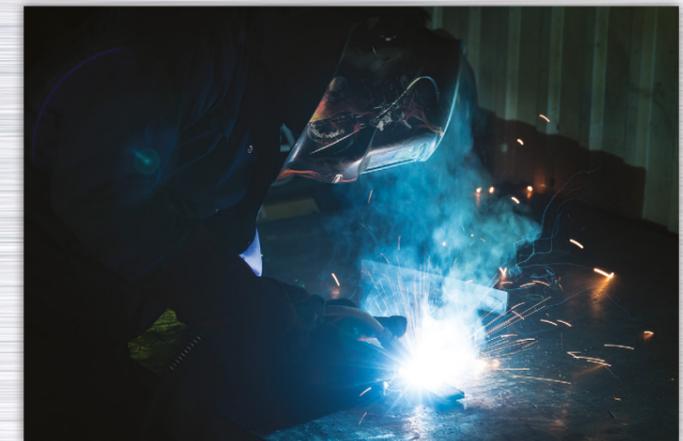

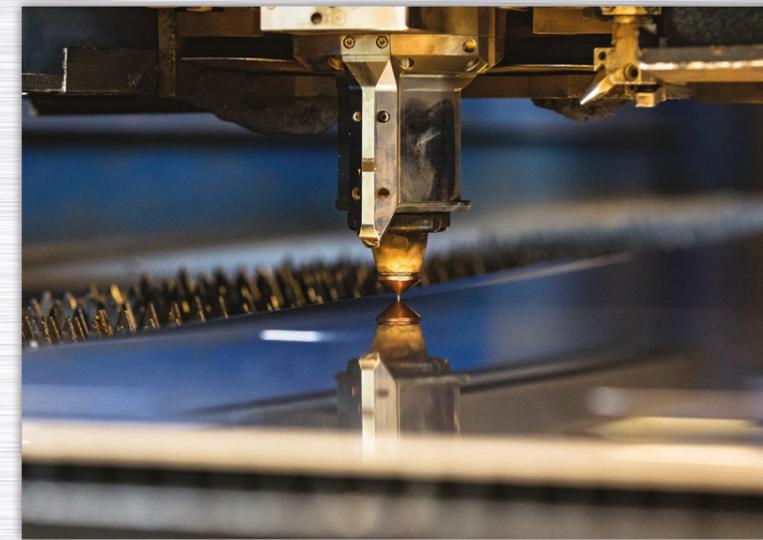

Sari Metal LTD. is an ISO 9001:2015 certified company.

As a strong partner by your side!

Our work processes make by **experienced professionals**, who are also familiar with multiple plate machining areas, combining their extensive knowledge and the capacity of our machines following innovative technologies, we are able to execute more complex tasks and to accomplish complex orders.

Our company provides manufacturing capacity, expertise and resources to many European countries. Our goal is to further expand the number of global partners and to develop existing relationships.
