Metal Signage & Lettering Solutions

Custom metal solutions for Werbertechnik & Branding projects

We build the metal behind your brand.

WHAT WE DO

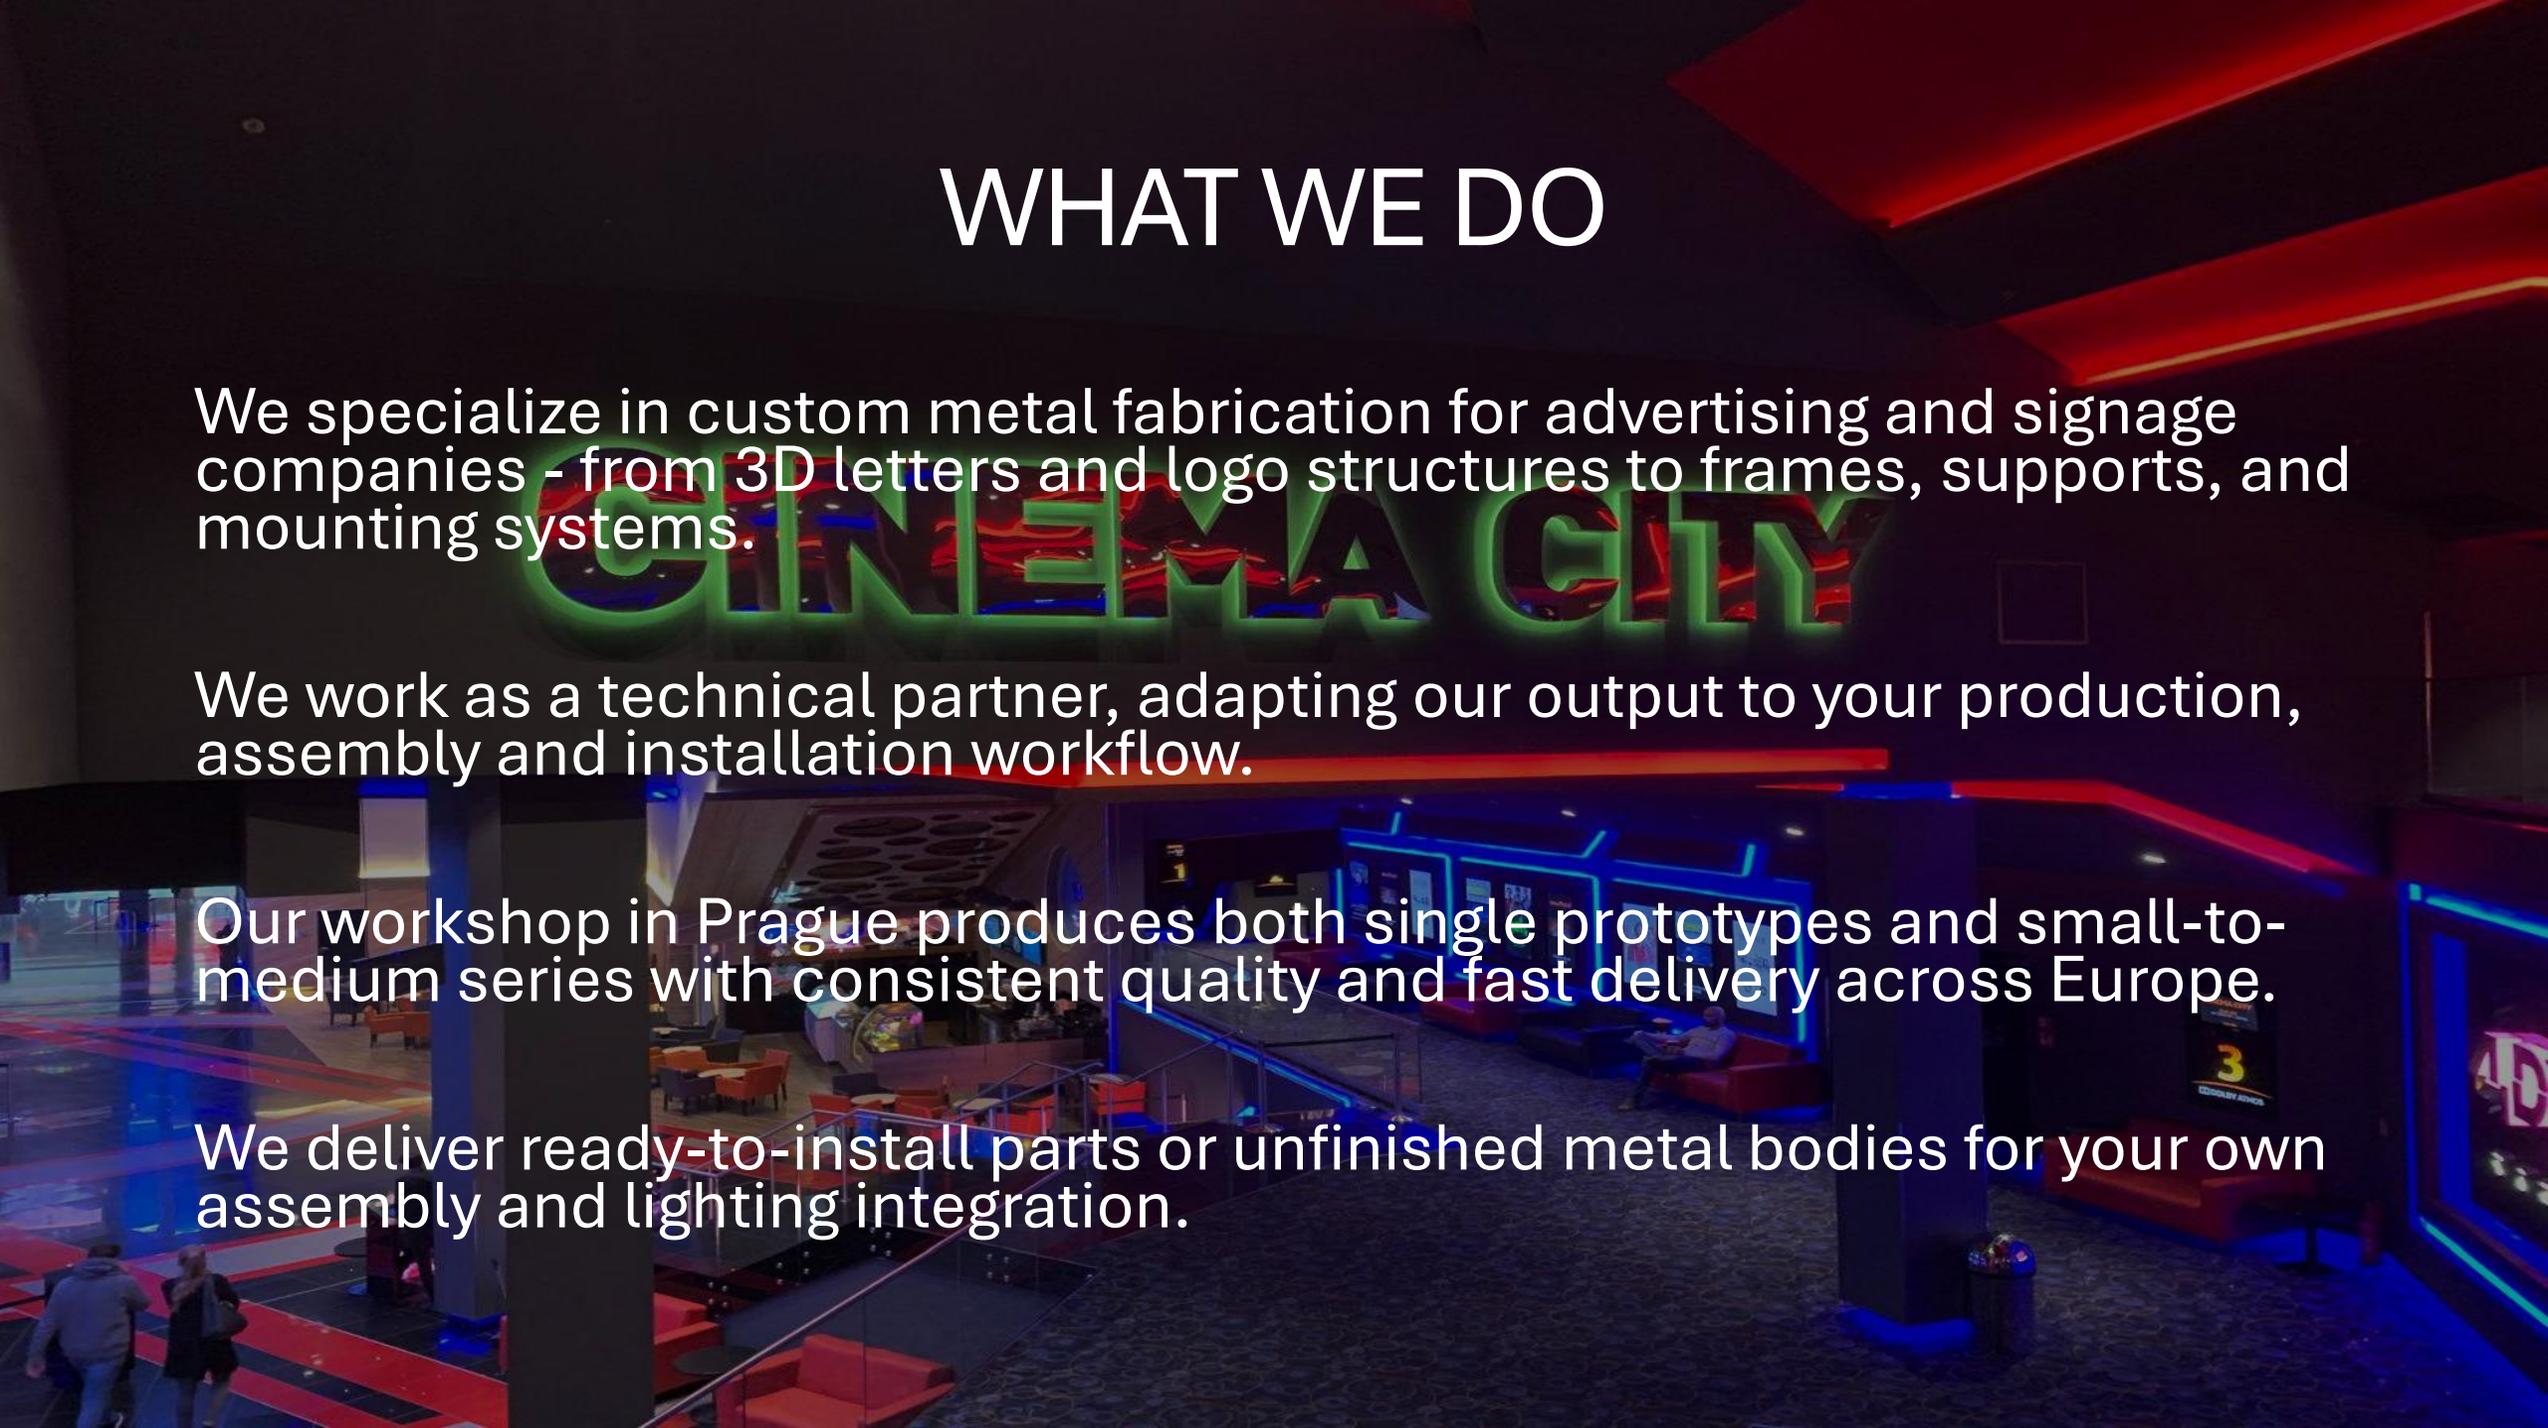

We specialize in custom metal fabrication for advertising and signage companies - from 3D letters and logo structures to frames, supports, and mounting systems.

We work as a technical partner, adapting our output to your production, assembly and installation workflow.

Our workshop in Prague produces both single prototypes and small-to-medium series with consistent quality and fast delivery across Europe.

We deliver ready-to-install parts or unfinished metal bodies for your own assembly and lighting integration.

CINEMA CITY

HOW WE WORK

From your design to finished metal parts

Send your design

We work from DWG/DXF, vector files, or even hand sketches

Technical check & optimization

We help adjust geometry and joints for smooth fabrication and assembly

Production & finishing

TIG/MIG welding, laser cutting, grinding - followed by powder coating, polishing or galvanizing

Quality control & packaging

Every part is checked, labeled, and securely packed for transport

On-time delivery across Europe

Reliable lead times, clear updates, and safe shipping - directly to your workshop or client

We understand your process - accuracy, deadlines, and communication that works between partners

EXAMPLES & REFERENCES

Cinema City – Custom Metalwork for Czechia & Slovakia

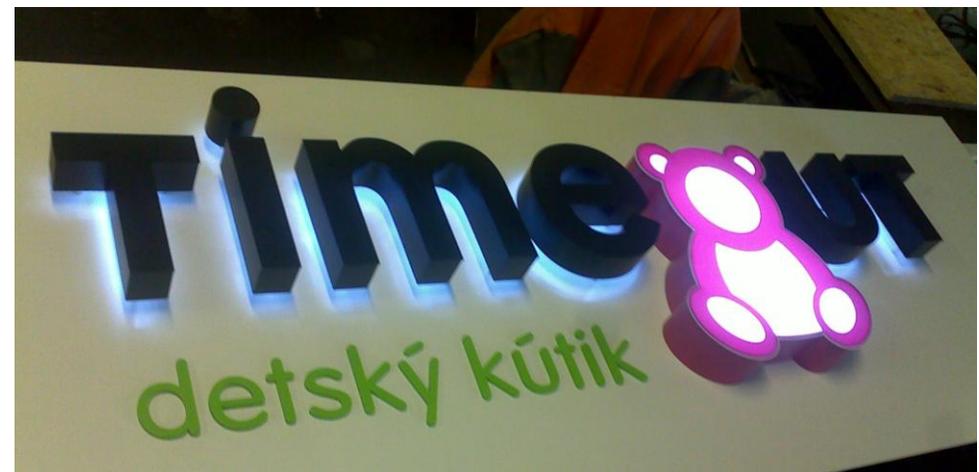

We produced and installed custom steel and aluminum components for several Cinema City locations across Czechia and Slovakia.

Scope: structural frames, decorative panels, and lighting fixtures.

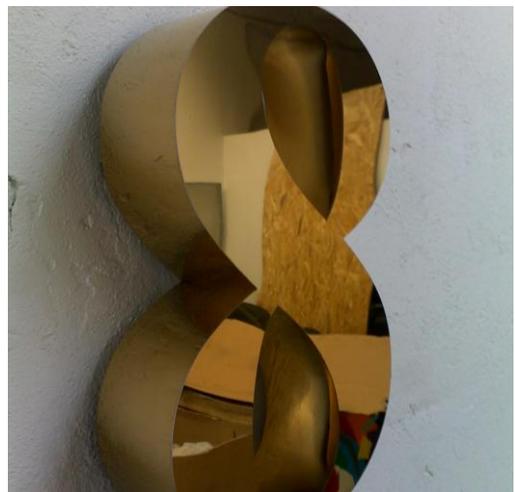

Challenge: tight deadlines before grand openings, integration with signage and lighting systems.

Result: strong, clean, and durable elements that supported the visual identity of the brand across multiple venues.

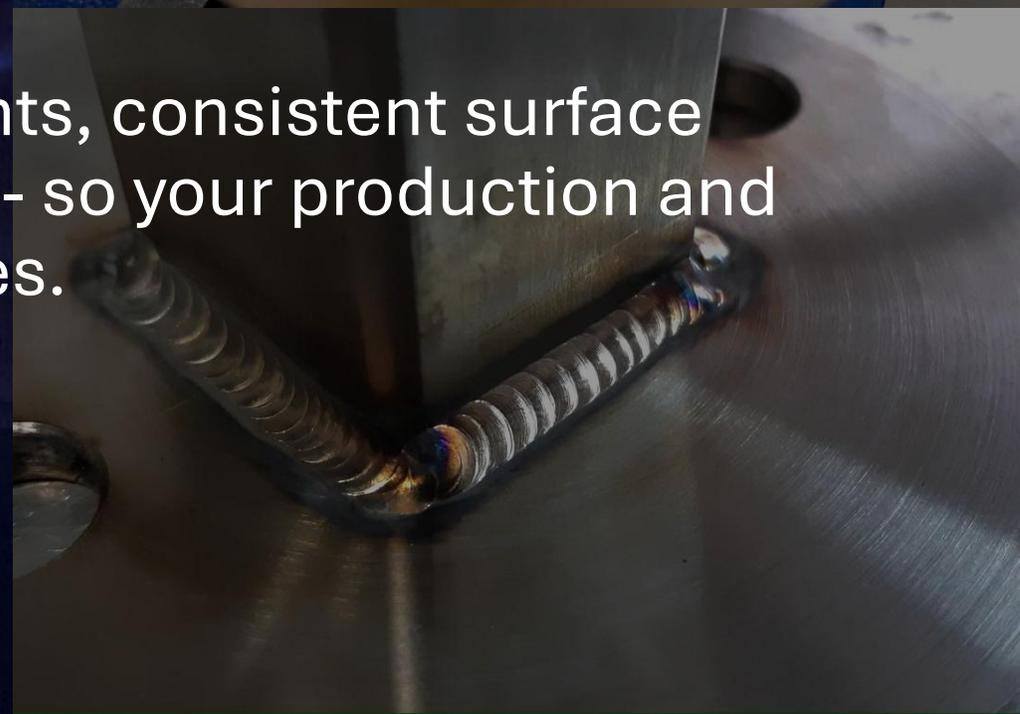

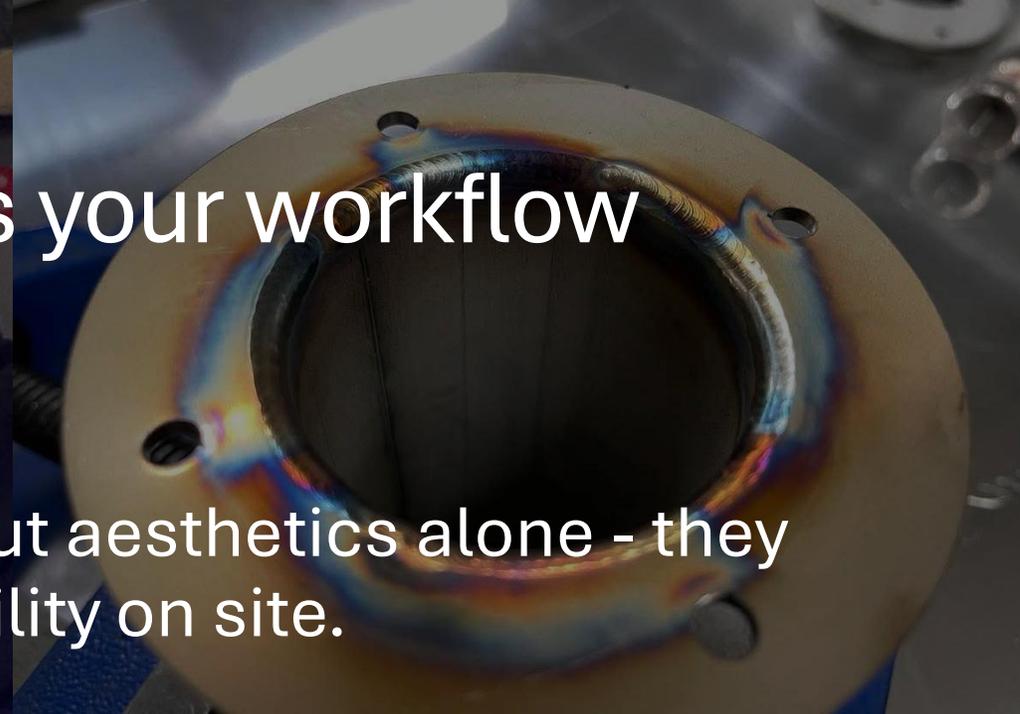

Attention to detail that supports your workflow

In signage production, details are not about aesthetics alone - they determine fit, assembly speed, and reliability on site.

We focus on precise tolerances, clean joints, consistent surface finishes and practical mounting solutions - so your production and installation run smoothly, without surprises.

A reliable metal partner for signage and branding projects

We support signage and branding companies with precise, reliable metal fabrication - built to fit your production, assembly and installation process.

Clear communication, predictable execution and respect for detail are standard parts of how we work

If you see a potential fit, let's discuss how we can work together
