

RESEDA d.o.o. – CNC Machining & Assembly Partner

Company Overview

Founded in 2003 | 93 Employees | Nova vas pri Markovcih, Slovenia

About Us

RESEDA is a highly specialized CNC machining and assembly partner located in Slovenia. With a strong European presence and over 20 years of experience, we serve demanding industries such as automotive, defense, semiconductor, and aerospace. We deliver production series from 1 to 10,000 pieces, combining flexibility with precision.

Core Competencies

- CNC Turning (up to Ø400 mm x 800 mm, bar feeders, driven tools, Y-axis, robotic loading)
- CNC Milling (3-axis and 5-axis, parts up to 1200x580x500 mm or Ø550x400 mm)
- Wire and sinker EDM, lapping, grinding, balancing, slotting
- Surface treatments: anodizing, nickel plating, hardening, painting (via partners)
- Quality: 4x CMM (Zeiss, Tesa), hardness, surface roughness, electric/pneumatic tests
- Complex assemblies with 500+ components including electronics, hydraulics, pneumatics

Industries & References

We serve customers in the automotive, vacuum, defense, aerospace, painting and wood-processing industries. Key clients include OEMs and Tier-1 suppliers across Germany, Austria, Switzerland and Liechtenstein.

Certifications

- ISO 9001:2015 (Quality Management)
- ISO 14001:2015 (Environmental Management)
- EN 9100:2018 (Aerospace Quality Management)
- AAA Platinum Creditworthiness Rating

Capacity & Growth

Two existing facilities with 5,500 m² combined. New 1,500 m² facility under construction to be operational by Q3 2025, ensuring increased capacity for future projects.
