

About us

Our company has been providing CNC machining services since 2004. We are constantly improving our competences and investing in the modernisation of our machinery.

We are able to offer a comprehensive range of CNC machining services - milling, turning, threading, drilling but also welding.

Our products

The only difference between success and failure is the ability to take action...

~Alexander Graham Bell

...And we will take every necessary action to bring your idea to life!

Materials

Our current machine park enables us to process a wide range of materials, including:

- stainless steels
- grey and ductile cast irons
- plastic materials
- non-ferrous metal alloys
- aluminium alloys
- alloy steels

We have collaborated with major clients operating in the domestic and international markets both. Our partnerships are built primarily on mutual understanding of needs, transparency in financial relations, and continuous exchange of experience.

Partners

Welding

We offer the production of welded steel structures and other steel components with short lead times at competitive prices. Our steel structures and other steel products are manufactured using our own existing machinery and equipment, which allows us to operate across a wide range of services, including:

- preparation of the necessary documentation
- fabrication of parts and components
- welding of steel structures
- anti-corrosion and fire protection treatment
- delivery of structures to the installation site

Thanks to our extensive experience in the industry, we are able to meet the demands of even the most challenging projects and ensure high-quality workmanship. Regardless of the size of the order, we treat it as a priority and strive for its efficient and timely completion.

To provide comprehensive service, we also offer machining services and maintain ongoing cooperation with companies that provide laser cutting of sheets and profiles, press brake bending, and coating of components with various types of finishes. We invite you to explore our machine park on our website: www.plastmetcnc.pl.

Machining

Why us?

PRECISION

In our processes, there is no space for error, thanks in part to a detailed analysis of product requirements.

TECHNOLOGY

We use tools only from trusted manufacturers. For non-standard orders, we also produce our own custom tools.

QUALITY

Multi-stage supervision combined with a modern machine park ensures that the finished components fully comply with the established quality and dimensional standards.

EXPERIENCE

Our many years of experience in executing projects for clients both in Poland and abroad is a guarantee of efficient and comprehensive execution, even for the most complex orders.

Quality

Our company places particular emphasis on environmental protection and occupational health and safety. We have implemented and adhere to a quality management system in accordance with the requirements of the PN-EN ISO 9001:2015 standard.

Team

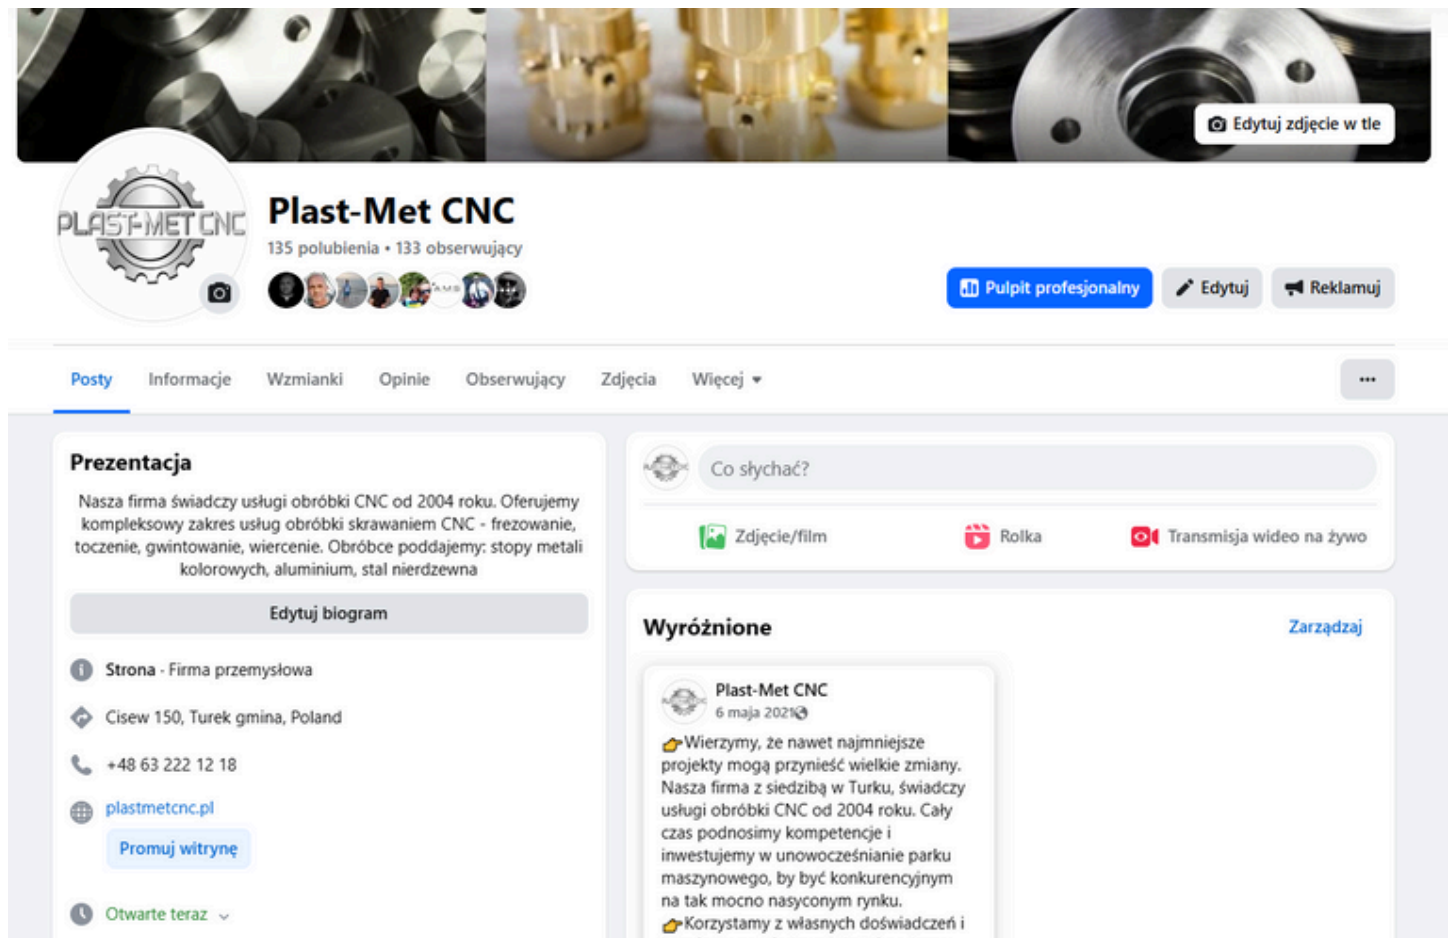

Our team is made up of experienced specialists in CNC machining and welding. By combining knowledge, skills, and a passion for modern technologies, we successfully carry out even the most demanding production projects. Every day, we work on improving our competencies — we participate in training sessions, stay up to date with industry trends, and implement innovative solutions that help us enhance the quality, precision, and efficiency of our work.

For us, production is more than just a job — it's a passion that drives us to continuously grow and take on new challenges. At every stage of cooperation, we provide professional technical support — helping to select the most effective technological solutions, optimizing processes, and sharing our expertise with clients.

Our strength lies in a well-coordinated team that brings together specialists from various fields, working together toward a common goal. We prioritize partnership-based collaboration and an individual approach to every project. Thanks to our commitment, precision, and openness to client needs, we build long-term relationships and deliver a high level of satisfaction with our services.
