

High-performance gaskets and technical articles for industries and the aftermarket

CENTAURO S.R.L. was founded in 1958 and it is specialized in the design and production of high-performance gaskets and sealing elements for every business sector. Centauro brand is present worldwide, with customers in over 50 countries. The company has continued to grow over the years, securing important distribution agreements with Victor Reinz, a market leader in the production of gasket materials, and with Grena A.S., a European leader in the production of high temperature insulation boards. An important step in Centauro's growth process is the recent acquisition of Infinity Parts S.r.l., a company based in Friuli with significant technical know-how in gaskets, seals and insulation for the heating sector.

Increased market presence, thanks to our 2 production sites

ISO 9001 Certification

Production synergies resulting from the combination of different technologies

High flexibility and speed of service

Structured approach to customers and markets

Cutting-edge machinery

INDUSTRIES

Vision

Most of the products contain at least one gasket. We want to be present in each of them, offering products with high quality and reliability.

Mission

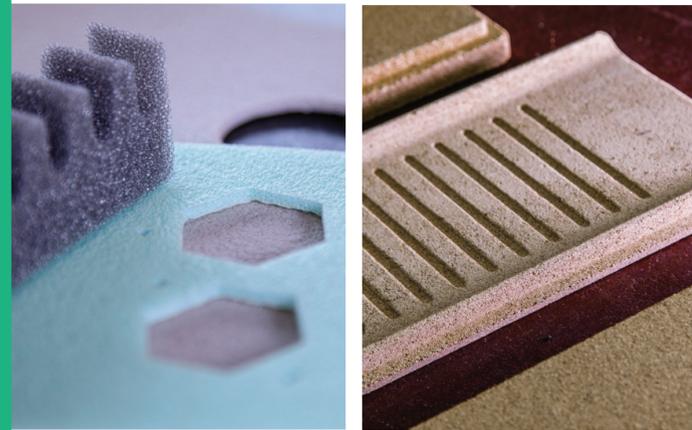

For over 60 years we have been investing in technology, innovation and constant staff education to guarantee increasingly performing products and the highest quality standards.

Vision

Our primary goal is to provide our customers with a product that is interchangeable with the original, thanks to over 60 years of experience acquired.

Mission

We have transferred to the aftermarket world the experience gained with the OEM companies. Our product range is unique in the world for its extreme compatibility with the original aftermarket parts.

Centauro works in compliance with the UNI EN ISO 9001/2015 quality procedures, to guarantee the complete products' traceability in all production phases. The final result is a product free of manufacturing defects. We invest a lot in research and development of new technologies, as well as in the constant updating of our machinery and the training of our employees.
