Process organizational structure

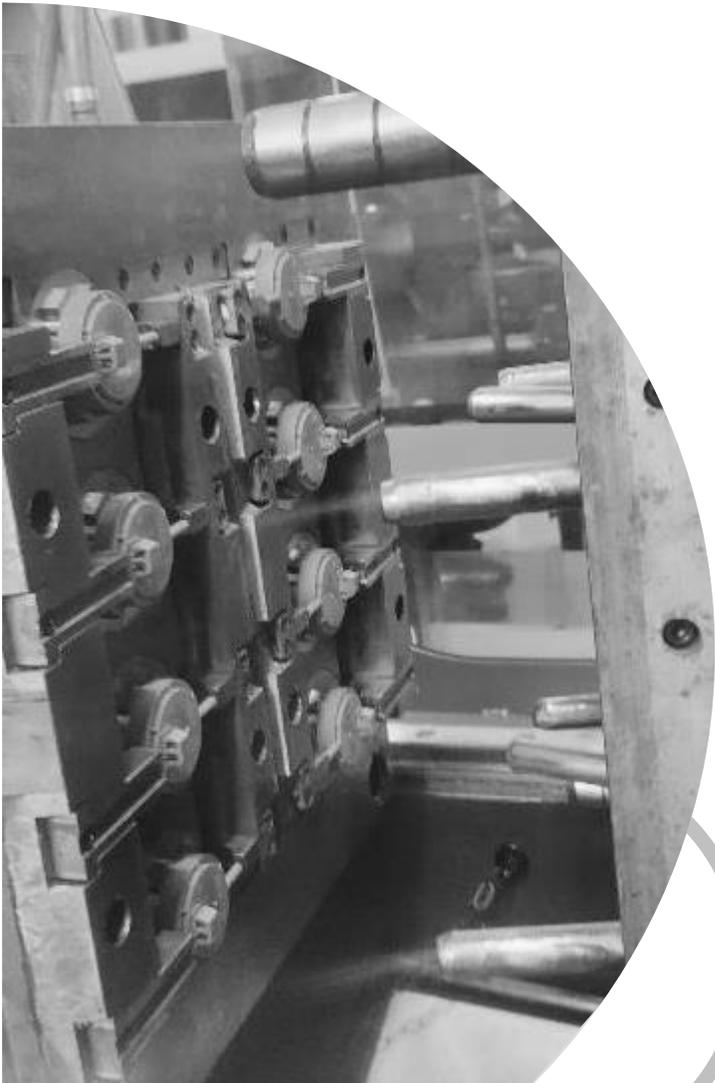

Technology and Materials

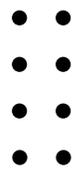

TECHNOLOGY WE DO

- Injection moulding
- Overmoulding of various (metal) inserts
- Simple assembly of different components

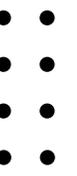

MATERIALS WE PROCESS

- PC - Polycarbonate
- PA - polyamide
- PP - Polypropylene
- PE - Polyethylene
- POM - Polyoxymethylene
- PBT - Polybutylene terephthalate
- ABS - Acrylonitrile butadiene styrene
- Other

PRODUCTS

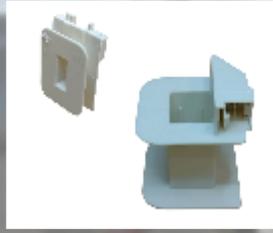

HOUSE-HOLD APPLIANCES

AUTOMOTIVE

VENTILATION SYSTEMS

CONSTRUCTION

Production and Warehouse

INJECTION MOULDING MACHINES RANGE: 25T TO 120T

- 4x 25T – 45T machine
- 7x 50T – 80T machine
- 3x 100T – 120T machine

SPRUE PICKERS AND ROBOTS

- Wittmann Battenfeld WP80
- ENGEL integrated sprue pickers
- ENGEL Viper robot (3-axis)
- Robotic cell for insert assembly

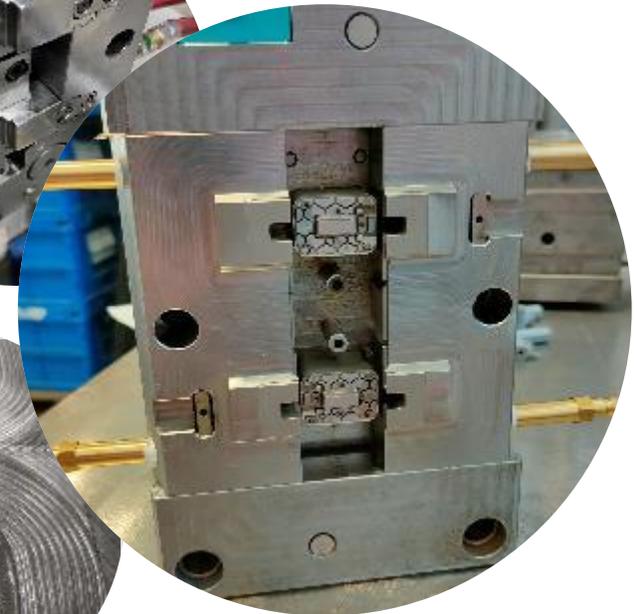

WAREHOUSE SPACE

- 198 pallet rack spaces
- additional 200 m² floor warehouse space

Tool shop

A carefully made tool is a prerequisite for a perfect product. VARSPOJ d.o.o., in cooperation, develops, manufactures and maintains all its tools for thermoplastics injection moulding.

Quality system

Bisnode AAA business excellence

ISO 9001:2015

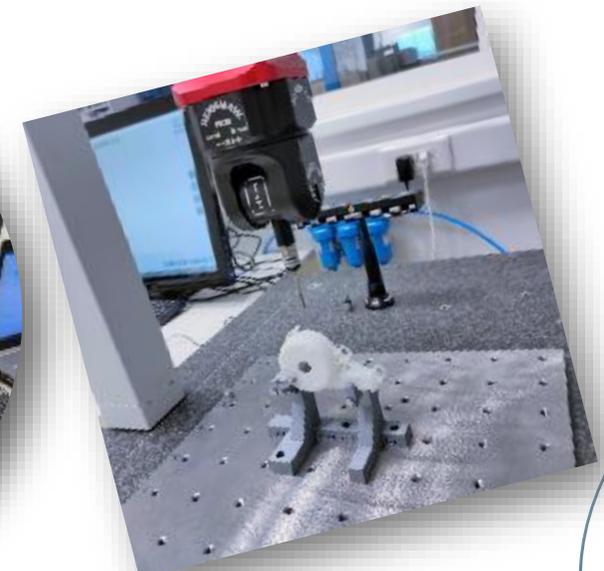

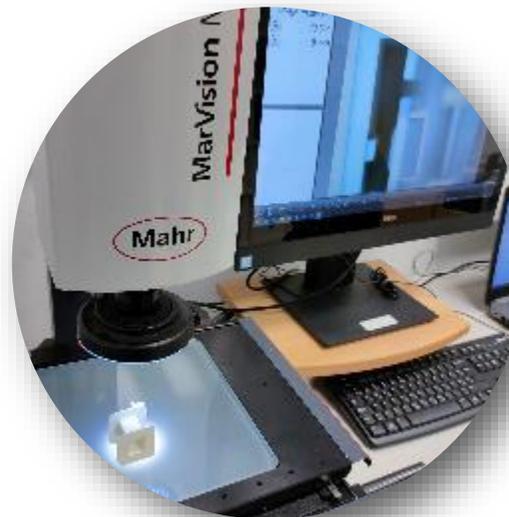

ISO 14001:2015

IATF 16949:2016

MEASURING EQUIPMENT

- 3D measuring machines Coord3 Benchmark (5 axis)
- Measuring microscope Mahr Marvision MM 420
- Mitutoyo Surftest SJ-210
- Dial gauges, digital calipers,...
