# CUSTOM METAL **MACHINING**

---

From technical drawing to finished product

CNC MILLING • LASER CUTTING • SHEET METAL BENDING • WELDING

# ABOUT US

---

## Your partner for custom metal machining

**PHA METAL** is a specialised division of **Pharmacom d.o.o.**, focused on the production of custom metal components using advanced machining processes.

With in-house production and experience gained from the development and manufacturing of technically demanding door systems at Pharmacom, we ensure high precision, consistent quality, and flexibility even for complex components.

**CNC Milling**

**Laser Cutting**

**Sheet Metal Bending**

**Welding**

## WHY CHOOSE PHA METAL?

**Experienced  
technical team**

**Fully in-house  
production**

**Flexible project  
execution**

**Consistent  
machining quality**

**Fast and clear  
communication**

# OUR SERVICES

---

## CNC MILLING

Precise 3-and 4-axis milling of metals and technical materials. Suitable for prototypes, individual parts and small series requiring high accuracy and repeatable quality.

## LASER CUTTING

Processing of steel, stainless steel and aluminium based on DXF/DWG documentation. Clean cuts, reliable quality and fast turnaround.

## SHEET METAL BENDING

CNC bending of sheet metal up to 4000 mm in length with a pressing force of 120 t. For custom structures, supports and enclosures.

## WELDING

Professional welding of steel, stainless steel and aluminium based on technical documentation. Strong, precise and durable joints.
