

ARIM-METALIS S.R.L.

High-Precision Mechanical Machining Services

Expertise in CNC milling and turning for industrial projects

About ARIM-METALIS

We are a machining workshop focused on concrete results and on-time delivery. We understand technical drawings and translate every specification into precise parts without compromise.

Our workshop combines CNC technology with hands-on experience to deliver high-quality components for industry.

Production Capabilities

3-Axis CNC Milling

Complex parts with ± 0.01 mm precision. Small and medium production runs delivered quickly.

Conventional Turning

Flexibility for cylindrical parts, threads, and fast repairs.

Wide Range of Materials

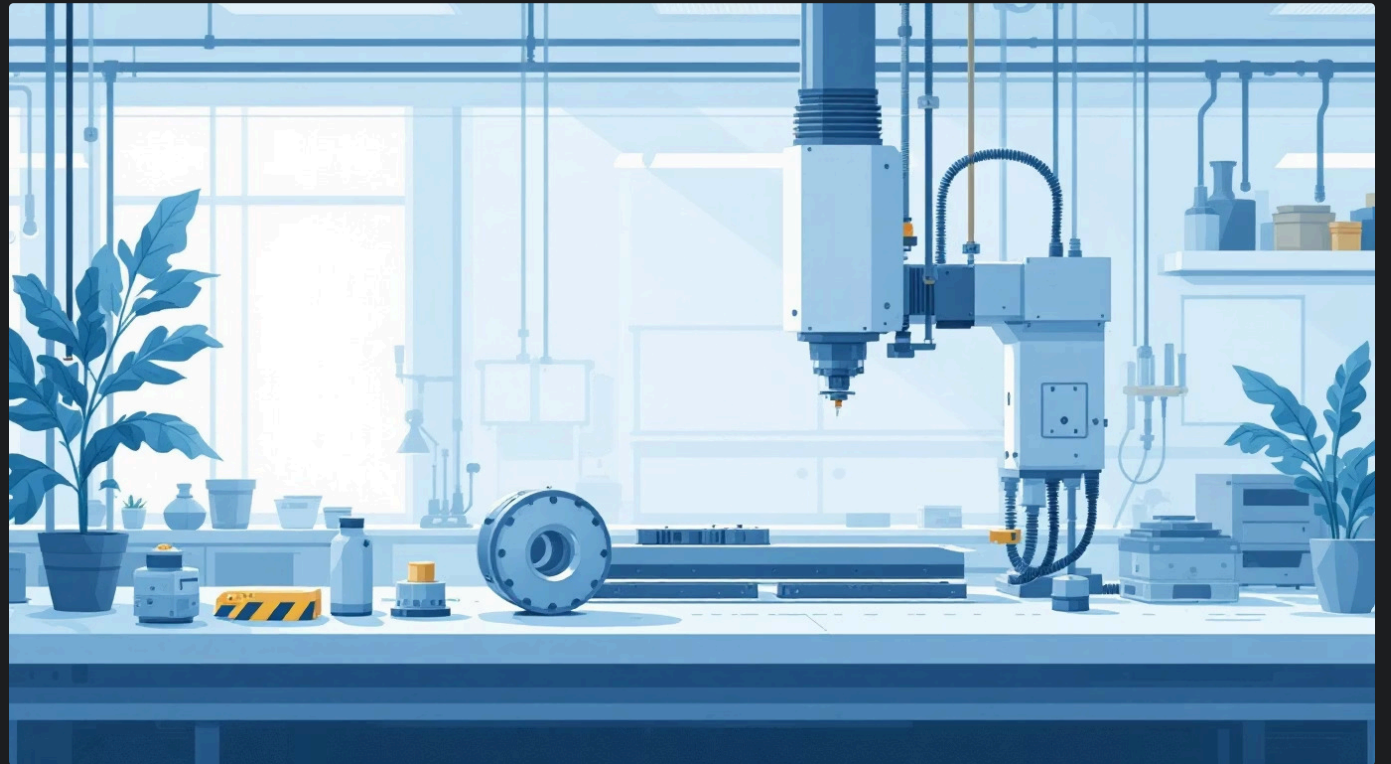

Steel, stainless steel, aluminum, engineering plastics, and specialty materials.

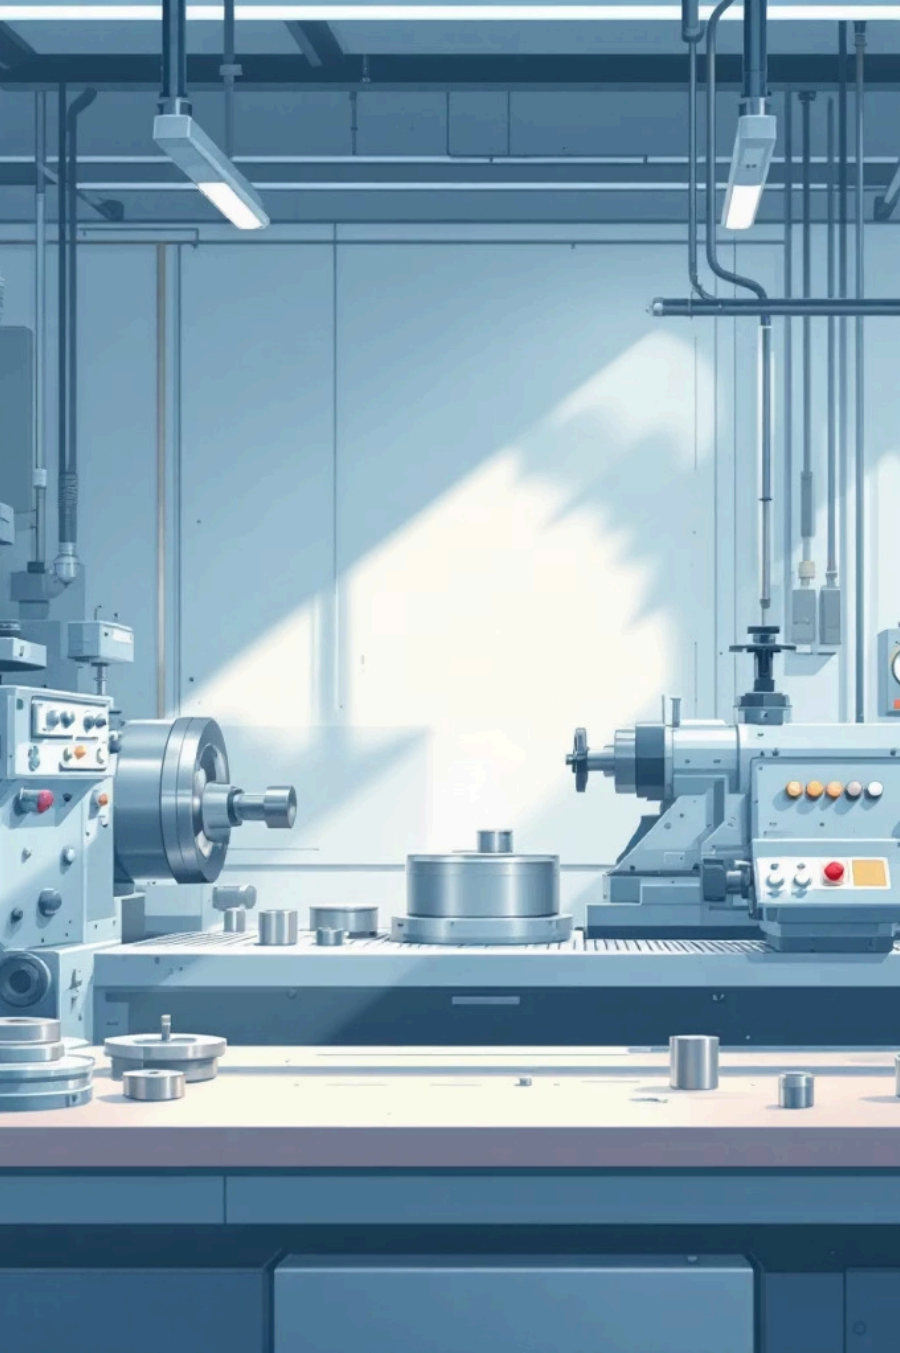

3-Axis CNC Milling

Technical Capabilities

- Production of complex parts according to technical drawings
- Guaranteed dimensional accuracy of ± 0.01 mm
- Excellent repeatability for small and medium production runs

Optimized CNC programming for maximum efficiency and tight tolerances.

Classic Turning

Cylindrical Parts

Exterior and interior machining with precision for rotational components.

Threading

Standard and custom threads produced quickly without complex programming.

Fast Repairs

Immediate solutions for defective parts or replacement components.

Our Promise

Verified Quality

Dimensional inspection on every part according to specifications.

Deadlines Met

Delivery guaranteed on the agreed date. If we commit, we deliver.

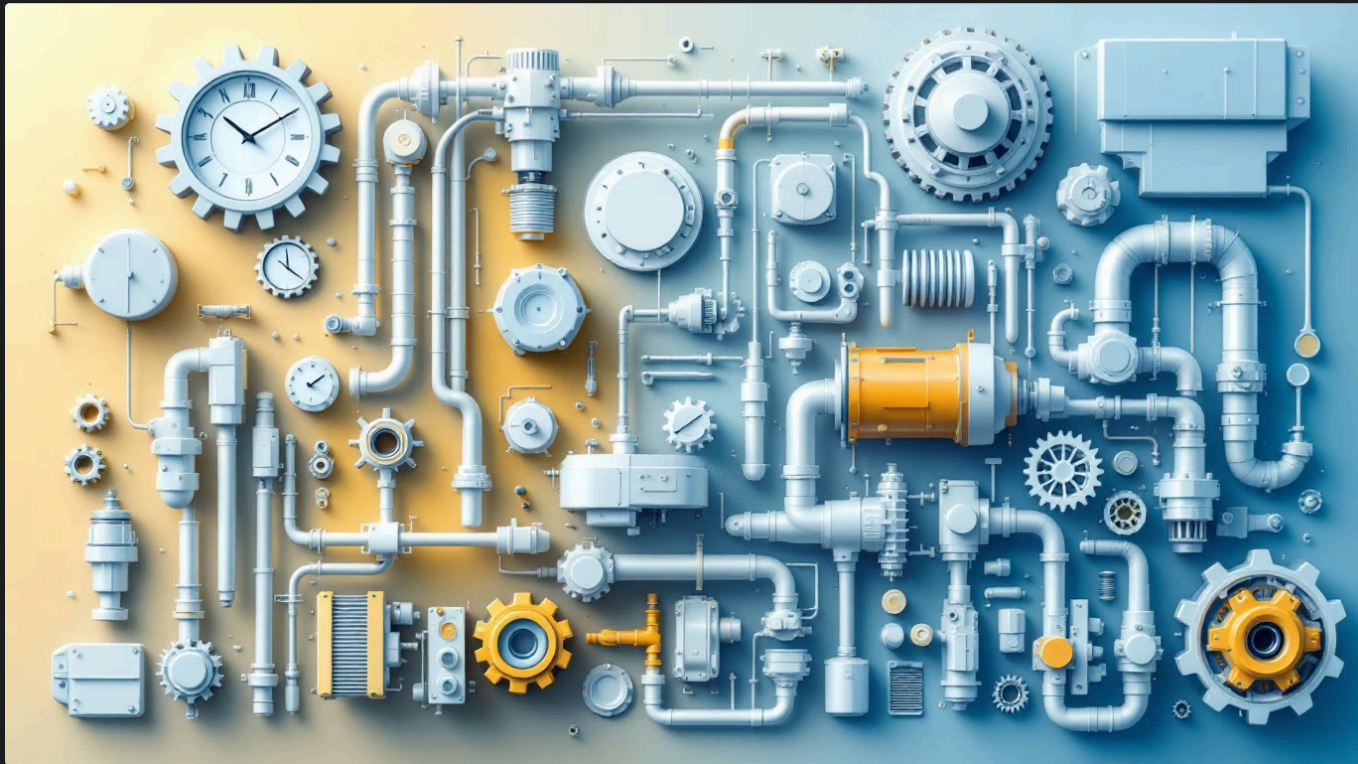

No Compromises

Drawing specifications become precise parts, without excuses.

Applications and Industries

Industrial Equipment

Components for production equipment, hydraulic systems, and pneumatic systems.

Automotive

Parts for mechanical assemblies and high-precision automotive components.

Repairs and Maintenance

Replacement components and specialized parts for existing machinery.

Why ARIM-METALIS

We understand technical drawings

We read the specifications and translate requirements into precise parts.

Fast responsiveness

Technical quotes and pricing within 48 hours of receiving the drawing.

Hands-on experience

A direct approach, without exaggerated promises, only concrete results.

Collaboration Process

01

Send the technical drawing

Complete technical documentation for review.

02

We receive the quote within 48 hours

Price, lead time, and technical specifications confirmed.

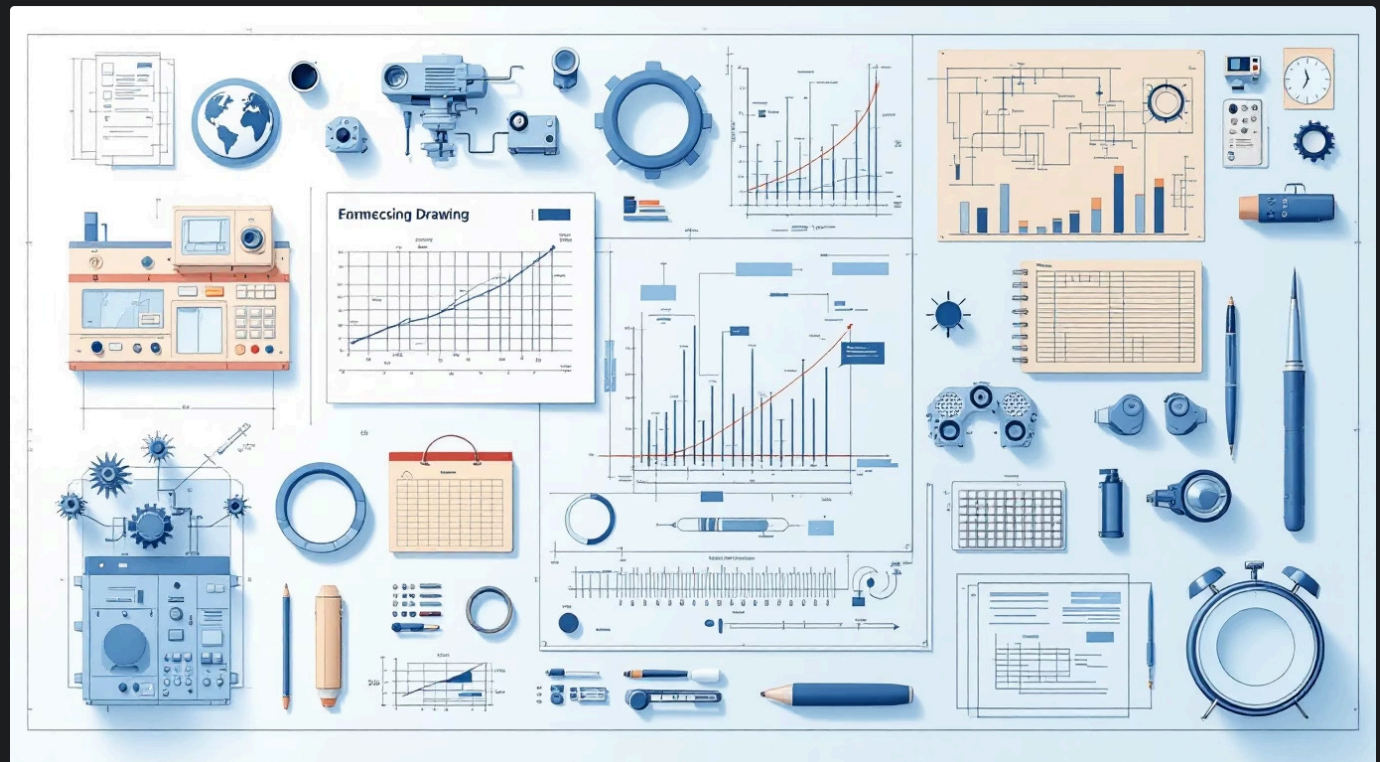

03

Delivery on the agreed schedule

Verified components delivered as specified.

Required Documentation

- Complete technical drawing
- Requested material
- Required quantity
- Desired deadline

Our Portfolio

Recent Projects and Completed Work

Explore examples of precision machining projects we've completed for our clients across various industries.

Steel precision-machined component

Aluminum lathe chuck

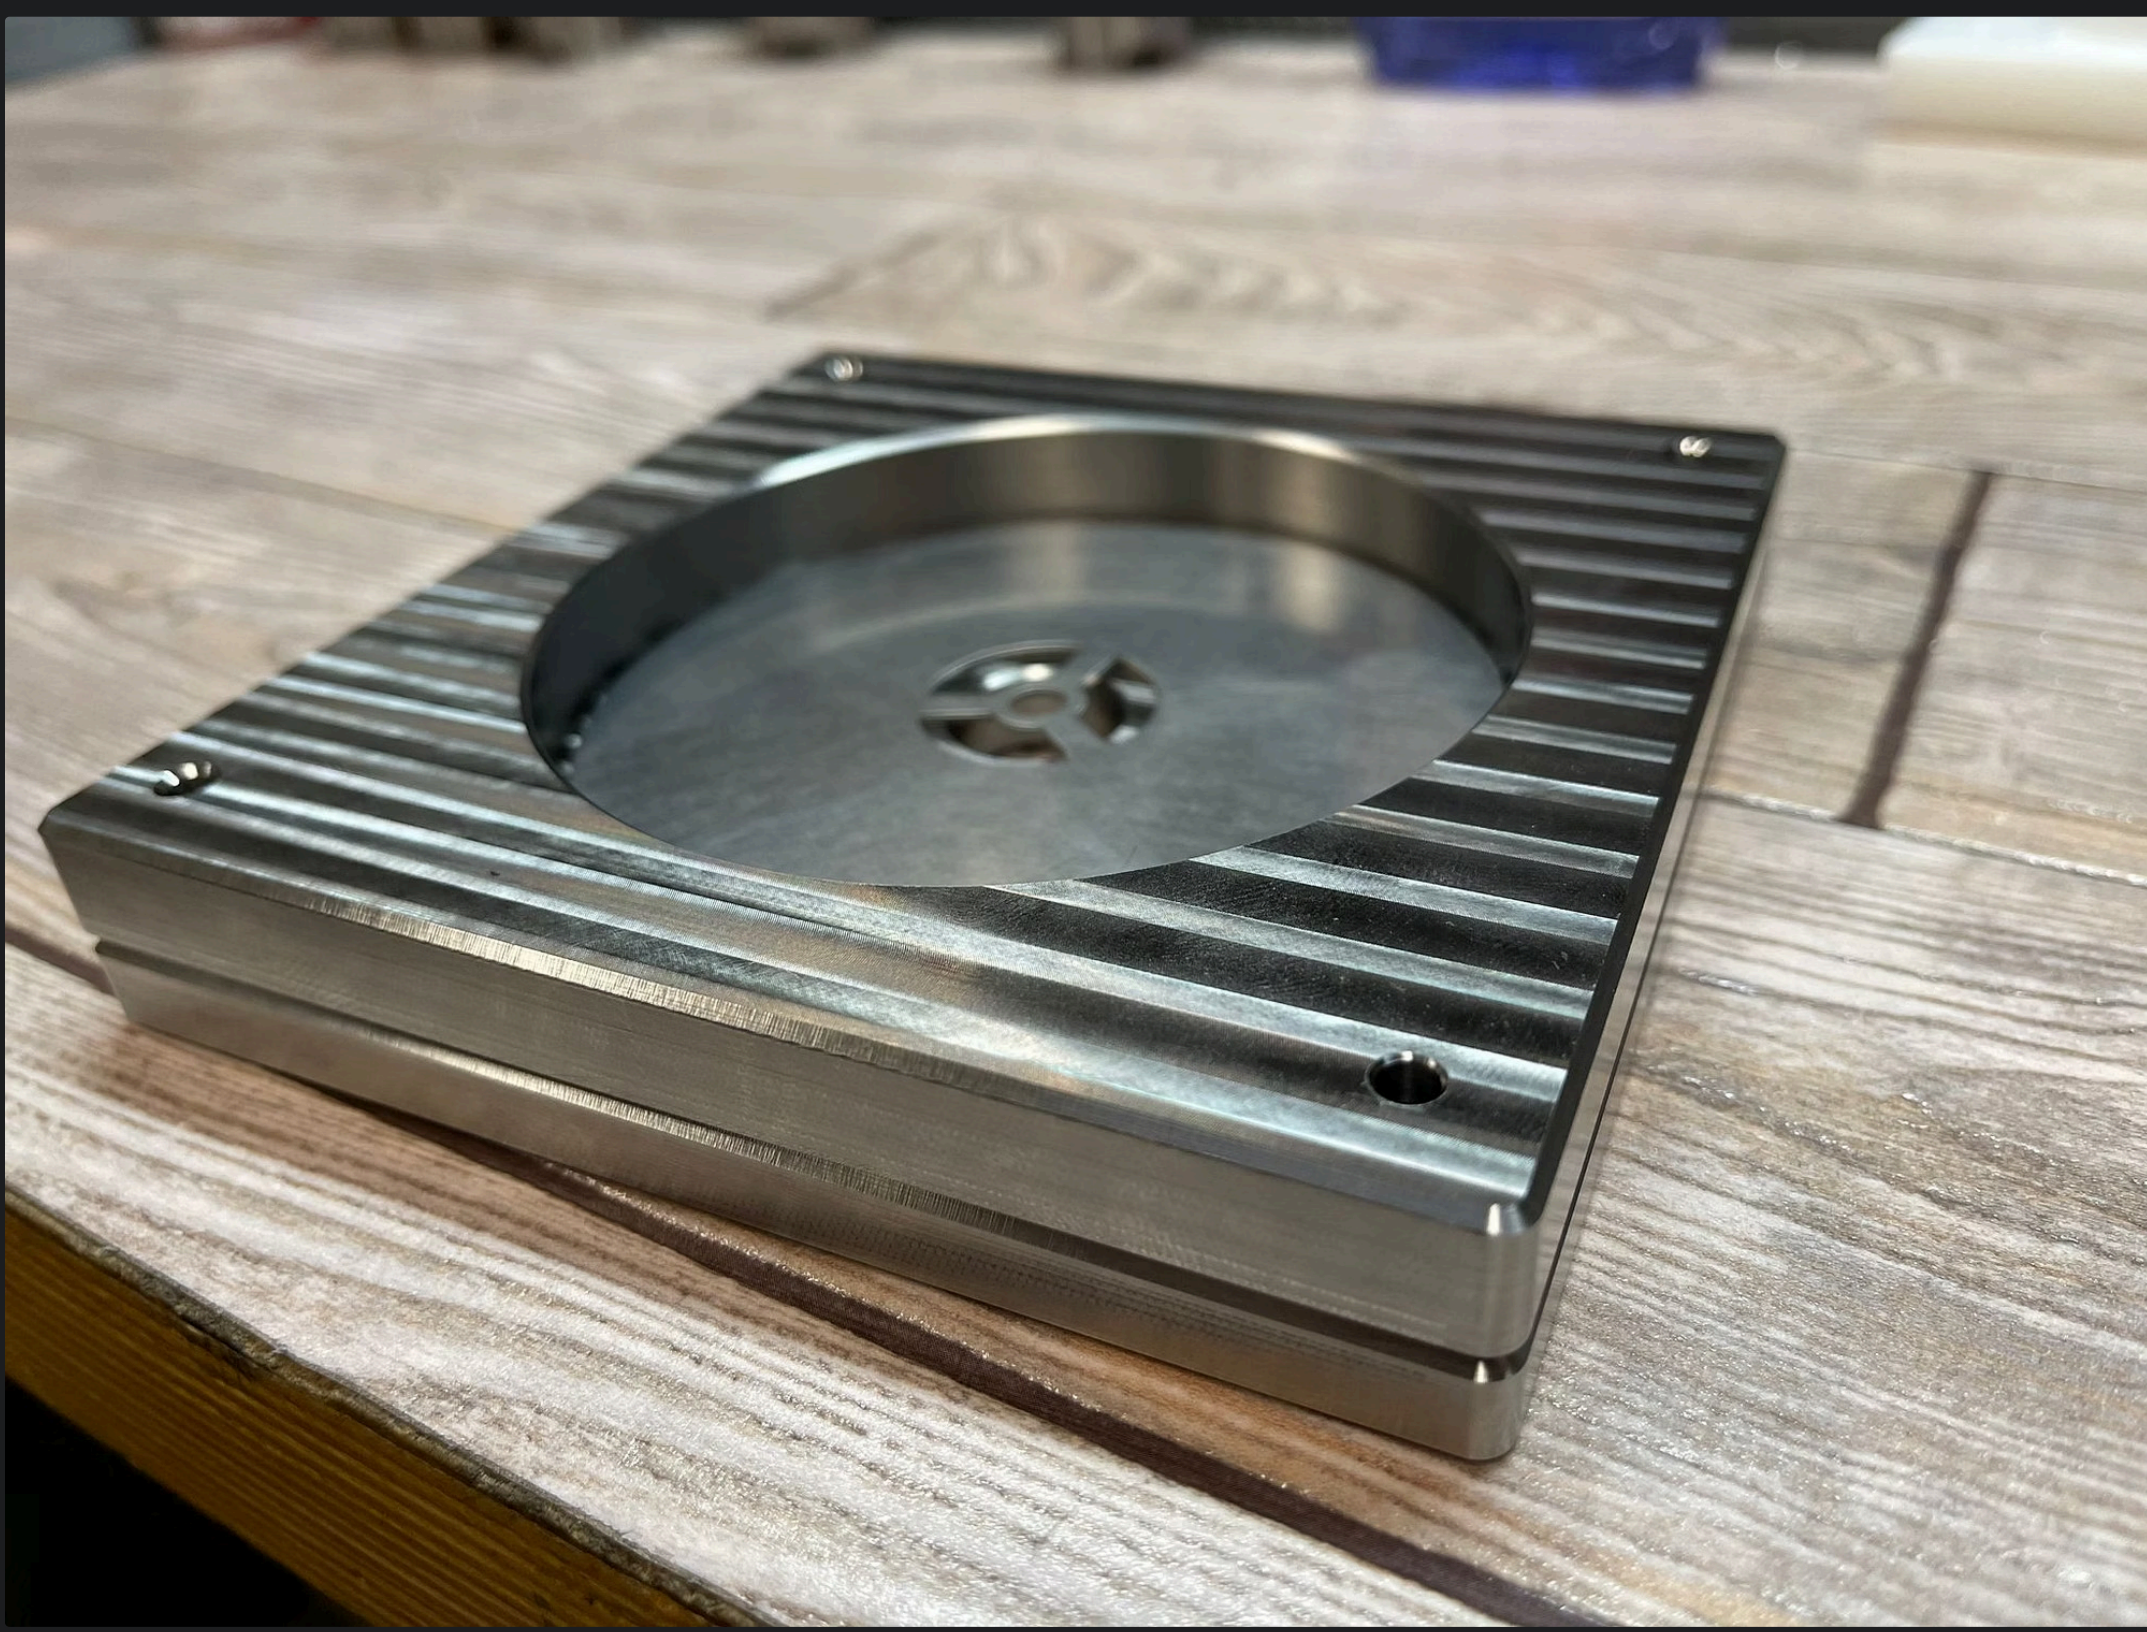

This document may be out of date because it has file references that may have been updated. (more...)

Stainless steel precision part

Aluminum fixture cap

Stainless steel water pump component

Invitation to Collaborate

ARIM-METALIS is ready to become your partner in mechanical machining. We are prepared to review your project and provide practical solutions.
