

COMPANY PROFILE

METALUM CNC

Reliable partner for precision
metal machining

METALUM CNC

ABOUT US

METALUM CNC is a company specializing in precision CNC metal machining, established to provide reliable, high-quality machining services to both domestic and international customers.

Prior to establishing the company, the owner gained several years of experience at an Austrian company manufacturing components for Siemens, working with demanding machined parts to high industrial standards.

Today, we apply this experience through our own production, providing CNC milling services for individual components, prototypes, and small to medium-sized series.

Our goal is to be a long-term and reliable manufacturing partner for companies that value quality, precision, and on-time delivery.

✓ Precision

MACHINERY & EQUIPMENT

CNC machining centre

EMCO - Emcomill E1200

Siemens Sinumerik 810D

Travel: X 1200 mm

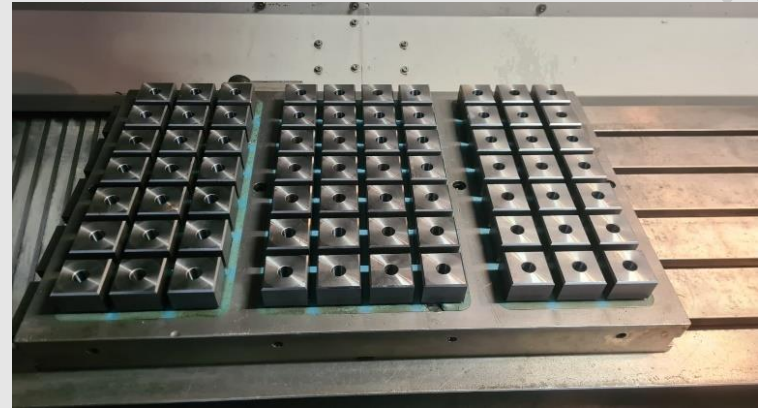

Travel: Y 550 mm

Travel: Z 500 mm

ADDITIONAL EQUIPMENT

- Electromagnetic chuck 650 × 420 mm
- Machine vices in various sizes
- Modern measuring equipment

WHY METALUM CNC?

- High precision
- Short lead times
- Flexible production
- Individual approach
- Consistent quality

Production capabilities

- Accuracy down to ± 0.01 mm
- Surface finish down to Ra 0.4
- Individual components
- Small and medium-sized series
- Prototype production

Our services

- CNC milling
- Drilling
- Thread tapping
- Engraving
- Contour milling
- 3D machining
- Surface finishing

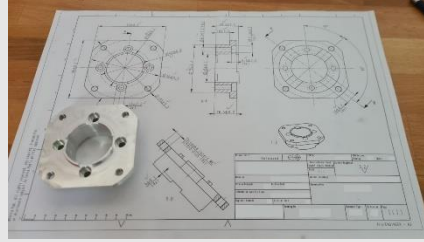

Materials

- Aluminium
- Steel
- Stainless steel
- Brass
- Plastics

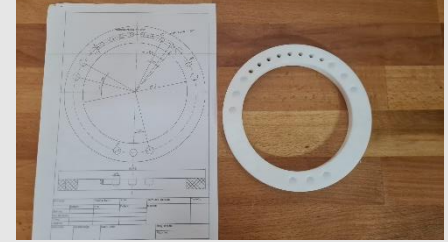

PROJECT REFERENCES

Bearing housing
Material – Steel

Reducer
Material – Aluminium

Prototype component
Material – Plastic

Soft jaw – lathe chuck
Material – Steel

Plate – surface facing
Material – Steel
Electromagnetic chucking
Ideal for irregular shapes

Bracket
Material – Steel
