Short introduction

Lukács László
General Manager

Steel Manufacturing Kft. was founded at the end of 2013 by Hungarian private individuals with the clear goal of becoming a reliable company in the production of steel structures for the construction industry. After the company's establishment, we gained more and more trust in the eyes of our numerous clients, which is nicely reflected in the growth of our revenue and staff. Our specialists with many years of experience guarantee not only the production of standard welded structures but also the execution of challenging special tasks with first-class quality. In addition to high quality, we pay great attention to serving our customers on time. In our continuously expanding team, we consider the regular training of our employees and keeping their expertise up to date as important. In 2019, we obtained the welding shop certification according to MSZ EN ISO 3834-2:2006 and became capable of producing dynamically loaded structures, which is allowed by our classification in class EXC3 according to EN 1090-2:2018.

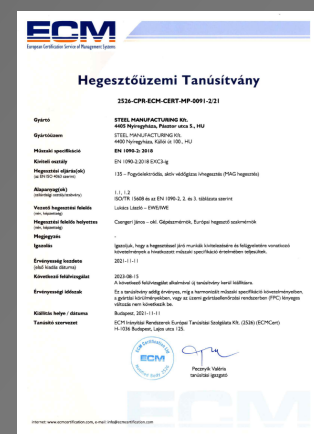

Important certificates:

ISO 9001:2015

MSZ EN ISO 3834-2:2006

EN 1090-2:2018— EXC3

STEEL MANUFACTURING KFT.

We love challenges!

Our main services

Industrial steel manufacturing

- General steel structures
- Bridge structures
- Technological structures
- Machine Parts
- Other structures

Weldings

- Handling bottlenecks at our partners
- Gas shielded arc welding
- Metal arc welding
- Tungsten inert gas welding

Sandblasting

- SA 2 and SA 2,5 cleanliness levels
- Blasting chamber 3 m x 14 m

On site installation

- On site installation of structures manufactured by us
- Installation and maintenance of bridge bearings and expansion joints
- Installation of special structures

CNC machining

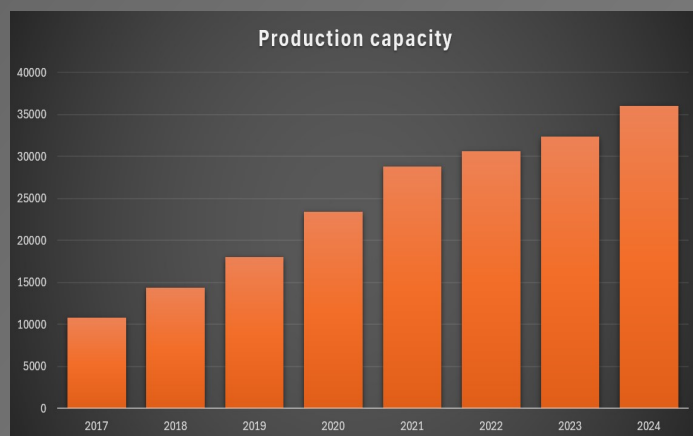

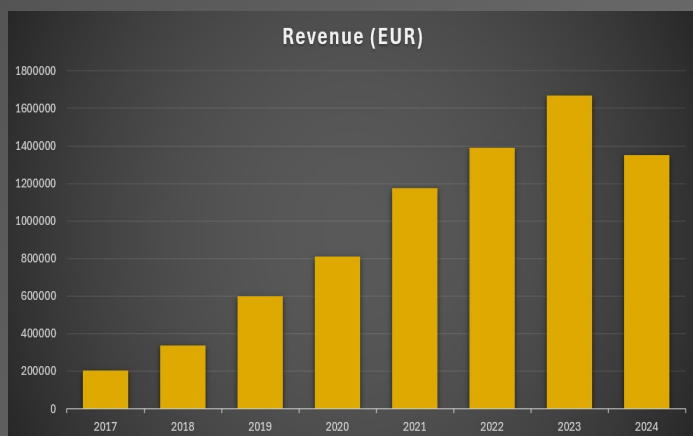

- Our three-axis CNC machining centers provide great flexibility in the production of parts and structures
- Series production
- Machining of special workpieces

Corrosion protection

- Airless technology
- Anti-corrosion protection systems according to customer requirements
