

Defence Manufacturing Capabilities

Van Hoof Groep is a Dutch manufacturing group specialized in precision sheet metal fabrication, gear manufacturing and high-precision machining.

The group combines three specialized manufacturing companies:

HMF Nederland

- Laser cutting
- Punching
- CNC bending
- Assembly
- Welded constructions

Van Eijk Transmissie

- Internal splines
- External splines
- Gears
- Transmission components
- Gear inspection and metrology

NIMA

- CNC turning
- CNC milling
- Grinding
- High-precision machined components

Core Strengths

- Precision machining
- Gear manufacturing
- Internal & external splines
- Transmission components
- Prototype to series production
- Quality inspection and measurement reports

Typical Applications

- Armoured vehicles
- Turret systems
- Mobility systems
- Transmission systems
- Precision mechanical assemblies

Defence Experience

Van Hoof Groep is active within the European defence supply chain.

- BAE Systems (BAE Hägglunds Sweden) – CV90 supply chain
- Van Halteren Technologies
- KNDS (Fennek)
- CHSnor
- Defenture

In addition, Van Hoof Groep supports customers in high-tech, mobility and industrial markets requiring high precision manufacturing and documented quality control.

Why Van Hoof Groep

- Sheet metal fabrication
- Gear manufacturing
- Precision machining
- Measurement & inspection
- Flexible production volumes
- Dutch manufacturing partner
- Experience within defence supply chains
